Religious Regimes And State Formation Perspectives From European Ethnology:

Religious Regimes and State Formation Eric R. Wolf, 1991-08-13 This book intends to systematically overcome the received practice of treating religion and politics as wholly separate and independent domains It studies power and meaning in their antagonistic interdependencies rather than approaching religion purely as a realm of meaning without reference to issues of power or dealing with politics as the province of power without raising questions of meaning Religion and politics are thus seen in relation to one another and attention is focused on the disputes about how political and religious regimes should be formed Religious Regimes and State Formation will convince the reader that god and politics have much in common and offers surprising new perspectives on old problems

Religious Regimes and State Formation Eric R. Wolf, 1991-01-01 This book intends to systematically overcome the received practice of treating religion and politics as wholly separate and independent domains It studies power and meaning in their antagonistic interdependencies rather than approaching religion purely as a realm of meaning without reference to issues of power or dealing with politics as the province of power without raising questions of meaning Religion and politics are thus seen in relation to one another and attention is focused on the disputes about how political and religious regimes should be formed Religious Regimes and State Formation will convince the reader that god and politics have much in common and offers surprising new perspectives on old problems

Theologies of Power and Crisis Stephen Pavey, 2011-07-01 Theologies of Power and Crisis provides a case study for Eric Wolf's research directive to better comprehend the interplay of cultural webs of meaning and material webs of power forms of social life More specifically the book demonstrates how theological discourse and practice engage with historical and material relations of power It has been normative to speak of power in terms of political and economic processes and theology in terms of interpretive and symbolic experiences This work breaks new ground by linking theological ideas with political economic processes in terms of the structural relations of power Ethnographically this research investigates the theological processes of Hong Kong Chinese Christians during a period of significant social change and crisis precipitated by the return of Hong Kong to China in 1997 It shows how local Christians and Christian institutions mediated the significant regional national and transnational forces of political economic change by connecting theological practice to the structural relations of power The Christian response was a contested process closely intertwined with the broader contested processes of social organization This study develops an understanding of Christianity that goes beyond ecclesiastical hegemony to encompass struggles over human practice meaning and representation in relation to the changing political economic context These findings implicate religious ideas and practice as significant to an understanding of social inequalities and powerlessness by connecting ideologies to material conditions Christian ideas may be used to legitimize an oppressive social order or they may be used to liberate those who are oppressed Issues related to the policies and practice of development should take seriously the role of

religious beliefs and practices *State, Religion, and Revolution in Iran, 1796 to the Present* B. Moazami, 2013-11-07 Two basic assumptions have shaped understanding of recent Iranian history One is that Shi'ism is an integral part of Iran's religious and cultural landscape The other is that the ulama religious scholars have always played a crucial role This book challenges these assumptions and constructs a new synthesis of the history of state and religion in Iran from 1796 to the present while challenging existing theories of large scale political transformation Arguing that the 1979 revolution has not ended Behrooz Moazami relates political and religious transformations in Iran to the larger instability of the Middle East region and concludes that turmoil will continue until a new regional configuration evolves Critical Terms for Religious Studies Mark C. Taylor, 2013-07-09 A century that began with modernism sweeping across Europe is ending with a remarkable resurgence of religious beliefs and practices throughout the world Wherever one looks today from headlines about political turmoil in the Middle East to pop music and videos one cannot escape the pivotal role of religious beliefs and practices in shaping selves societies and cultures Following in the very successful tradition of *Critical Terms for Literary Studies* and *Critical Terms for Art History* this book attempts to provide a revitalized self-aware vocabulary with which this bewildering religious diversity can be accurately described and responsibly discussed Leading scholars working in a variety of traditions demonstrate through their incisive discussions that even our most basic terms for understanding religion are not neutral but carry specific historical and conceptual freight These essays adopt the approach that has won this book's predecessors such widespread acclaim each provides a concise history of a critical term explores the issues raised by the term and puts the term to use in an analysis of a religious work practice or event Moving across Judaism Christianity Hinduism Buddhism Islam and Native American and Mayan religions contributors explore terms ranging from experience territory and image to God sacrifice and transgression The result is an essential reference that will reshape the field of religious studies and transform the way in which religion is understood by scholars from all disciplines including anthropology sociology psychology cultural studies gender studies and literary studies *God and Caesar at the Rio Grande* Hilary Cunningham, 1995 The author offers a fascinating account of the history and growth of the Sanctuary Movement as she demonstrates how religion shapes and is shaped by political culture Focusing on the Sanctuary located in Tucson Arizona she explores the movement primarily through the experiences of everyday participants conveyed through interviews with Sanctuary workers as well as reproductions of documents from her stays in Arizona Mexico and Guatemala *Moved by Mary* Willy Jansen, 2022-03-01 The Virgin Mary continues to attract devotees to her images and shrines In *Moved by Mary* anthropologists geographers and historians explore how people and groups around the world identify and join with Mary in their struggle against social injustice and how others mobilize Mary to impose ideas and rules and legitimize acts of violence and suppression Far from an outdated practice of little relevance to the modern world Marian pilgrimage expresses the deep and urgent concerns of a wide range of people With examples of Marian pilgrimages from all over the world *Moved by Mary*

explores the ways in which men and women of different ages and religious political social economic and ethnic backgrounds empower themselves to deal with modern day issues with Mary's help The ethnographic cases reveal the cultural and devotional variation of Marian pilgrimage but also global similarities Collectively the contributors to *Moved by Mary* show how in many places religion dramatically suffuses everyday life **Intersecting Journeys** Ellen Badone, Sharon R.

Roseman, 2010-10-01 The appeal of sacred sites remains undiminished at the start of the twenty first century as unprecedented numbers of visitors travel to Lourdes Rome Jerusalem Santiago de Compostela and even Star Trek conventions Ethnographic analysis of the conflicts over resources and meanings associated with such sites as well as the sense of community they inspire provides compelling evidence re-emphasizing the links between pilgrimage and tourism As the papers in this collection demonstrate studies of these forms of journeying are at the forefront of postmodern debates about movement and centers global flows social identities and the negotiation of meanings Fictionalizing Anthropology

Stuart J. McLean, 2017-11-22 What might become of anthropology if it were to suspend its sometime claims to be a social science What if it were to turn instead to exploring its affinities with art and literature as a mode of engaged creative practice carried forward in a world heterogeneously composed of humans and other than humans Stuart McLean claims that anthropology stands to learn most from art and literature not as evidence to support explanations based on an appeal to social context or history but as modes of engagement with the materiality of expressive media including language that always retain the capacity to disrupt or exceed the human projects enacted through them At once comparative in scope and ethnographically informed *Fictionalizing Anthropology* draws on an eclectic range of sources including ancient Mesopotamian myth Norse saga literature Hesiod Lucretius Joyce Artaud and Lispector as well as film multimedia and performance art along with the concept of fabulation the making of fictions capable of intervening in and transforming reality developed in the writings of Bergson and Deleuze Sharing with proponents of anthropology's recent ontological turn McLean insists that experiments with language and form are a performative means of exploring alternative possibilities of collective existence new ways of being human and other than human and that such experiments must therefore be indispensable to anthropology's engagement with the contemporary world
