want to understand how Apple Inc became an industry behemoth look no further than the 1977 Apple II Designed by the
brilliant engineer Steve Wozniak and hustled into the marketplace by his Apple cofounder Steve Jobs the Apple II became one
of the most prominent personal computers of this dawning industry The Apple II was a versatile piece of hardware but its
most compelling story isn t found in the feat of its engineering the personalities of Apple s founders or the way it set the
stage for the company s multibillion dollar future Instead historian Laine Nooney shows what made the Apple II iconic was its
software In software we discover the material reasons people bought computers Not to hack but to play Not to code but to
calculate Not to program but to print The story of personal computing in the United States is not about the evolution of
hackers it s about the rise of everyday users Recounting a constellation of software creation stories Nooney offers a new

software products like VisiCalc and The Print Shop to historic games like Mystery House and Snooper Troops to long forgotten disk cracking utilities The Apple II Age offers an unprecedented look at the people the industry and the money that built the microcomputing milieu and why so much of it converged around the pioneering Apple II
