

Spiritual Diversity and Religion's Role

✓ Exclusively available on IvyPanda

This paper reviews the concepts of spiritual diversity and religion's role as a social institution. The world's largest religions, including Judaism, Islam, Christianity, Hinduism, and Buddhism, are connected by an attempt to hypothesize the global meanings of humanity's existence (TED-Ed, n.d.). Religion instrumentalizes the concept of sacredness or things deserving of reverence in order to produce specific social norms and values, such as charity, morality, or social cohesion (CrashCourse, n.d.). At the same time, it represents a unique form of social control and contributes to the establishment of hierarchical relationships between demographic groups, especially men and women (CrashCourse, n.d.). The institution in question is part of a larger system of social organization that includes education and family (Khanacademymedicine, n.d.). There are three interesting facts presented in the week's materials. First, aside from being a protest against official religious movements, sects and cults are short-lived and stem from the breakdown of widely recognized belief systems (Khanacademymedicine, n.d.). Second, atheism is increasingly prevalent among young U.S. citizens; still, more than 70% of adult Americans report the importance of spirituality in their life, making the U.S. more religious than other high-income countries (CrashCourse, n.d.). Third, religions can establish almsgiving as an obligation; for instance, Zakat payments in Islam are used to promote balance in wealth distribution (TED-Ed, n.d.). I find the second fact the most interesting since it reveals an intergenerational conflict surrounding a departure from faith-based lifestyles and the maintenance of tradition. Concerning connections, information on spirituality and behavior, such as Buddhists' celebration of silence and conciseness in conversation, can promote changes in my intercultural communication skills (TED-Ed, n.d.). Specifically, I can increase the recognition of my interlocutors' spiritual self-identity and mirror their approaches to information exchange to improve mutual understanding.

Religious Diversity Essays A Harper Forum:

Religious Diversity Wilfred Cantwell Smith, 1976 Religious Diversity—What's the Problem? Rita M. Gross, 2014-04-24
Once upon a time on grounds of both religion and common sense people assumed that the earth was flat and that the sun literally rose and set each day When newly developing knowledge made those beliefs untenable giving them up was difficult Today the belief that only one of the world's various religions is true for all people on earth is equivalent to the belief in a flat earth Both notions have become untenable given contemporary knowledge about religion Even though many people are still troubled by the existence of religious diversity today that diversity is a fact of life Religious diversity should be no more troubling to religious people than the fact that the earth is round and circles the sun This provocative book based on the author's longtime practice of Buddhism and comparative study of religion provides tools with which one can truly appreciate religious diversity as a gift and resource rather than as a deficiency or a problem to be overcome After we accept diversity as inevitable and become comfortable with it diversity always enriches life both nature and culture Theology and Political Society Charles Davis, 1980-10-02 Queen's Quarterly, 1977 **Monographic Series** Library of Congress,

International Seminar on Religious Education and Values ISREV which took place in 2006 in Driebergen the Netherlands addressing the theme Religious Education in a World of Religious Diversity The authors were invited to combine the concept of diversity with the dimensions of temporality of time and history in reworking their contributions for this book This temporal aspect is in a sense inherent in educational thinking On the one hand education as intergenerational transmission has a conservative aspect tradition being what is actually and presently transmitted from the past and or what is considered worthwhile to be passed on On the other hand acknowledging the activity of students themselves as a prerequisite for any education to happen brings the open endedness and therefore the future into the pedagogical arena in terms of development learning reflection edification et cetera So the question answered in this volume is what does this inherent historicity mean for religious education as well as for the concept religion and religious diversity In answering this question the contributions represent the global character of the concern with religious diversity in relation to religious education and originate respectively from the following countries Canada Bhikkhu English United States Moran Latvia Ilishko Russia Kozyrev Germany Pirner South Africa Roux du Preez Ferguson Japan Omori Australia de Souza Turkey Sel uk and the Netherlands Meijer Miedema **Parabola** ,1976
