Radiology Of Trauma:

Radiology of Trauma Martin Heller,A. Fink,2012-12-06 Trauma is a very common condition in medical practice and a frequent cause of death morbidity and disability Although most radiologists will spend a considerable amount of their time dealing with trauma patients this topic has not acquired prestige status in radiological meetings journals or books This is regrettable because the radiologist is frequently able to make a specific and very valuable contribution to the handling and management of trauma patients admitted to the emergency departments of our hospitals Indeed the radiologist by virtue of his specific expertise is able to provide excellent advice to clinicians concerning the choice and the sequence of examinations He can thereby provide qualified support for rapid decisions that may be either vital for the patient's outcome or decisive for an early recovery without disability or long lasting sequelae This book is unrivalled in its complete and meticulous coverage of the diagnostic imaging methods used in trauma patients It is written by outstanding European experts and provides comprehensive coverage of all anatomical areas that may be involved in patients with skeletal or visceral traumatic lesions Professor M Heller Dr A Fink and their team in Kiel have long standing experience and a solid international reputation in the field of radiological imaging and management of trauma They have been assisted in their task by several other well known specialists in this area *Radiology of Skeletal Trauma* Lee F.
