## **Railways And The Victorian Imagination:**

Railways and the Victorian Imagination Michael J. Freeman, 1999-01-01 Discusses the cultural and social effect that the railway had on nineteenth century society in Great Britain      Railways and Culture in Britain Ian Carter, 2001 The 19th century steam railway epitomized modernity's relentlessly onrushing advance Ian Carter delves into the cultural impact of the train Why for example did Britain possess no great railway novel He compares fiction and images by canonical British figures Turner Dickens Arnold Bennett with selected French and Russian competitors Tolstoy Zola Monet Manet He argues that while high cultural work on the British steam railway is thin British popular culture did not ignore it Detailed discussions of comic fiction crime fiction and cartoons reveal a popular fascination with railways tumbling from vast and hitherto unexplored stores of critically overlooked genres      **William Wordsworth and the Ecology of Authorship** Scott Hess, 2012 In William Wordsworth and the Ecology of Authorship Scott Hess explores Wordsworth's defining role in establishing what he designates as the ecology of authorship a primarily middle class nineteenth century conception of nature associated with aesthetics high culture individualism and nation Instead of viewing Wordsworth as an early ecologist Hess places him within a context that is largely cultural and aesthetic The supposedly universal Wordsworthian vision of nature Hess argues was in this sense specifically male middle class professional and culturally elite factors that continue to shape the environmental movement today      **Railway** George Revill, 2013-06-01 In the nineteenth century railways were viewed as a symbol of progress and confidence in technological modernity In the twenty first century the frustrations of gridlocked traffic record high gas prices and the looming fears of climate change have transformed the railway system once again into a symbol of hope that provides the possibility of an environmentally sustainable future In Railway George Revill examines the technology and politics of railway history as well as related themes such as mobility identity design marketing and sustainability In both practical and symbolic senses the cultural meanings of railways continue to play a role in how people organize and respond to modern environments social problems and technologies Revill draws from art literature music and film to illustrate how the railway carries meaning for all of us creating connections and separations detachment and involvement from the routine commuter to the enthusiast As Revill shows railways inform our everyday language from fast track to side track to going off the rails and continue to fascinate us today In this wide ranging and well illustrated look at railways across the globe Revill ultimately reveals how central they are to our understanding of modern everyday life

**The Lure of the Beach** Robert C. Ritchie,2021-05-11 A human and global take on a beloved vacation spot The crash of surf smell of salted air wet whorls of sand underfoot These are the sensations of the beach that environment that has drawn humans to its life sustaining shores for millennia And while the gull s cry and the cove s splendor have remained constant throughout time our relationship with the beach has been as fluid as the runnels left behind by the tide s turning The Lure of the Beach is a chronicle of humanity s history with the coast taking us from the seaside pleasure palaces of Roman elites and the aquatic rituals of medieval pilgrims to the venues of modern resort towns and beyond Robert C Ritchie traces the contours of the material and social economies of the beach throughout time covering changes in the social status of beach goers the technology of transport and the development of fashion from nudity to Victorianism and back again as well as the geographic spread of modern beach going from England to France across the Mediterranean and from nineteenth century America to the world And as climate change and rising sea levels erode the familiar faces of our coasts we are poised for a contemporary reckoning with our relationship and responsibilities to our beaches and their ecosystems The Lure of the Beach demonstrates that whether as a commodified pastoral destination a site of ecological resplendency or a flashpoint between private ownership and public access the history of the beach is a human one that deserves to be told now more than ever before

**From Rail to Road and Back Again?** Colin Divall,2016-03-03 The coming of the railways signalled the transformation of European society allowing the quick and cheap mass transportation of people and goods on a previously unimaginable scale By the early decades of the twentieth century however the domination of rail transport was threatened by increased

motorised road transport which would quickly surpass and eclipse the trains only itself to be challenged in the twenty first century by a renewal of interest in railways Yet as the studies in this volume make clear to view the relationship between road and rail as a simple competition between two rival forms of transportation is a mistake Rail transport did not vanish in the twentieth century any more than road transport vanished in the nineteenth with the appearance of the railways Instead a mutual interdependence has always existed balancing the strengths and weaknesses of each system It is that interdependence that forms the major theme of this collection Divided into two main sections the first part of the book offers a series of chapters examining how railway companies reacted to increasing competition from road transport and exploring the degree to which railways depended on road transportation at different times and places Part two focuses on road mobility interpreting it as the innovative success story of the twentieth century Taken together these essays provide a fascinating reappraisal of the complex and shifting nature of European transportation over the last one hundred years

**Women and the Railway, 1850-1915** Anna Despotopoulou, 2015-03-01 Examines cultural representations of women s experience of the railway in a period of heightened mobility Women s experiences of locomotion during a period of increased physical mobility and urbanisation are explored in this monograph The 5 chapters analyse Victorian and early Modernist texts which concentrate on women in transit by train including Wilkie Collins s No Name George Meredith s Diana of the Crossways Elizabeth Gaskell s North and South Henry James s The Spoils of Poynton and The Wings of the Dove and stories by Rhoda Broughton Margaret Oliphant Charles Dickens and Katherine Mansfield They highlight the tension between women s boundless physical emotional and sexual aspiration often depicted as closely related to the freedom and speed of train travel and Victorian gender ideology which constructed the spaces of the railway as geographies of fear or manipulation Key features The first full length examination of texts by and about women which explore the railway as a gendered space within a British and European context Explores a variety of cultural discourses which deal with women and the railway fiction poetry news stories and commentaries essays paintings and philosophical writings Proposes a reconceptualization of the public private binary

**The Routledge Research Companion to Nineteenth-Century British Literature and Science** John Holmes, Sharon Ruston, 2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative and up to date foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts

within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman
