Remembering the Samsui Women Kelvin E.Y. Low, 2014-04-08 In the early twentieth century thousands of women from the Samsui area of Guangdong China migrated to Singapore during a period of economic and natural calamity leaving their families behind In their new country many found work in the construction industry with others working in households or factories where they were called hong tou jin translated literally as red head scarf after the headgear that protected them from the sun In Singapore the women have been celebrated as pioneering figures for their hard work and resilience and in China for the sacrifices they made for their families *Remembering the Samsui Women* looks at who these women really are and at how both countries have commemorated their experiences It is an illuminating study of the connection between memory and nation including the politics of what is remembered and what is forgotten *Theories of Social Remembering* Barbara Misztal, 2003-07-16 brilliant an impressive tour de force Network Why does collective memory matter How is social memory generated maintained and reproduced How do we explain changes in the content and role of collective memory Through a synthesis of old and new theories of social remembering this book provides the first comprehensive overview of the sociology of memory This rapidly expanding field explores how representations of the past are generated maintained and reproduced through texts images sites rituals and experiences The main aim of the book is to show to what extent the investigation of memory challenges sociological understandings of the formation of social identities and conflicts It illustrates the new status of memory in contemporary societies by examining the complex relationships between memory and commemoration memory and identity memory and trauma and memory and justice The book consists of six chapters with the first three devoted to conceptualising the process of remembering by analyzing memory's function status and history as well as by locating the study of memory in a broader field of social science The second part of the book directly explores and discusses theories and studies of social remembering After a short conclusion which argues that study of collective memory is an important part of any examination of contemporary society the glossary offers a concise and up to date overview of the development of relevant theoretical concepts The result is an essential text for undergraduate courses in social theory the sociology of memory and a wider audience in cultural studies history and politics **Remembering Histories of Trauma**

Gideon Mailer, 2022-03-24 *Remembering Histories of Trauma* compares and links Native American First Nation and Jewish histories of traumatic memory Using source material from both sides of the Atlantic it examines the differences between ancestral experiences of genocide and the representation of those histories in public sites in the United States Canada and Europe Challenging the ways public bodies have used those histories to frame the cultural and political identity of regions states and nations it considers the effects of those representations on internal group memory external public memory and cultural assimilation Offering new ways to understand the Native Jewish encounter by highlighting shared critiques of public historical representation Mailer seeks to transcend historical tensions between Native American studies and Holocaust studies In linking and comparing European and American contexts of historical trauma and their representation in public memory this book brings Native American studies Jewish studies early American history Holocaust studies and museum studies into conversation with each other In revealing similarities in the public representation of Indigenous genocide and the Holocaust it offers common ground for Jewish and Indigenous histories and provides a new framework to better understand the divergence between traumatic histories and the ways they are memorialized **Memory and Migration**

Julia Creet, Andreas Kitzmann, 2014-02-24 Memory plays an integral part in how individuals and societies construct their identity While memory is usually considered in the context of a stable unchanging environment this collection of essays explores the effects of immigration forced expulsions exile banishment and war on individual and collective memory The ways in which memory affects cultural representation and historical understanding across generations is examined through case studies and theoretical approaches that underscore its mutability Memory and Migration is a truly interdisciplinary book featuring the work of leading scholars from a variety of fields across the globe The essays are collaborative successfully responding to the central theme and expanding upon the findings of individual authors A groundbreaking contribution to an emerging field of study Memory and Migration provides valuable insight into the connections between memory place and displacement

The Remembering Self Ulric Neisser, Robyn Fivush, 1994-10-28 This book brings a surprisingly wide range of intellectual disciplines to bear on the self narrative and the self The same ecological cognitive approach that successfully organized Ulric Neisser's earlier volume on *The Perceived Self* now relates ideas from the experimental developmental and clinical study of memory to insights from post modernism and literature Although auto biographical remembering is an essential way of giving meaning to our lives the memories we construct are never fully consistent and often simply wrong In the first chapter Neisser considers the so called false memory syndrome in this context other contributors discuss the effects of amnesia the development of remembering in childhood the social construction of memory and its alleged self servingness and the contrast between literary and psychological models of the self Jerome Bruner Peggy Miller Alan Baddeley Kenneth Gergen and Daniel Albright are among the contributors to this unusual synthesis *Media Technology and Cultures of*
