Policy Makers On Policy The Mais Lectures:

Policy Makers on Policy Forrest Capie, Geoffrey Wood, 2020-07-24 Monetary policy is still one of the most contested areas of modern economics and since the original publication of *Policy Makers on Policy* much has changed This new edition collects contributions from leading policy makers and practitioners to reflect on the aims and objectives of monetary policy and on what it can achieve combining the old chapters from Gordon Brown Tony Blair Kenneth Clarke Geoffrey Howe Nigel Lawson and others with new perspectives from Mervyn King Jean Claude Trichet Ernst Welteke Otmar Issing and Alastair Darling A new far reaching introduction from the editors Forrest Capie and Geoffrey Wood puts these important contributions to the discussion of economic policy in the new context They look at what lessons can be learnt from the earlier discussions what anticipations of present difficulties can be found in them and what in other words the comparatively recent past teaches us about how to deal with the turbulent present The second edition of *Policy Makers on Policy* brings together otherwise inaccessible commentaries and reflections on policy by those involved in making it along with a commentary on and context for their remarks Thus the book will be of great interest and use to students of economics and politics and indeed anyone with an interest in current economic developments and their roots in the past

Cultures of Expertise in Global Currency Markets Leon Wansleben, 2013-07-18 Notwithstanding financial crises global foreign exchange markets have undergone a tremendous growth during the last two decades Foreign exchange FX is often thought of as a site where economic actors exchange currencies for buying foreign goods or selling goods in foreign countries but the FX markets are better understood as financial spheres dominated by speculative actors A key question is how this huge global speculative

sphere has developed and what maintains it Thus far global currency markets have been largely neglected by the new approaches to finance and until now no study has existed to chart the interplay of their structural evolution and their shape as knowledge spheres This new book offers a systematic study of FX markets from a knowledge sociological perspective empirically focussing on analysts within these markets It makes the argument that market structures are reflected in and become stabilised by distinct cultures of financial expertise These cultures connect the actions and perceptions of loosely coupled globally distributed market players and establish shared sets of strategies of how to observe value and invest This highly original book will be of interest to scholars of economics sociology and political science and in particular to all those with an interest in the sociology of finance and the role of finance in the contemporary world **Doing Money** Heiner

Ganßmann, 2012-08-06 This book puts in place the groundwork for an alternative theory of money in a sociological perspective proceeding by way of a critique of existing theories Reforming the Governance of the Financial Sector David

G. Mayes, Geoffrey E. Wood, 2013 This volume argues that good governance is crucial to the success of any regulatory regime and explores how better governance of the financial sector can be achieved **Banking Crises, Liquidity, and Credit**

Lines Gurbachan Singh, 2012-06-14 The banking crises in 2007-10 are not exceptional There have been many such crises in the past in both developed countries and emerging economies A banking crisis can be related to solvency or liquidity or both This book focuses on banking crisis and liquidity This book starts from basics and gradually builds up with very few technicalities Though the analysis is primarily theoretical we provide a historical background a macroeconomic perspective and policy implications for both closed and open economies **Financial Systems in Troubled Waters** Alessandro

Carretta, Gianluca Mattarocci, 2013-05-07 This collection considers the financial crisis from a managerial perspective focussing on the business implications for the financial industry Topics examined include governance information needs and strategy of financial intermediaries and investors The contributions build on the existing literature and present some unique insights on governance credit quality evaluation and performance measurement In a fast growing or steady market it is possible for even an inefficient financial system to satisfy investors and firms needs However the current financial crisis has brought into sharp relief the limits of the inefficient practices adopted by the market and made clear the importance of developing more effective governance mechanisms more detailed and complete information databases and new strategies The crisis has also brought to the fore issues about the governance of financial intermediaries that had not been previously addressed These include board diversity internal monitoring procedures and the existence of interlocking directorates More broadly the financial crisis has radically altered the international framework with an increasingly consolidated financial sector and the rise of new markets such as China that now play a predominant role in the worldwide market Studies on the competition and on the performance in this new scenario are essential in order to understand the implications of recent events
