Walcott, Corey Johnson, 2013-11-12 Connectivity as well as conflict characterizes Eurasia This edited volume explores dynamic geopolitical and geo economic links reconfiguring spaces from the eastern edge of Europe through the western edge of Asia seeking explanation beyond description The ancient Silk Road tied together space much as pipelines railroads telecommunications infrastructure and similar cultural and constructed links ease the mobility of people and products in modern Eurasia This book considers Eurasia along an interlinked corridor with chapters illustrating the connections as a discussion foundation focusing on the shared interactions of a set of nation states through time and across space generating more positive considerations of the resurgently important region of Eurasia China's interests fall into three chapters the southeastern border with Vietnam the southwestern Himalayan edge and the western Muslim regions Russia's recovery relates events to a larger landmass context and focuses on the importance of historic mobility A geo history of the Caspian considers this petroleum rich area as a zone of cultural and economic interconnection The final focus on Central Asia treats the traditional heart of Eurasia The concluding chapter pulls together strands linking subregions for a new concept of Eurasia as an area linked by vital interests and overlapping histories **Religion and Human Security in Africa** Ezra Chitando, Joram Tarusarira, 2019-01-23 Across diverse countries and contexts in Africa religion has direct implications for human security While some individuals and groups seek to manipulate and control through the deployment of religion

religious belief is also a common facet of those working towards peace and reconciliation. Despite the strategic importance of religion to human security in Africa, there are few contemporary publications that explore this issue on an international scale. This volume redresses that imbalance by examining religion's impact on human security across Africa. Written by an international team of contributors, this book looks in detail at the intersection of religion and security in a variety of African contexts. Case studies from a diverse set of countries including Nigeria, Ghana, South Africa, Burkina Faso, and more are used to illustrate wider trends across the continent. Acknowledging that religion can be used to incite violence as well as encourage peace, the chapters employ an interdisciplinary exploration of the ethics, sociology, and politics around these issues. This is a much needed volume on religion's capacity to effect human security. It will therefore be of significant interest to any scholar of religious studies, African studies, political science, the sociology of religion, and anthropology, as well as peace, conflict, and reconciliation studies.

The Social Significance of Religion in the Enlarged Europe Olaf Müller, 2016-02-24

Engaging with some of the central issues in the sociology of religion, this volume investigates the role and significance of churches and religion in contemporary Western and Eastern Europe. Based on an extensive international research project, it offers case studies of various countries including Finland, Ireland, Portugal, Germany, Poland, Russia, Estonia, Hungary, and Croatia, as well as cross-country comparisons. Researching more precisely the present social relevance of church and religion at different levels, *The Social Significance of Religion in the Enlarged Europe* raises and responds to both descriptive and explanatory questions: Can we observe tendencies of religious decline in the various Western and Eastern European countries? Are we witnessing trends of religious individualization? To what extent has there been a religious upswing in the last few years? And what are the factors causing the observed processes of religious change? Marked by its broad range of data and a coherent conceptual framework in accordance with which each chapter assesses the extent to which three important theoretical approaches in the sociology of religion—secularization theory, the market model of religion, and the individualization thesis—are applicable to the data, this book will be of interest to scholars of sociology, politics, and religion exploring religious trends and attitudes in contemporary Europe.
