Fiona McLachlan

Rem Koolhaas Oma 30 Colours:

Collours Rem Koolhaas, 2001 The nature of colour should change no longer just a thin layer of change but something that genuinely alters perception this stipulation of Rem Koolhaas is echoed by the world famous architects and designers Alessandro Mendini and Norman Foster In this volume they present between them a total of 90 colours each covering half a page accompanied by comments on the background the significance and the applications of the colours Studies of colours from each office form the basis of this book and were previously only available in extravagant individual editions With this comprehensive and consistent presentation of the varying approaches to colour we have a compendium which shows the wide use of colour in today's technologically advanced architecture with its modern post modern and deconstructive orientation The range of examples of the colours in practice includes load bearing structures facades interior design furnishing and the entire spectrum of product design

The Colours of ... Erik Mattie, 2015-02-17 Color is inextricably linked with architecture as a design element and also as an inherent quality it characterizes the shape and texture of the built fabric The book presents extraordinary color schemes both in terms of technology and aesthetics for ground breaking architecture with a wide spectrum of functions from apartment to concert hall from flagship store to city park The focus is on the works of the three architects Frank O Gehry Jean Nouvel and Wang Shu This is expanded by the works of other practices such as BIG Zaha Hadid Herzog de Meuron Toyo Ito and SANAA This publication presents a compendium that documents color schemes in architecture in the context of very different aesthetic approaches The large format photographs by Iwan Baan Christian Richters Roland Halbe and Philippe Ruault fascinate with their clarity and presence

Architectural Colour in the Professional Palette Fiona McLachlan, 2013-08-15 How do architects use color Do they adopt a different strategy or starting point for every project Do they gradually cultivate individual color palettes which develop alongside their body of built work Do they utilize or are they aware of the body of theoretical work that underpins the use of color in the past and forms the basis of most of the color systems commercially available today Informed by the author's thirty years in architectural practice and academia this book investigates documents and analyzes the work of a number of contemporary architects in order to respond to these questions and provide a clear reference of contemporary color use The book suggests a holistic approach to the integration of color in architecture through a series of thematic essays the text explores and reveals underlying principles in color design and application Case studies include AHMM Caruso St John Erich Wiesner and Otto Steidle Gigon Guyer O'Donnell Tuomey Sauerbruch Hutton Steven Holl UN Studio The book provides clear insights into how particular contemporary architects use color confidently and intelligently as an integral part of their design philosophy in conjunction with their choices of materials and finishes Offering a stimulating view of the history of color theory and pragmatic advice to practicing architects this book will be inspiring to both design professionals and students
