Understanding the Economic Basics and Modern Capitalism Dan Blatt, 2014-09-24 UNDERSTANDING of the economic successes and failures of the past century and today begins here Dan Blatt after almost a half century of accurate published economic forecasts examines history's most important economic works He shows why capitalist market mechanisms successfully raise billions out of poverty and why socialist and other administered alternatives flourish briefly and then collapse UNDERSTANDING begins with the basic texts An Inquiry into the Nature and Causes of the Wealth of Nations by Adam Smith The Principles of Political Economy and Taxation by David Ricardo Capital Das Kapital by Karl Marx The General Theory of Employment Interest and Money by John Maynard Keynes Capitalism Socialism and Democracy by Joseph A Schumpeter The analysis is readily comprehensible for college level readers and busy professionals The style facilitates speed reading and scanning but with liberal inclusion of quoted material covering the key ideas and most famous passages Understanding the Economic Basics and Modern Capitalism is your source for rapid familiarity with these basic works and the reasons for the repetitive failure of current economic policies

Political Economy and the Rise of Capitalism David McNally, 2024-06-21 From the Introduction This book challenges the conventional wisdom about classical political economy and the rise of capitalism It is written in the conviction that modern interpretations of political economy have suffered terribly from acceptance of the prevailing liberal view of the origins and development of capitalist society By the liberal account capitalism emerged out of the centuries old competitive activities of merchants and

manufacturers in rational pursuit of their individual economic self interest Over time this account claims the persistent activity of these classes developed new forms of wealth and productive resources and new intellectual and cultural habits which eroded the existing structure of society The rise of capitalism is thus explained in terms of the rise to prominence of the most productive rational and progressive social groups merchants and manufacturers Not surprisingly classical political economy came to be seen as an intellectual reflection of the ascendancy of merchants and manufacturers and as a theoretical justification of their interests and activities This book argues that capitalism was the product of an immense transformation in the social relationships of landed society and that this fact is crucial to understanding the development of classical political economy Without a radical transformation of the agrarian economy the activities of merchants and manufacturers would have remained strictly confined By no inexorable logic of their own were mercantile and industrial activities capable of fundamentally transforming the essential relations of precapitalist society Rather the changes in agrarian economy which drove rural producers from their land forced them onto the labour market as wage labourers for their means of subsistence and refashioned farming as an economic activity based upon the production of agricultural commodities for profit on the market established the essential relations of modern capitalism In what follows these processes are described in terms of the emergence of agrarian capitalism This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988

The Diversity of Modern Capitalism Bruno

Amable, 2003-12-04 Based on a theory of institutions and comparative capitalism this text looks at the diversity of modern economies and identifies five different models the Anglo Saxon model Asian capitalism the Continental European model the social democratic economies and the Mediterranean model

How Labor Powers the Global Economy Emmanuel D.

Farjoun, Moshé Machover, David Zachariah, 2022-04-12 This book presents a probabilistic approach to studying the fundamental role of labor in capitalist economies and develops a non deterministic theoretical framework for the foundations of political economy By applying the framework to real world data the authors offer new insights into the dynamics of growth wages and accumulation in capitalist development around the globe The book demonstrates that a probabilistic political economy based on labor inputs enables us to describe central organizing principles in modern capitalism Starting from a few basic assumptions it shows that the working time of employees is the main regulating variable for determining strict numerical limits on the rate of economic growth the range of wages and the pace of accumulation under the present global economic system This book will appeal to anyone interested in how the capitalist mode of production works and its inherent limitations in particular it will be useful to scholars and students of Marxian economics Emmanuel Farjoun and Moshé Machover follow up their pathbreaking work on the application of statistical physics methods to political economy in this

book with David Zachariah in which they develop methods for making educated and structured estimates of stylized facts applicable to capitalist economies There s a lot for economists and anyone interested in the political economy of capitalism to learn from their reasoning on these issues including their novel and challenging suggestion of bounds on the rates of increase of use value productivity of labor and on the range of variation of the wage share Duncan K Foley Leo Model Professor of Economics New School for Social Research The Political Economy of Capitalism Lev Aleksandrovich Afanas'ev,1974 Capital Theory and Political Economy Lefteris Tsoulfidis,2021-05-30 In recent years there have been a number of new developments in what came to be known as the Capital Theory Debates The debates took place mainly during the 1960s as a result of Piero Sraffa s critique of the neoclassical theory according to which the prices of factors of production directly depend on their relative scarcities Sraffa showed that when income distribution changes there are many complexities developed within the economic system impacting on prices in ways which are not possible to predict These debates were revisited in the 1980s and again more recently along with a parallel literature that has developed among neoclassical economists and has also looked at the impact of shocks on an economy This book summarizes the debates and issues around the theory of capital and brings to the fore the more recent developments It also pinpoints the similarities and differences between the various approaches and critically evaluates them in light of available empirical evidence The focus of the book is on the price trajectories induced by changes in income distribution and the resulting shape of the wage rates of profit curves and frontier These issues are central to areas such as microeconomics international trade growth technological change and macro stability analysis Each chapter starts with the theoretical issues involved followed by their formalization and subsequently with their operationalization More specifically the variables of the classical theory of value and distribution are rigorously defined and quantified using actual input output data from a number of major economies but mainly from the USA over long stretches of time The empirical results are not only consistent with the anticipations of the theory but also further inform and therefore strengthen its predictive content raising new significant questions Stress and Contradiction in Modern Capitalism Council for European Studies,Fondazione Giovanni Agnelli,1975 *Frontiers of Political Economy* Guglielmo Carchedi,1991 Transcending the arid formalism of present day economic theory *Frontiers of Political Economy* develops a new and accessible perspective on the world economy Guglielmo Carchedi identifies and analyses three key features of modern capitalism the rapidly increasing share of human labour needed for the advancement of science and technology rather than for the production of goods the global rather than national nature of production distribution and consumption and the dominance of the oligopolies This analysis enables Carchedi to explore new theoretical frontiers from an original theory of mental and material labour to an investigation of the conditions under which mental labour produces value from an assessment of the class structure of modern capitalism to an appraisal of the social content of science and technology from an alternative account of crises inflation and stagflation to a study of their relation to the destruction of

value and to arms production He also cast fresh light on a number of basic contemporary issues including the present financial and monetary crisis and surveys the most important recent controversies in language accessible to non specialists Rigorous and wide ranging but written with great lucidity *Frontiers of Political Economy* is an essential book for both specialists and students in economics and politics
