The Physics of Radiation Therapy Faiz M. Khan, 2012-03-28 Dr Khan's classic textbook on radiation oncology physics is now in its thoroughly revised and updated Fourth Edition. It provides the entire radiation therapy team—radiation oncologists, medical physicists, dosimetrists, and radiation therapists—with a thorough understanding of the physics and practical clinical applications of advanced radiation therapy technologies, including 3D CRT, stereotactic radiotherapy, HDR IMRT, IGRT, and proton beam therapy. These technologies are discussed along with the physical concepts underlying treatment planning, treatment delivery, and dosimetry. This Fourth Edition includes brand new chapters on image-guided radiation therapy, IGRT, and proton beam therapy. Other chapters have been revised to incorporate the most recent developments in the field. This edition also features more than 100 full-color illustrations throughout. Indigenous and Tribal Peoples and Cancer Gail Garvey, 2024-09-04 Although cancer survival has improved markedly in developed countries in recent decades, not all groups have benefited equally. In particular, Indigenous and Tribal peoples continue to have poorer cancer outcomes than their non-Indigenous counterparts. The available evidence suggests these disparities are linked to a complex combination of factors, including higher incidence of cancers associated with a high case fatality rate, later stage of diagnosis, reduced access to cancer treatment, and poorer overall health. Much research is underway to explore approaches to improving health system responses for Indigenous and Tribal peoples. A developing evidence base is supporting effective translation of knowledge into practice. This book offers a global perspective on this evidence base, written from Indigenous perspectives. This book is the first comprehensive publication to report on cancer incidence, mortality, prevalence, survival, and inequities for Indigenous and Tribal peoples globally, with the aim of enhancing global efforts to improve outcomes for these populations. Its content and approach are led by Indigenous researchers with international reputations in health and cancer research. Chapters provide important information and data to support Indigenous-specific targeted cancer awareness and early detection campaigns. This book goes beyond a discussion of the issues and challenges in Indigenous health with a strengths-based approach to discussing successful health interventions, research projects, research translation, and living well both with and beyond cancer. This is an open access book.
