Jan Gossart and the Invention of Netherlandish Antiquity Marisa Bass, 2016-03-29 This is the first in depth historical study of Jan Gossart ca 1478 1532 one of the most important painters of the Renaissance in northern Europe Providing a richly illustrated narrative of the Netherlandish artist's life and art Marisa Anne Bass shows how Gossart's paintings were part of a larger cultural effort in the Netherlands to assert the region's ancient heritage as distinct from the antiquity and presumed cultural hegemony of Rome Focusing on Gossart's vibrant monumental mythological nudes the book challenges previous interpretations by arguing that

Gossart and his patrons did not slavishly imitate Italian Renaissance models but instead sought to contest the idea that the Roman past gave the Italians a monopoly on antiquity Drawing on many previously unused primary sources in Latin Dutch and French Jan Gossart and the Invention of Netherlandish Antiquity offers a fascinating new understanding of both the painter and the history of northern European art at large [A History of France](#) Joseph Bergin, 2015-06-01 Few modern countries can boast of such a lengthy history as France whose distinctive shape has been a key feature of the successive stages of European history during the past millennium This engaging narrative seamlessly weaves together the complex tale of French history since the year 1000 Bringing together political religious social and cultural developments A History of France provides an insightful and readable overview of the country's history as it moved from a dominant position within Europe with an empire stretching across the continents to one in which it was invaded and occupied by its largest neighbour Through revolution war and peace Joseph Bergin explores how the Frankland of 1000 CE has mutated into the France we know today

Visual Theology of the Huguenots Randal Carter Working, 2017-02-23 The role of architecture within the French Reformed tradition has been of recent scholarly interest seen in the work of Helene Guicharnaud Catharine Randall Andrew Spicer and others Few however have investigated in depth the relationship between Reformed theology and architectural forms In *The Visual Theology of the Huguenots* Randal Carter Working explores the roots of Reformed aesthetics set against the background of late medieval church architecture Indicating how demonstrably important the work of Serlio is in the spreading of the ideas of Vitruvius Working explains the influence of classical Roman building on French Reformed architecture He follows this with an examination of five important Huguenot architects Philibert de l'Orme Bernard Palissy Jacques Androuet du Cerceau Salomon de Brosse and Jacques Perret The distinct language of Huguenot architecture is revealed by his comparative analysis of three churches St Pierre in Geneva a medieval church overhauled by the Reformers St Gervais St Protais a Parisian Catholic church whose facade was completed by the French Reformed architect Salomon de Brosse and the temple at Charenton a structure also designed and built by de Brosse These three buildings demonstrate how the contribution of Huguenot architecture gave expression to Reformed theological ideas and helped bring about the renewal of classicism in France

[Masculinities and Representation: The Eroticized Male in Early Modern Italy and England](#) Konrad Eisenbichler, *Ornament and Monstrosity in Early Modern Art* Chris Askholt Hammeken, Maria Fabricius Hansen, 2025-10-01 Early modern art features a remarkable fascination with ornament both as decorative device and compositional strategy across artistic media and genres Interestingly the inventive elegant manifestations of ornament in the art of the period often include layers of disquieting paradoxes creating tensions monstrosities even that manifest themselves in a variety of ways In some cases dichotomies between order and chaos artificiality and nature rational logic and imaginative creativity etc may emerge Elsewhere a sense of agitation undermines structures of statuesque control or erupts into wild unruly displays of constant genesis The monstrosity of ornament is brought into play through strategies of hybridity and

metamorphosis or by the handling of scale proportion and space in ambiguous and discomfiting ways that break with the laws of physical reality An interest in strange exaggeration and curious artifice allows for such colossal ornamental attitude to thrive within early modern art **Lost Artefacts from Medieval England and France** Katherine Baker, 2022

Contemporary descriptions of objects no longer extant examined to reconstruct these lost treasures Surviving accounts of the material culture of medieval Europe including buildings boats reliquaries wall paintings textiles ivory mirror cases book bindings and much more present a tantalising glimpse of medieval life hinting at the material richness of that era However students and scholars of the period will be all too familiar with the frustration of trying to piece together a picture of the past from a handful of fragments The material turn has put art architecture and other artefacts at the forefront of historical and cultural studies and the resulting spotlight on the material culture of the past has been illuminating for researchers in many fields Nevertheless the loss of so much of the physical remnants of the Middle Ages continues to thwart our understanding of the period and much of the knowledge we often take for granted is based on a series of arbitrary survivals The twelve essays in this book draw on a wide array of sources and disciplines to explore how textual records from the chronicles of John of Worcester and Matthew Paris and inventories of monastic treasuries and noble women to Beowulf and early English riddles when combined with archaeological and art historical evidence can expand our awareness of artistic and cultural environments Touching on a broad range of issues around how we imaginatively reconstruct the medieval past and a variety of objects both precious and ephemeral this volume will be of fundamental interest to medieval scholars whatever their disciplinary field Contributors Katherine Baker Marian Bleeke Deirdre Carter Laura Cleaver Judith Collard Joshua Davies Kathryn Gerry Karl Kinsella Katherine A Rush Katherine Weikert Beth Whalley Victoria Yuskaitis
