

Remembering Anna O

Elizabeth Loentz

Remembering Anna O:

Remembering Anna O. Mikkel Borch-Jacobsen, 2014-06-11 Remembering Anna O offers a devastating examination of the very foundations of psychoanalytic theory and practice which was born with the publication of Breuer and Freud's Studies on Hysteria in 1895 Breuer described the case of Anna O a young woman afflicted with a severe hysteria whom he had cured of her symptoms by having her recount under hypnosis the traumatic events that precipitated her illness Drawing on the most recent Freud scholarship and on long secret documents Borch Jacobsen demonstrates however that Anna O Bertha Pappenheim was never cured by Breuer's talking cure and that both Breuer and Freud knowingly falsified the historical record Borch Jacobsen points out the numerous inconsistencies in Breuer's account that suggests that Anna O's symptoms were simulated to meet Breuer's theoretical expectations and that her famed reminiscences were in fact fictitious memories induced by Breuer in the course of a hypnotic treatment Nothing Happened Darcy Buerkle, 2013-12-13 Charlotte Salomon's 1917-43 fantastical autobiography Life or Theater consists of 769 sequenced gouache paintings through which the artist imagined the circumstances of the eight suicides in her family all but one of them women But Salomon's focus on suicide was not merely a familial idiosyncrasy Nothing Happened argues that the social history of early twentieth century Germany has elided an important cultural and social phenomenon by not including the story of German Jewish women and suicide This absence in social history mirrors an even larger gap in the intellectual history of deeply gendered suicide studies that have reproduced the notion of women's suicide as a rarity in history Nothing Happened is a historiographic intervention that operates in conversation and in tension with contemporary theory about trauma and the reconstruction of emotion in history

Let Me Continue to Speak the Truth Elizabeth Loentz, 2007 In her first five chapters Loentz examines how Pappenheim engaged in words and deeds with the key political social and cultural issues concerning German Jewry in the early decades of the twentieth century the status of the Yiddish language Zionism the conversion epidemic responses to the plight of Eastern European Jews and Jewish spirituality Loentz shows how in Pappenheim's unique approach to each of these issues she balanced allegiances to feminism the Jewish religion and German culture BOOK JACKET The Secret Mind of Bertha Pappenheim Gabriel Brownstein, 2024-04-16 The story of a patient who changed the world and the mystery of her illness In 1880 young Bertha Pappenheim got strangely ill she lost her ability to control her voice and her body She was treated by Sigmund Freud's mentor Josef Breuer who diagnosed her with hysteria Together Pappenheim and Breuer developed what she called the talking cure talking out memories to eliminate symptoms Freud renamed her Anna O and appropriated her ideas to form the theory of psychoanalysis All his life he told lies about her For over a century writers have argued about her illness and cure In this unusual work of science history and psychology Brownstein does more than describe the controversies surrounding this extraordinary woman He brings Pappenheim to life a brilliant feminist thinker a crusader against human trafficking and a pioneer in the hustling and heady world of nineteenth century Vienna At the same time he

tells a parallel story that is playing out in leading medical centers today about patients who suffer symptoms very much like Pappenheim's and about the doctors who are trying to cure them the story of the neuroscience of a condition now called FND

The Secret Mind of Bertha Pappenheim argues for the healing art of listening and describes the new talking cures emerging out of neuroscience today The Case and the Canon Alessandra Calanchi, Gastone Castellani, Gabriella Morisco, Giorgio Turchetti, 2011 The concept of a constant reformulation of the canon due to the notion of singularity or irreducibility of the case can be applied in both scientific and literary fields In this volume dynamics of interconnections between the case and the canon are analysed by scholars belonging to different disciplines such as physics medicine biology psychoanalysis and literature Particular attention has been given to the science of detection since the techniques of investigation are based on the scientific acquisition of evidence and often imply a scientific abductive process The book is divided into two sections Part I concentrates mainly on literary contributions and psychological issues while part II concentrates on scientific enquiries The contributions have been selected according to two main guidelines The first covers anomalies discontinuities metaphors between science and literature The second focus lies on the case in crime fiction The scientist as detective and the detective as scientist Remembering the Personal Past Bruce M. Ross, 1992-01-02 In this resonant scholarly work Bruce Ross presents an encompassing theoretical framework and overview of autobiographical memory Drawing on a wide range of ideas from academic psychology the social sciences psychoanalysis and the humanistic disciplines the author presents a stimulating and original perspective on this increasingly important topic Ross' description encompasses the full range of subjective responsiveness to personal memories both with and without awareness including real world social context and examples that can be compared with one's own experience critical assessment of psychoanalytic memory concepts with a clear distinction drawn between Freud's ideas and those of his later followers childhood memories dealt with from dual standpoints of initial origin and adult retrospection explanations of problems and dilemmas in philosophy and the human sciences that determine both what is to be counted as a memory experience and how memories can be validated and the phenomena of individual memories compared with characteristics of group determined memories and socially structured memories that persist across generations Cognizant of the rich intellectual history of the field the book also calls on the works of James Titchener Freud Piaget Baldwin Janet Bartlett Ellis Bergson Bloch Halbwachs and Merleau Ponty among others to broaden our current understanding of the experience of autobiographical memory Students and researchers from a number of disciplines concerned with the psychology of memory cognition and identity will find this volume both insightful and thought provoking New Woman Strategies Ann Heilman, 2004-09-04 Recent years have seen a renaissance of scholarly interest in the fin de siècle fiction of the New Woman *New Woman Strategies* offers a new approach to the subject by focusing on the discursive strategies and revisionist aesthetics of the genre in the writings of three of its key exponents Sarah Grand 1854-1943 Olive Schreiner 1855-1920 and Mona Caird 1854-1932 The study explores how each writer drew on

mimicked feminized and ultimately transformed traditional literary and cultural tropes and paradigms femininity allegory and mythology

Theatre in the Expanded Field Alan Read, 2013-12-05 Theatre in the Expanded Field is a fiercely original bold and daring exploration of the fields of theatre and performance studies and the received narratives and histories that underpin them Rich with interdisciplinary reference international eclectic and broad ranging in its examples it offers readers a compelling and provocative reassessment of the disciplines one that spans pre history to the present day Sixty years ago in 1962 Richard Southern wrote a remarkable book called The Seven Ages of the Theatre It was unusual in its time for taking a trans disciplinary new historical and avowedly internationalist approach to its subject nothing less than a totalizing view of its field Theatre in the Expanded Field does not attempt to mimic Southern s work but rather takes his spirit of adventure and ambition as its frame for the contemporary moment of performance and its diverse pasts Identifying seven ways of exploring the performance field from pre history to postdramatic theatre the book presents studies of both contemporary and historical works not as a chronological succession but in keeping with their coeval qualities as movements or generations of connection and interaction dissensus and interruption It does this with the same purpose as Richard Southern s original work to provide for the planning of responsive performance spaces now Illustrated throughout with line drawings Theatre in the Expanded Field is as richly rewarding as it is ambitious and expansive in it vision

Psychoanalysis and Cinema Vicky Lebeau, 2001 Lebeau examines the long and uneven history of developments in modern art science and technology that brought pychoanalysis and the cinema together towards the end of the nineteenth century She explores the subsequent encounters between the two the seductions of psychoanalysis and cinema as converging though distinct ways of talking about dream and desire image and illusion shock and sexuality Beginning with Freud s encounter with the spectacle of hysteria on display in fin de siecle Paris this study offers a detailed reading of the texts and concepts which generated the field of psychoanalytic film theory

Sites of the Unconscious Andreas Mayer, 2013-09-02 In the late nineteenth century scientists psychiatrists and medical practitioners began employing a new experimental technique for the study of neuroses hypnotism Though the efforts of the famous French neurologist Jean Martin Charcot to transform hypnosis into a laboratory science failed his Viennese translator and disciple Sigmund Freud took up the challenge and invented psychoanalysis Previous scholarship has viewed hypnosis and psychoanalysis in sharp opposition or claimed that both were ultimately grounded in the phenomenon of suggestion and thus equally flawed In this groundbreaking study Andreas Mayer reexamines the relationship between hypnosis and psychoanalysis revealing that the emergence of the familiar Freudian psychoanalytic setting cannot be understood without a detailed analysis of the sites material and social practices and controversies within the checkered scientific and medical landscape of hypnotism Sites of the Unconscious analyzes the major controversies between competing French schools of hypnotism that emerged at this time stressing their different views on the production of viable evidence and their different ways of deploying hypnosis Mayer then reconstructs in detail the reception of French hypnotism in

German speaking countries arguing that the distinctive features of Freud's psychoanalytic setting of the couch emerged out of the clinical laboratories and private consulting rooms of the practitioners of hypnosis
