Religious And Philosophical Aspects Of The Laozi:

Religious and Philosophical Aspects of the Laozi Mark Csikszentmihalyi, P. J. Ivanhoe, Chair Professor of East Asian and Comparative Philosophy and Religion and Director of the Center for East Asian and Comparative Philosophy (Ceacop) Philip J. Ivanhoe, 1999-01-01 Leading scholars examine religious and philosophical dimensions of the Chinese classic known as the Daodejing or Laozi

Dao Companion to Daoist Philosophy Xiaogan Liu, 2014-10-27 This is the first comprehensive companion to the study of Daoism as a philosophical tradition. It provides a general overview of Daoist philosophy in various thinkers and texts from 6th century BCE to 5th century CE and reflects the latest academic developments in the field. It discusses theoretical and philosophical issues based on rigorous textual and historical investigations and examinations reflecting both the ancient scholarship and modern approaches and methodologies. The themes include debates on the origin of the Daoism, the authorship and dating of the Laozi, the authorship and classification of chapters in the Zhuangzi, the themes and philosophical arguments in the Laozi and Zhuangzi, their transformations and developments in Pre-Qin, Han, and Wei-Jin periods, by Huang-Lao school, Heguanzi, Wenzi, Huainanzi, Wang Bi, Guo Xiang, and Worthies in bamboo grove, among others. Each chapter is written by experts and specialists on the topic discussed.

An Introduction to Daoist Philosophies Steve Coutinho, 2013-11-05 Steve Coutinho explores in detail the fundamental concepts of Daoist thought as represented in three early texts: the Laozi, the Zhuangzi, and the Liezi. Readers interested in philosophy yet unfamiliar with Daoism will gain a comprehensive understanding of these works from this analysis, and readers fascinated by ancient China who also wish to grasp its philosophical foundations will appreciate the clarity and depth of Coutinho's explanations. Coutinho writes a volume for all readers, whether or not they have a background in philosophy or Chinese studies. A work of comparative philosophy, this volume also integrates the concepts and methods of contemporary philosophical discourse into a discussion of early Chinese thought. The resulting dialogue relates ancient Chinese thought to contemporary philosophical issues and uses modern Western ideas and approaches to throw new interpretive light on classical texts. Rather than function as historical curiosities, these works act as living philosophies in conversation with contemporary thought and experience. Coutinho respects the multiplicity of Daoist philosophies while also revealing a distinctive philosophical sensibility, and he provides clear explanations of these complex texts without resorting to oversimplification.

Historical Dictionary of Daoism Ronnie L. Littlejohn, 2019-11-29 Daoism is the oldest indigenous philosophic/spiritual tradition of China and one of the most ancient of the world's spiritual structures. The name Daoism comes from the term *dao*, which means a way or a road through the field or woods to one's village. It also means the way to do something, such as how a master craftsman carves wood, makes a bell, or even butchers an ox. But *dao* is also a nominative in the history of Daoism, referring to the energizing process that permeates and animates all of reality and moves it along. However, both text and practice in this tradition insist that *dao* itself cannot be described in words; it is not God in the sense of Western philosophy or religion. Daoism has no supreme being, even

if there is an extensive grammar about nominally self conscious entities and powers for which the Chinese use the word spirit shen For example the highest powers of Daoism are variously called Taishang Laojun the deified Laozi the Celestial Worthy of Primordial Beginning Yuanshi tianzun the Jade Emperor Yuhuang Shangdi or the Perfected Warrior Zhenwu But these are expressions of dao in specific shen they are not identical to Dao except in the most unique case when Laozi the putative founder of Daoism and author of its major work Daodejing is said to be one with the dao Historical Dictionary of Daoism contains a chronology an introduction appendixes an extensive bibliography and more than 400 cross referenced entries related to the Chinese belief and worldview known as Daoism including dozens of Daoist terms names and practices This book is an excellent resource for students researchers and anyone wanting to know more about Daoism **Zhuangzi**

Process Philosophy and Organization Studies Jenny Helin, Tor Hernes, Daniel Hjorth, Robin Holt, 2014-05-15 Process approaches to organization studies focus on flow activities and evolution understanding organizations and organizing as processes in the making They stand in contrast to positivist approaches that see organizations and phenomena as fixed static and measurable Process approaches draw on a range of ideas and philosophies The Handbook examines 34 philosophers and social theorists both those commonly linked to process thinking such as Whitehead Bergson and James and those that are not as often addressed from a process perspective such as Dilthey and Tarde Each chapter addresses the background and context of this thinker their work with a focus on the processual elements and the potential contribution to organization and management research For students and scholars in the field of Organization Studies this book is an entry point into the work of philosophical thinkers and social theorists for whom the world is far from being a solid place **Contemplative**

contemplative practice and contemplative experience from a comparative and cross cultural perspective Ironies of Oneness and Difference Brook Ziporyn, 2012-09-20 Providing a bracing expansion of horizons this book displays the unsuspected range of human thinking on the most basic categories of experience The way in which early Chinese thinkers approached concepts such as one and many sameness and difference self and other and internal and external stand in stark contrast to the way parallel concepts entrenched in much of modern thinking developed in Greek and European thought Brook Ziporyn traces the distinctive and surprising philosophical journeys found in the works of the formative Confucian and Daoist thinkers back to a prevailing set of assumptions that tends to see questions of identity value and knowledge the subject matter of ontology ethics and epistemology in other traditions as all ultimately relating to questions about coherence in one form or another Mere awareness of how many different ways human beings can think and have thought about these categories is itself a game changer for our own attitudes toward what is thinkable for us The actual inhabitation and mastery of these alternative modes of thinking is an even greater adventure in intellectual and experiential expansion *Spirit, Qi, and the Multitude* Hyo-Dong Lee, 2013-11-11 We live in an increasingly global interconnected and interdependent world in which various forms of systemic imbalance in power have given birth to a growing demand for genuine pluralism and democracy As befits a world so interconnected this book presents a comparative theological and philosophical attempt to construct new underpinnings for the idea of democracy by bringing the Western concept of spirit into dialogue with the East Asian nondualistic and nonhierarchical notion of qi The book follows the historical adventures of the idea of qi through some of its Confucian and Daoist textual histories in East Asia mainly Laozi Zhu Xi Toegye Nongmun and Su un and compares them with analogous conceptualizations of the ultimate creative and spiritual power found in the intellectual constellations of Western and or Christian thought namely Whitehead s Creativity Hegel s Geist Deleuze s chaosmos and Catherine Keller s Tehom The book adds to the growing body of pneumatocentric Spirit centered panentheistic Christian theologies that emphasize God s liberating equalizing and pluralizing immanence in the cosmos Furthermore it injects into the theological and philosophical dialogue between the West and Confucian and Daoist East Asia which has heretofore been dominated by the American pragmatist and process traditions a fresh voice shaped by Hegelian postmodern and postcolonial thought This enriches the ways in which the pluralistic and democratic implications of the notion of qi may be articulated In addition by offering a valuable introduction to some representative Korean thinkers who are largely unknown to Western scholars the book advances the study of East Asia and Neo Confucianism in particular Last but not least the book provides a model of Asian contextual theology that draws on the religious and philosophical resources of East Asia to offer a vision of pluralism and democracy A reader interested in the conversation between the East and West in light of the global reality of political oppression economic exploitation and cultural marginalization will find this book informative engaging and enlightening
