The Law and Policy of Ecosystem Services J. B. Ruhl, Steven E. Kraft, Christopher L. Lant, 2013-03-19 The Law and Policy of Ecosystem Services is the first comprehensive exploration of the status and future of natural capital and ecosystem services in American law and policy The book develops a framework for thinking about ecosystem services across their ecologic geographic economic social and legal dimensions and evaluates the prospects of crafting a legal infrastructure that can help build an ecosystem service economy that is as robust as existing economies for manufactured goods natural resource commodities and human provided services The book examines the geographic ecological and economic context of ecosystem services and provides a baseline of the current status of ecosystem services in law and society It identifies shortcomings of current law and policy and the critical areas for improvement and forges an approach for the design of new law and policy for ecosystem services Included are a series of nine empirical case studies that explore the problems caused by society's failure to properly value natural capital Among the case study topics considered are water issues The Conservation Reserve Program the National Conservation Buffer Initiative the agricultural policy of the European Union wetland mitigation and pollution trading The Law and Policy of Ecosystem Services is a groundbreaking look at the question of whether and how law and policy can shape a sustainable system of

ecosystem service management It is an accessible and informative work for faculty students and policy makers concerned with ecology economics geography political science environmental studies law and related fields **The Political Economy of Evaluation** Jerker Carlsson,Gunnar Koehlin,Anders Ekbom,2016-07-27 Examines the economic impact of aid but not in the sense that it questions the relevance of this objective or tries to measure whether aid works or not The focus of this book is on the evaluation process itself Can aid evaluation be improved in order to increase the effectiveness of aid **Resource Management, Sustainable Development and Governance** Baleshwar Thakur,Rajiv R. Thakur,Srikumar Chattopadhyay,Rajesh K. Abhay,2022-01-01 This book examines the relationship between natural resource management sustainable development and governance with case studies from India and other places covering disaster risk reduction conflict resolution capacity building climate change adaptation and resilience citizen engagement and ecological conservation Though the studies focus mostly on cases in India the volume discusses how governance can be employed to help develop and implement sustainable practices globally through the lens of the United Nations Sustainable Development Goals SDGs framework Readers will learn how to integrate concepts of resource management sustainable development and governance to improve human resilience to global environmental change and to assess the proper development approaches to assist economically stressed and resource deprived individuals The book will be of use to graduate students and academics policy makers planners and nonprofits **Property And Politics In Sabah, Malaysia** Amity A. Doolittle,2005 This very welcome book offers important insights into the logic of development in Malaysia as well as its impact on local struggles for land rights Amity Doolittle has written an exemplary work that utilizes ethnography political economy and historical analysis An impressive well written and well researched book American Anthropologist Geoenvironment, An Introduction U. Aswathanarayana,2018-12-19 The focus of this book is on the management of the geoenvironment It seeks to explain how through an understanding of the environmental processes that take place in rocks soils waters sediments air and so on the resources contained in them could be managed sustainably Topics covered in the book include Ecologically sustainable industrial development dynamics of the geoenvironment the impact of mining on rocks soils water and biota the natural radiation environment the use of geotechnology to mitigate the consequences of natural disasters and the disposal of various kinds of waste particularly hazardous waste The models proposed by the World Bank on how to make environmental amelioration economically viable are also looked at *Natural Resource Policymaking in Developing Countries* William Ascher,Robert G. Healy,1990 Drawing on case studies developed over a two year period 1987 1989 by Fellows in the Program in International Development Policy at Duke University including experienced representatives from developing countries the World Bank and scholars the authors integrate the growing interest in environmental protection and resource conservation into the existing body of knowledge about the political economy of developing countries This book is about the links that tie resource use environmental quality and economic development and the way in which those links are affected by

the distribution of income and resource ownership The links may be relatively simple as in the case of peasant farmers too poor to conserve resources for the future and with nothing to gain from sound environmental practices Or they may be very complex as the authors find when they demonstrate how achievement of higher incomes by the rich can increase environmentally destructive behavior by the poor Many of the links in some way involve rural land use whether for agriculture or forestry Natural Resource Policymaking in Developing Countries argues that the policies that matter are not merely those dealing with resources and the environment but a much broader set that includes income distribution and asset ownership
