Political Economy Of Poverty Equity And Growth A Comparative Study:

The Political Economy of Poverty, Equity and Growth: A Comparative Study Deepak Lal, H. Myint, Hla Myint, 1998-10-08 This wide ranging and innovative book synthesizes the findings of a major international study of the political economy of poverty equity and growth It represents an ambitious interdisciplinary attempt to identify patterns in the interplay of initial conditions institutions interests and ideas which can help to explain the different growth and poverty alleviation outcomes in the Third World

The Political Economy of Poverty, Equity and Growth, 1998 **The Political Economy of Poverty, Equity and Growth**, 1998 *The Political Economy of Poverty, Equity and Growth: A Comparative Study* Deepak Lal, H. Myint, 1998-10-08 This wide ranging and innovative book synthesises the findings of a major international study of the political economy of poverty equity and growth It is based primarily on analytical economic histories of 21 developing countries from 1950 to 1985 but also takes account of the wider literature on the subject The authors take an ambitious interdisciplinary approach to identify patterns in the interplay of initial conditions institutions interests and ideas which can help to explain the different growth and poverty alleviation outcomes in the Third World Three different types of poverty are distinguished based on their causes and a more nebulous idea of equity in contrast to egalitarianism is shown to have influenced policy Since growth is found to be the major means of alleviating mass structural poverty much of the book is concerned with discovering explanations for policies which are found to be the most important influences on the proximate causes of growth Lal and Myint also consider the available evidence on the role of direct transfers public and private in alleviating destitution and conjunctural poverty The Political Economy of Poverty Equity and Growth develops a novel framework for the comparative analysis of different growth outcomes This framework distinguishes between the different relative factor endowments of land labour and capital and between the different organizational structures of peasant versus plantation and mining economies It also differentiates between the polities of autonomous and factional states in the countries studied breaking the analysis down into further typological subdivisions and providing important new insights into the differing behaviour of economies that are rich in natural resources and those with abundant labour These insights constitute a richer explanation for the divergent developmental outcomes in East Asia compared with Latin America and Africa The evidence collated is used to argue for the continuing relevance of the classical liberal viewpoint on public policies for development and to show why even so nationalist ideologies are likely to be adopted and lead to cycles of interventionism and liberalism The evidence is also used to provide an explanation for the surprising current worldwide Age of Reform
