Remaining Relevant After Communism The Role Of The Writer In Eastern Europe:

Remaining Relevant After Communism Andrew Wachtel, 2006 *Remaining Relevant After Communism* Andrew Wachtel, 2006-02 More than any other art form literature defined Eastern Europe as a cultural and political entity in the second half of the twentieth century Although often persecuted by the state East European writers formed what was frequently recognized to be a second government and their voices were heard and revered inside and outside the borders of their countries This study by one of our most influential specialists on Eastern Europe considers the effects of the end of communism on such writers According to Andrew Baruch Wachtel the fall of the Berlin Wall and the creation of fledgling societies in Eastern Europe brought an end to the conditions that put the region's writers on a pedestal In the euphoria that accompanied democracy and free markets writers were liberated from the burden of grandiose political expectations But no group is happy to lose its influence despite recognizing that their exalted social position was related to their reputation for challenging political oppression such writers have worked hard to retain their status inventing a series of new strategies for this purpose *Remaining Relevant after Communism* considers these strategies from pulp fiction to public service documenting what has happened on the East European scene since 1989 **Modern European Borders in Fiction**

Andrew Hammond, 2025-09-18 There are few features of the contemporary world more significant than national and regional borders In modern Europe the practices of human division have defined the continent from the early years of the Cold War to the present barriers of Fortress Europe whose exposure of irregular migrants to trafficking discrimination and deportation is rarely absent from the daily news *Modern European Borders in Fiction* offers a comprehensive study of literary responses to the topic Through reference to over 600 novels and short stories Andrew Hammond analyses the wide ranging engagement of post 1945 novelists with the ideologies processes and effects of territorialisation as well as the related issues of military conflict migration populism nationalism and regionalism Among the topics under study are the ideological divisions of the Cold War the closed societies of totalitarian communism the labour migrations of the 1950s and 1960s the tightening of border controls from the 1970s the twenty first century war on migration the official restrictions on borderland communities the conflicts in Bosnia Georgia and Ukraine and the patterns of social segregation that have marked the continent from the Second World War to the present Drawing on theoretical work in the social sciences and the humanities this is a ground breaking contribution to European literary studies establishing the importance of continental border writing and opening up fresh avenues for decolonised teaching and research **Transforming Author Museums** Ulrike Spring, Johan

Schimanski, Thea Aarbakke, 2021-10-15 Literary museums today must respond to new challenges the traditional image of the author's home museum as a sacred place of literary pilgrimage centered around a national hero has been questioned and literary museums have begun to develop new strategies centered not only on biography but also literary texts imagined spaces different readers historical contexts architectural concepts and artistic interventions As this volume shows the

The Politics of Contested Narratives Ilse Lazaroms, Emily Gioielli, 2016-03-17 The twentieth century in Europe was characterized by great moments of rupture such as two world wars ideological conflict and political polarization In these processes as well as in the historical writing that followed in its wake the individual as an historical entity often appeared crushed In line with contemporary theories about the precariousness of historical writing and the self this volume seeks to understand the important developments in modern Europe from the perspective of the single sometimes isolated but always original viewpoint of individuals inhabiting the space at the other side of the traditional grand narratives Including theoretical chapters as well as detailed case studies this volume takes a biographical approach to dystopian events the Holocaust Fascism Communism and collectivization by starting with the voices of unknown historical actors and relating their experiences to larger processes in modern European history such as the emergence of the national collective memory and state formation as well as changes in the understanding of modern identities and the re formulation of the self This book was originally published as a special issue of the *European Review of History*

Twentieth-Century Russian Poetry Katharine Hodgson, Joanne Shelton, Alexandra Smith, 2017-04-21 The canon of Russian poetry has been reshaped since the fall of the Soviet Union A multi authored study of changing cultural memory and identity this revisionary work charts Russia's shifting relationship to its own literature in the face of social upheaval Literary canon and national identity are inextricably tied together the composition of a canon being the attempt to single out those literary works that best express a nation's culture This process is of course fluid and subject to significant shifts particularly at times of epochal change This volume explores changes in the canon of twentieth century Russian poetry from the 1991 collapse of the Soviet Union to the end of Putin's second term as Russian President in 2008 In the wake of major institutional changes such as the abolition of state censorship and the introduction of a market economy the way was open for wholesale reinterpretation of twentieth century poets such as Iosif Brodskii Anna Akhmatova and Osip Mandel'shtam their works and their lives In the last twenty years many critics have discussed the possibility of various coexisting canons rooted in official and non official literature and suggested replacing the term Soviet literature with a new definition Russian literature of the Soviet period Contributions to this volume explore the multiple factors involved in reshaping the canon understood as a body of literary texts given exemplary or representative status as classics Among factors which may influence the composition of the canon are educational institutions competing views of scholars and critics including figures outside Russia and the self canonising activity of poets themselves Canon revision further reflects contemporary concerns with the destabilising effects of emigration and the internet and the desire to reconnect with pre revolutionary cultural traditions through a narrative of the past which foregrounds continuity Despite persistent nostalgic yearnings in some quarters for a single canon the current situation is defiantly diverse balancing both the Soviet literary tradition and the parallel contemporaneous literary worlds of

the emigration and the underground Required reading for students teachers and lovers of Russian literature Twentieth Century Russian Poetry brings our understanding of post Soviet Russia up to date Cultural Capitalism Bradley A. Gorski,2025-03-15 Cultural Capitalism explores Russian literature s eager embrace of capitalism in the post Soviet era When the Soviet Union fell books were suddenly bought and sold as commodities Russia s first bestseller lists brought attention and prestige Even literary prizes turned to the market for legitimacy The rise of capitalism entirely transformed both the economics and the aesthetics of Russian literature By reconstructing the market s influence on everything from late Soviet paper shortages to the prose of neoimperialism Cultural Capitalism reveals Russian literature s exuberant hopes for and deep disappointments in capitalism Only a free market it was hoped could cure endemic book deficits and liberate literature from ideological constraints But as the market came to dominate literature it imposed an ideology of its own one that directed literary development for decades Through archival research original interviews and provocative readings of literary texts Bradley A Gorski immerses the reader in both the economic and aesthetic worlds of post Soviet Russian literature to reveal a cultural logic dominated by capitalism The Russian 1990s and early 2000s saw markets introduced adopted and debated at an accelerated pace all against the backdrop of a socialist past staging the polemics between capitalism and culture in high drama and sharp relief But the market forces at the center of the post Soviet transition are fundamental to cultural trends worldwide By revealing the complexities of Russia s story Cultural Capitalism mounts a critique that cuts across national borders and provides a new way of seeing culture in the post 1989 era worldwide *Reconsidering the Postmodern* Thomas Vaessens,Yra Dijk,2025-10-01 From Michel Houellebecq to Zadie Smith from Javier Mar as to Arnon Grunberg this timely study takes its reader on a tour of European literature and the critical discussion around it Despite recent declarations of postmodernism s demise contemporary literature turns out to be entangled in a discussion with postmodernism It is time to critically evaluate this legacy Twelve specialists in the national literatures sketch the outlines of the debate Turning to literature itself they find it to be searching for new values after the relativizing force of postmodernism *Centre and Periphery, Roots and Exile* Friedemann Sallis,Robin Elliott,Kenneth DeLong,2012-08-06 This book examines the impact place and displacement can have on the composition and interpretation of Western art music using as its primary objects of study the work of Istv n Anhalt 1919 2012 Gy rgy Kurt g 1926 and S ndor Veress 1907 92 Although all three composers are of Hungarian origin their careers followed radically different paths Whereas Kurt g remained in Budapest for most of his career Anhalt and Veress left the former in 1946 and immigrated to Canada and the latter in 1948 and settled in Switzerland All three composers have had an extraordinary impact in the cultural environments within which their work took place In the first section Place and Displacement contributors examine what happens when composers and their music migrate in the culturally complex world of the late twentieth century The past one hundred years produced record numbers of refugees and this fact is now beginning to resonate in the study of music As Anhalt himself forcefully asserts however not all composers

who emigrate should be understood as exiles The first chapters of this book explore some of the problems and questions surrounding this issue Essays in the second section Perspectives on Reception Analysis and Interpretation look at how performing acts of interpretation on music implies bringing the time place and identity of the musician the analyst and the teacher to bear on the object of study Like Kodály Kurtág considers his work to be naturally embedded in Hungarian culture but he is also a quintessentially European artist Much of his production he is one of the twentieth century's most prolific composers of vocal music involves the setting of Hungarian texts but in the late 1970s his cultural horizons expanded to include texts in Russian German French English and ancient Greek The book explores how musicologists divergent cultural perspectives impinge on the interpretation of this work The final section The Presence of the Past and Memory in Contemporary Music examines the impact time and memory can have on notions of place and identity in music All living art taps into the personal and collective past in one way or another The final four chapters look at various aspects of this relationship
