International Relations David Boucher, 1998 Boucher uses ideas of Western philosophy's most significant thinkers to trace the history of political theory in international relations. He ends by showing how theories compare with and extend the themes addressed by their predecessors.

Inside/Outside R. B. J. Walker, 1993 In this book Rob Walker offers an original analysis of the relationship between twentieth century theories of international relations and the political theory of civil society since the early modern period. He views theories of international relations both as an ideological expression of the modern state and as a clear indication of the difficulties of thinking about a world politics characterized by profound spatiotemporal accelerations. International relations theories should be seen, the author argues, more as aspects of contemporary world politics than as explanations of contemporary world politics. These theories are examined in the light of recent debates about modernity and post modernity, sovereignty and political identity and the limits of modern social and political theory. This book is a major contribution to the field of critical international relations and will be of interest to social and political theorists and political scientists as well as students and scholars of international relations.

Introduction to International Relations Robert H. Jackson, Georg Sørensen, 2016 This edition provides a systematic introduction to the principle theories in international relations. It focuses on the main theoretical traditions: realism, liberalism, international society and theories of international political economy. It also includes two chapters on social constructivism and foreign policy.
