Railways at the turn of the century, 1895-1905 Oswald Stevens Nock,1969 **Historical Atlas of Canada: The land transformed, 1800-1891** Geoffrey J. Matthews,Don Measner,1987-01-01 Uses maps to illustrate the development of Canada from the last ice sheet to the end of the eighteenth century **The Railway Journey** Wolfgang Schivelbusch,2014-05-06

The impact of constant technological change upon our perception of the world is so pervasive as to have become a commonplace of modern society But this was not always the case as Wolfgang Schivelbusch points out in this fascinating study our adaptation to technological change the development of our modern industrialized consciousness was very much a learned behavior In *The Railway Journey* Schivelbusch examines the origins of this industrialized consciousness by exploring the reaction in the nineteenth century to the first dramatic avatar of technological change the railroad In a highly original and engaging fashion Schivelbusch discusses the ways in which our perceptions of distance time autonomy speed and risk were altered by railway travel As a history of the surprising ways in which technology and culture interact this book covers a wide range of topics including the changing perception of landscapes the death of conversation while traveling the problematic nature of the railway compartment the space of glass architecture the pathology of the railway journey industrial fatigue and the history of shock and the railroad and the city Belonging to a distinguished European tradition of critical sociology best exemplified by the work of Georg Simmel and Walter Benjamin *The Railway Journey* is anchored in rich empirical data and full of striking insights about railway travel the industrial revolution and technological change Now updated with a new preface *The Railway Journey* is an invaluable resource for readers interested in nineteenth century culture and technology and the prehistory of modern media and digitalization *Economy and Society in 19th Century Britain* Richard Tames,2013-11-05 In 1801 the population of Great Britain was 10 6 million by 1901 it was 37 1 million The national product in 1801 has been valued at 138 000 000 by 1901 it was 1 948 000 000 The rise per head was from 12 9 to 52 5 and as these figures represent constant prices the rise in material standards is evident even allowing for the unequal distribution of socially created wealth This book is a short crisp survey of the major economic and social developments in nineteenth century Britain It combines a brief narrative history with a lucid and exciting synthesis of all the important problems and academic controversies The chapters discuss economic growth population its growth impact and movement urbanisation and the housing problem industry agriculture transport overseas trade and foreign investment life and labour education finance the role of government and the social structure The text is extensively subdivided for easy reference and is illustrated with numerous tables and diagrams There is a full critical bibliography at the end of each chapter and a chronological table of events at the end of the book **Monorails of the 19th Century** Adrian S. Garner,2011

Discoveries & Inventions of the 19th Century Robert Routledge,1898 *Railway Development* Frank Bruinsma,Eric Pels,Hugo Priemus,Piet Rietveld,Bert van Wee,2007-12-22 The revitalisation of railway station areas has been a hot issue in

policy making in Europe in recent years The introduction of two new railway systems the high speed train and light rail systems has pushed forward the redevelopment of not only railway stations themselves but also of their in many cases deteriorated direct surroundings Examples of revitali tion of railway station areas can be found throughout Europe for example in countries like England Liverpool France Euralille Germany Berlin and the Netherlands Amsterdam South Axis The dynamics of revitali tion of railway station areas can best be understood by combining the sights of several disciplines economics and spatial sciences being the most important disciplines This book therefore addresses the subject from a multi disciplinary perspective Railway station area redevelopment projects try to cope with the creased lack of interoperability and interconnectivity between infrastr ures and boost the local regional economy by creating a new high quality multifunctional urban landscape at the same time At present the initial outcomes with the transformation of deteriorated railway station areas into modern mixed office shopping and residential areas stems hopeful but what are the prospects of those redeveloped areas Most of the papers contained in this volume were presented at the s th cial session Railway stations and urban dynamics of the 45 conference of the European Regional Science Association ERSA held in Amst dam the Netherlands during August 2005

The House of Tata Meets the Second Industrial Revolution Chikayoshi Nomura, 2018-04-12 This monograph aims to analyze the economic and business history of colonial India from a corporate perspective by clarifying the historical role of institutional developments based on archival evidence of a representative enterprise The perspective is distinctively unique in that it highlights the salience of corporate level institutional responses to explain the causes of colonial India s industrial growth in addition to two renowned perspectives focusing on government economic policy or factor endowment One of the driving forces of India s high growth rate since the 1980s is the expansion of modern business corporations whose origins date back to the colonial era in the mid nineteenth century This monograph explores the historical foundation of the growth of such corporations in colonial India guided by a substantial collection of

documents of Tata Iron and Steel Company whose rich records have not received the due attention they have long deserved. As clarified by numerous economic and business historians of leading industrialized countries since the works of Douglass North and Alfred Chandler, this study as well proposes that the development of modern business corporations in colonial India was broadly supported by the reciprocal evolution of economic institutions and corporate organizations. Adding a new perspective to the business and economic history of colonial India, the analysis also provides an important case study of the development of corporate business in the non-Western world to the study of global business history.

The Laboratory of Progress Joseph Jung, 2022-09-16

The Laboratory of Progress: Switzerland in the 19th Century tells the improbable story of how a small, backward, mountainous agricultural country with almost no raw materials became an industrial powerhouse, a hub of innovation, a touristic mecca, and a pioneer in transportation, all in the course of a single century. That a tiny landlocked country should become a dominant steamship builder for the rest of the world, that a country that had never seen a cotton plant should become the world's second largest textile producer, that a country with hardly any level terrain should come to boast the world's most highly developed railway network, and that a country whose main export was impoverished emigrants should be transformed into one of the world's major financial centres: these astonishing developments, among many others, are explored and explained both through the specific stories of individual innovators and through a prescient analysis of the political, economic, societal, and cultural structures that formed the context in which Switzerland's astonishing transformation took place. The book is a compelling read both for professional historians and for general readers with an interest in Switzerland; it highlights the roles of transport networks and individual pioneers in industrial and political development.
