Rem This Film Is On:

The Neuropsychology of Sleep and Dreaming John S. Antrobus, Mario Bertini, 2013-01-11 This volume describes how the conceptual and technical sophistication of contemporary cognitive and neuroscientific fields has enhanced the neurocognitive understanding of dreaming sleep Because it is the only naturally occurring state in which the active brain produces elaborate cognitive processes in the absence of sensory input the study of dreaming offers a unique cognitive and neurophysiological view of the production of higher cognitive processes The theory and research included is driven by the search for the most direct relationships linking the neurophysiological characteristics of sleepers to their concurrent cognitive experiences The search is organized around three sets of theoretical models and the three classes of neurocognitive relationships upon which they are based The contributions to this volume demonstrate that the field has begun to move in new directions opened up by the rapid advances in contemporary cognitive science neuropsychology and neurophysiology

From product description [Dreams on Film](#) Leslie Halpern, 2010-06-28 Films with dream sequences or a dreamlike quality allow directors to create their own rules of logic and nature to meet a variety of artistic needs For instance an opening dream immediately establishes what a character is feeling a later dream or series of them provides viewers with a glimpse of the climax and a concluding dream ties up loose ends In real life of course dreams do not occur at such convenient times or serve such useful purposes This book explores why science is lost or distorted in the process of representing dreams on film and why audiences prefer this figurative truth of art over the literal truth of science Part One discusses changes in form and considers the history of dream theory Additionally the physiology of sleeping and dreaming dream structure sleep deprivation dreams under the influence of drugs or alcohol and waking up as depicted on film are examined Part Two investigates

changes in content and delves into the psychology of sleeping and dreaming dream interpretation altered states of consciousness visions and prophecies dreams as wish fulfillment sex and death nightmares and reality versus illusion The author uses theories by Freud Jung and current experts in her analyses of dream sequences and their use in film A Study of Two Commercial Film Badge Services J.
