Nicolas Argenti, 2019-03-21 A journey through an Aegean island community's history of massacre occupation famine and financial meltdown and its effects on culture and memory Drawing on research conducted on Chios during the sovereign debt crisis that struck Greece in 2010 Nicolas Argenti follows the lives of individuals who symbolize the transformations affecting this Aegean island As witnesses to the crisis speak of their lives however their current anxieties and frustrations are expressed in terms of past crises that have shaped the dramatic history of Chios including the German occupation in World War II and the ensuing famine the exchange of populations between Greece and Turkey of 1922-23 and the Massacres of 1822 that decimated the island at the outset of the Greek War of Independence The complex temporality that emerges in these accounts is ensconced in a cultural context of commemorative ritual ecstatic visions an annual rocket war and other embodied practices that contribute to forms of memory production that question the assumptions of the trauma discourse revealing the islanders of Chios to be active in forging their place in time in a manner that blurs the boundaries between historiography memory religion and myth A member of the Chiot diaspora Argenti makes use of unpublished correspondence from survivors of the Massacres of 1822 and their descendants and reflects on oral family histories and silences in which the

island represents an enigmatic but palpable absence As he explores the ways in which a body of memory and a cultural experience of temporality came to be dislocated and shared between two populations his return to Chios marks an encounter in which the traditional roles of ethnographer and participant come to be dispersed and intertwined **Dr. A.P.J. Abdul**

Budson, Elizabeth A. Kensinger, 2023 One of us Elizabeth had the opportunity to conduct research with a gentleman named Henry Molaison better known by his initials H M 1 who had the interior portion of his left and right temporal lobes the part of your brain next to your temples removed in 1953 because of epileptic seizures that were difficult to control From a technical standpoint the surgical procedures went fine But as he recovered the doctors and researchers soon noticed something very troubling he was unable to form any new memories He could read and talk and if you were having a brief conversation with him you would probably not notice anything amiss But family members would visit and although he knew who they were he would have no memory of them coming New doctors would introduce themselves and the next day or even the next hour he did not recall that he had met them It was then that the doctors understood that somehow the removal of those parts of the temporal lobe caused him to become completely amnesic *Remembering for the Future* J. Roth, E. Maxwell, 2017-02-13 Focused on The Holocaust in an Age of Genocide Remembering for the Future brings together the work of nearly 200 scholars from more than 30 countries and features

cutting edge scholarship across a range of disciplines amounting to the most extensive and powerful reassessment of the Holocaust ever undertaken In addition to its international scope the project emphasizes that varied disciplinary perspectives are needed to analyze and to check the genocidal forces that have made the Twentieth century so deadly Historians and ethicists psychologists and literary scholars political scientists and theologians sociologists and philosophers all of these and more bring their expertise to bear on the Holocaust and genocide Their contributions show the new discoveries that are being made and the distinctive approaches that are being developed in the study of genocide focusing both on archival and oral evidence and on the religious and cultural representation of the Holocaust Perspectives on Memory Research

Lars-Goran Nilsson,2014-03-05 First published in 1985 This conference on Perspectives on Memory Research was held at the University of Uppsala June 20 24 1977 A main purpose of it was to commemorate the birth of the University of Uppsala in 1477 This was also the purpose of more than 40 other conferences and symposia held in Uppsala during the year of 1977

Perspectives on Memory Research (PLE:Memory) Lars-Goran Nilsson,2014-05-09 Originally published in 1979 this book contains papers presented at a conference held in 1977 to celebrate the 500th anniversary of the University of Uppsala Beyond the commemoration the main reason for this conference was to get students of memory together to discuss and evaluate the memory research that had already been carried out was presently underway and to speculate about the type of research in this area that would be carried out in the future The contributors were specifically asked to concentrate on overall theoretical and metatheoretical questions at the cost of empirical problems With chapters from many of the leading experts in the field this is an opportunity to enjoy some of their early insights Magnet Memories - The Story of a Secret Series 1977-1987 Nick Goodman,Jo Bunsell,2018-03-24 The TV series that was never made and that you ve never heard of celebrates its 40th year with an exhaustive retrospective guide Growing from a child s game the bizarrely titled The Magnet Editor ran for ten years and a breathtaking 47 series In bringing the series to life Nick Goodman drew from 70s pop culture including Doctor Who and The New Avengers and shared it only with his bewildered mother and childhood friends Jo Bunsell was one such friend and soon the pair would be transported into a shared universe of preposterous and badly designed monsters and non stop adventure with their extraordinary and strangely named hero Cabin Release Goodman and Bunsell open up their archive of materials and memories and take you on a roller coaster ride into their world Magnet Memories is an episode guide a frank critical incredulous and nostalgic reflection a snapshot of childhood in the 70s and 80s and it s possibly the most wonderfully bonkers cult TV book ever published
