The Politics of Governance Lucy Koechlin, Till Förster, 2014-11-13 How do government arrangements emerge When and how does individual agency turn into collective agency How do sensory experiences of violence instability etc affect the configuration of governance arrangements When why and how are governance arrangements institutionalized This book seeks to contribute to a non normative conceptualization of the emergence and transformation of government arrangements and addresses the under theorization of actors and agency in conventional governance theories The editors and contributors theorize the concept of governance more concretely by analyzing the key actors and arrangements that define states of governance across different places and by examining its performance and development in particular settings and time periods Each contribution to the edited volume is based on a case study drawn from Africa though the book argues that the core issues identified remain the same across the world though in different empirical contexts The contributions also range across key disciplines from anthropology to sociology to political science This ground breaking volume addresses governance arrangements discusses how social actors form such arrangements and concludes by synthesizing an actor centered understanding of political articulation to a general theory of governance Scholars across disciplines such as political science development studies African studies and sociology will find the book insightful

Schatzberg, 2001-11-13 In this innovative work Michael G Schatzberg reads metaphors found in the popular press as indicators of the way Africans come to understand their political universe Examining daily newspapers popular literature and political and church documents he finds that widespread and deeply ingrained views of government and its relationship to its citizenry may be understood as a projection of the metaphor of an idealized extended family onto the formal political sphere

Africa Under Colonial Domination 1880-1935 Unesco. International Scientific Committee for the Drafting of a General History of Africa, 1985 Africa was partitioned and colonized by the Europeans After military conquest came the commercial exploitation of the wealth of Africa The intensity of resistance to colonization varied from one region to another but a new economic and social system linked with colonization was put in place bringing about unprecedented demographic and political change Publisher's description

Nationalism and the State John Breuilly, 1982 Since its publication this important study has become established as a central work on the vast and contested subject of modern nationalism Placing historical evidence within a general theoretical framework John Breuilly argues that nationalism

should be understood as a form of politics that arises in opposition to the modern state In this updated and revised edition he extends his analysis to the most recent developments in central Europe and the former Soviet Union He also addresses the current debates over the meaning of nationalism and their implications for his position Breuilly challenges the conventional view that nationalism emerges from a sense of cultural identity Rather he shows how elites social groups and foreign governments use nationalist appeals to mobilize popular support against the state Nationalism then is a means of creating a sense of identity This provocative argument is supported with a wide ranging analysis of pertinent examples national opposition in early modern Europe the unification movement in Germany Italy and Poland separatism under the Hapsburg and Ottoman empires fascism in Germany Italy and Romania post war anti colonialism and the nationalist resurgence following the breakdown of Soviet power Still the most comprehensive and systematic historical comparison of nationalist politics Nationalism and the State is an indispensable book for anyone seeking to understand modern politics **The War System** Richard Falk, Samuel S Kim, 2019-08-15 An interdisciplinary study of this nature and scope reflects contributions of many scholars in diverse disciplines and fields concerned with human conflict behavior in general and with human war prone behavior in particular They are too numerous to enumerate here Still our deep gratitude goes to those scholars whose writings have been incorporated in this volume as sample representatives of what their particular disciplines can contribute to the study of war *Politics in Francophone Africa* Victor T. Le Vine, 2004 Explores the elements that have shaped the particular political dynamics of the 14 former French colonies in west and equatorial Africa while allowing them to remain part of a unique francophone sociopolitical community
