Miroslav Jovanovic

Remaking Europe The European Union And The Transition Economies:

Remaking Europe Jozef M. van Brabant, 1999 A watershed in efforts to integrate Europe the plans to widen the EU will inevitably conflict with forces for deepening integration Focusing on economic factors this volume explores the key questions of widening including why the negotiations are likely to be contentious for all concerned **The Political Economy of the European Social Model** Philip Whyman, Mark Baimbridge, Andrew Mullen, 2012 This book seeks to analyse the development of the European Union EU which was founded upon the principle of the free movement of capital goods services and people in 1957 Its central thesis is that from a practical and theoretical point of view such a basis is fundamentally at odds with the creation of an interventionist regime that the construction of a social Europe would require The authors argue convincingly that economically the EU does not currently possess the budget or the economic tools to pursue such a strategy politically close to none of the institutions of the EU have backed such a policy practically conservative and neo liberal forces among member states and the institutions of the EU have repeatedly thwarted any moves in this direction In reality the Single Internal Market Economic and Monetary Union enlargement the Lisbon Agenda and European Constitution projects all prioritise supply side measures and expanding the scope of the market rather than the boosting of demand and other economic intervention Consequently constructing a social Europe in the face of this would appear problematic Hence in both theory and practice the idea that there can be a social Europe vis vis neoliberalisation is a contradiction in terms This controversial book will be an educating and refreshing read for advanced students and academics involved with European politics the European Union European Economics and Economic institutions *Developments in Central and East European Politics 3* Stephen White, Judy Batt, Paul G. Lewis, 2003 *The Changing Geopolitics of Eastern Europe* Dr A H Dawson, Rick Fawn, 2013-11-05 This work covers the uncertain geopolitical situation of some countries of Central and Eastern Europe including some of those which are hoping to enter the European Union in the near future some for which entry is far off and some which may never seek or be eligible for membership *Enlargement of the European Union* Allan F. Tatham, 2009-01-01 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture history and economics has supplanted the long dominant theme of widening and deepening particularly since the Union s expansion has become primarily eastward The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives In the course of its presentation it details the actual pre accession Europeanization process and its complex history Among the key elements discussed are the following the conflict between widening and deepening and the effect on EU institutional reform institutional requirements on candidate countries pre accession criteria and negotiations administrative capacity judicial capacity and legal approximation

in accession states capacity of the EU to absorb new Member States and EC law as part of European identity Also covered are specific historical details of particular pre accession negotiations e g Greece Spain Portugal Malta and Cyprus the still inconclusive negotiations with Turkey and the Western Balkan states and political factors involved in the non accession of Norway Iceland and Switzerland Assembling powerful evidence and applying incisive analysis the author s conclusion shows that absent further and major EU institutional reform it will be difficult for an enlarging Union to continue to deliver the goods A watershed in the continuing great debate on the fulfilment of the EC Treaty s determination to foster and promote an ever closer union of the peoples of Europe this book will prove invaluable to anybody interested in the European integration project particularly lawyers academics officials and policymakers in the EU Member States **Norms and Nannies** Ronald Haly Linden,2002 As the Central and East European states seek to join the European Union and NATO they face challenging demands to adhere to specific European norms and standards In this first comprehensive analysis contributors examine how this process operates in a variety of domains including civil military relations social labor and regional relations economic and information policies and foreign policy Each author considers what norms are generated by or absent from European international organizations how they are communicated to prospective members and most important what impact they have had on the policies and actions of individual countries as well as on the region as a whole These on the ground studies provide the empirical foundation needed to support theories of norm diffusion constructivism and liberalism in international relations and comparative politics alike International Economic Integration: Integration schemes Miroslav Jovanovic,1998

Negotiating the New Europe Dimitris Papadimitriou,2018-02-06 This title was first published in 2002 Offering a new and challenging perspective on how the European Union EU sought to structure its relations with Central and Southeast Europe after the Cold War this volume draws upon key debates in both politics and international relations A historically and theoretically informed examination of the EU s engagement in Central and Eastern Europe since 1989 the book combines conceptual rigour with clear empirical analysis firmly grounding the study of the European Union s current enlargement process in established theoretical perspectives The book is written in an engaging and accessible way which will appeal to academics students and practitioners alike The Future of Europe Frances K. Scott,2001 In support of the Academy Assembly the Directorate of Libraries Dean of the Faculty produces a special bibliography of Air Force Academy library materials relevant to the current year s theme The theme for the 2001 2002 academic year is The Future of Europe Integration or Fragmentation This year s bibliography number 98 in the library s Special Bibliography Series was prepared by Frances K Scott Social Sciences Bibliographer and Reference Librarian who has prepared the annual Academy Assembly bibliography for the past ten years **The Transnational Politics of Corporate Governance Regulation** Henk Overbeek,Bastiaan van Apeldoorn,Andreas Nölke,2007-04-30 This ambitious volume explores the politics of recent changes in corporate governance regulation and the transnational forces driving the process Corporate governance has in the 1990s

become a catchphrase of the global business community The Enron collapse and other recent corporate scandals as well as growing worries in Europe about the rise of Anglo Saxon finance have made issues of corporate governance the subject of political controversies and of public debate The contributors argue that the regulation of corporate governance is an inherently political affair Given the context of the deepening globalization of the corporate world it is also increasingly a transnational phenomenon In terms of the content of regulation the book shows an increasing reliance on the application of market mechanisms and a tendency for corporations themselves to become commodities The emerging new mode of regulation is characterized by increasing informalization and by forms of private regulation These changes in content and mode are driven by transnational actors first of all the owners of internationally mobile financial capital and their functionaries such as coordination service firms as well as by key public international agencies such as the European Commission The Transnational Politics of Corporate Governance Regulation will be of interest to students and researchers of international political economy politics economics and corporate governance
