Political Equilibrium:

Political Equilibrium: A Delicate Balance Peter C. Ordeshook, K.A. Shepsle, 2012-12-06 Peter C Ordeshook and Kenneth A Shepsle If the inaugural date of modern economics is set at 1776 with the publication of Adam Smith's *The Wealth of Nations* then the analytical tradition in the study of politics is not even a decade younger commencing nine years later with the publication of the Marquis de Condorcet's *Essai sur l'application de l'analyse à la probabilité des décisions rendues à la pluralité des voix* The parallel however stops there for unlike Smith and other classical economists who laid an intellectual foundation upon which a century of cumulative scientific research proceeded analytical political science suffered fits and starts Condorcet himself acknowledges the earlier work predating the *Essai* by some fourteen years of Borda and from time to time during the nineteenth century their contributions were rediscovered by Dodgson Nanson and other political philosophers and arithmeticians But by century's end there was nothing in political science to compare to the grand edifice of general equilibrium theory in neoclassical economics Despite roots traversing two centuries then the analytical study of politics is a twentieth century affair The initial inspiration and insight of Condorcet was seized upon just after World War II by Duncan Black who wrote several papers on the equilibrium properties of majority rule in specific contexts Black 1948a b He expanded upon these themes in his now deservedly famous monograph *The Theory of Committees and Elections* and the lesser known essay with R A **Theory of Politics: an Inquiry Into the Foundations of Governments, and the Causes and Progress of Political Revolutions** Richard Hildreth, 1853 **The Purpose of Intervention** Martha Finnemore, 2013-01-15 Violence or the potential for violence is a fact of human existence Many societies including our own reward martial success or skill at arms The ways in which members of a particular society use force reveal a great deal about the nature of authority within the group and about its members priorities Martha Finnemore uses one type of force military intervention as a window onto the shifting character of international society She examines the changes over the past 400 years in why countries intervene militarily as well as in the ways they have intervened It is not the fact of intervention that has altered she says but rather the reasons for and meaning behind intervention the conventional understanding of the purposes for which states can and should use force Finnemore looks at three types of intervention collecting debts addressing humanitarian crises and acting against states perceived as threats to international peace In all three she finds that what is now considered obvious was vigorously contested or even rejected by people in earlier periods for well articulated and logical reasons A broad historical perspective allows her to explicate long term trends the steady erosion of force's normative value in international politics the growing influence of equality norms in many aspects of global political life and the increasing importance of law in intervention practices **Companion to the Political Economy of Rent Seeking** R. D. Congleton, A. L. Hillman, 2015-02-27 The quest for benefit from existing wealth or by seeking privileged benefit through influence over policy is known as rent seeking Much rent seeking activity involves government and political

decisions and is therefore in the domain of political economy

The Political Economy of Lobbying Karsten Mause, Andreas Polk, 2024-01-09 Lobbying is not only the subject of ongoing heated debates in politics and the public sphere but has also been a focus of the social sciences for decades This edited volume provides an overview of the current state of research on lobbying from the perspective of Public Choice as a subfield of political science and economics After a brief introduction to the field Part I provides an overview of basic concepts and political economic theories of lobbying from the standpoints of various subfields of Public Choice Subsequently Part II investigates the various channels used by interest groups to influence policymakers such as party donations informational lobbying hiring politicians etc These chapters also discuss the possibilities and limits of regulating the respective channels Lastly Part III sheds light on lobbying in selected regions i e the United States European Union Russia and China

Systems, Stability, and Statecraft P. Schroeder, 2016-09-27 Few scholars have provided as much insight into the struggle of leaders ideas and policies as Paul W Schroeder Constantly challenging conventional views and drawing upon a masterly command of the sources and literature Schroeder provides new answers to old questions about international history and politics since the age of Napoleon Were European international relations really driven by balance of power politics or has that traditional view blinded us to an underlying normative consensus on the rules of the game that frequently contributed to cooperation among the leading states in the system Are alliances primarily a means of the aggregation of power against stronger states or do states often use alliances as instruments of influence or control over their allies Was World War I contingent upon a confluence of independent processes that intersected in 1914 or was it the product of more deeply rooted and interconnected structural forces that pushed inevitably toward war What is the role of moral judgment in historical investigation Raising new questions and offering provocative new interpretations Schroeder encourages historians and political scientists alike to reconsider their long standing beliefs about the evolution and dynamics of modern diplomacy

Human Rights and Economic Policy Reform Aoife Nolan, Juan Pablo Bohoslavsky, 2021-09-22 This book deals with the complex and challenging relationship between economic policy and human rights In the context of the COVID 19 pandemic crisis the need to address the conceptual and methodological disconnects between these two areas is more pressing than ever Inspired by the 2019 United Nations Guiding Principles on Human Rights Impact Assessments HRIA for Economic Reform Policies this book brings together experts working on human rights and economic policy from a range of disciplinary perspectives including economics law and development studies The contributions reflect a huge body of professional experience in the academic policy making advocacy and practitioner fields They cover issues including the politics of evidence in the context of HRIA economic inequality child rights impact assessment of economic reforms economic policy and women s human rights tax regimes for multinational corporations and human rights as well as the human rights impacts of the economic fallout of the COVID 19 pandemic The collection also includes the text of the Guiding Principles themselves It constitutes a crucial volume for

scholars policymakers advocates and others working on the burning topic of human rights and economic policy reform The chapters in this book were originally published as a special issue of The International Journal of Human Rights Political Equilibrium William H. Handey,1848 **Political Economics** Torsten Persson,Guido Tabellini,2002-01-25 What determines the size and form of redistributive programs the extent and type of public goods provision the burden of taxation across alternative tax bases the size of government deficits and the stance of monetary policy during the course of business and electoral cycles A large and rapidly growing literature in political economics attempts to answer these questions But so far there is little consensus on the answers and disagreement on the appropriate mode of analysis Combining the best of three separate traditions the theory of macroeconomic policy public choice and rational choice in political science Torsten Persson and Guido Tabellini suggest a unified approach to the field As in modern macroeconomics individual citizens behave rationally their preferences over economic outcomes inducing preferences over policy As in public choice the delegation of policy decisions to elected representatives may give rise to agency problems between voters and politicians And as in rational choice political institutions shape the procedures for setting policy and electing politicians The authors outline a common method of analysis establish several new results and identify the main outstanding problems *The Common Agricultural Policy and Organic Farming* Kennet Lynggaard,2006-01-01 The Common Agricultural Policy and Organic Farming covers how ideational change came about to enhance the understanding of change within the Common Agricultural Policy CAP and to plan and implement change in European agriculture policy The contents cover institutional change within the CAP and focus on the institutional construction policy concerned with organic farming
