Renault In The Thirties:

The Emergence of Modern Business Enterprise in France, 1800-1930 Michael Stephen Smith, 2006 In this magisterial study Michael Smith explains how France left behind small scale merchant capitalism for the large corporate enterprises that would eventually dominate its domestic economy and project French influence throughout the world Arguing against the long standing view that French economic and business development was crippled by missed opportunities and entrepreneurial failures Smith presents a story of considerable achievement French companies made major contributions to the Second Industrial Revolution of 1880 1930 especially in ferrous and non ferrous metallurgy electrochemicals industrial gases and motor vehicles Rejecting the notion that France took a separate route to economic modernity Smith argues that it tracked other industrial nations along a path dominated by large scale production and corporate enterprise Technological and organizational capabilities acquired by French companies prior to 1930 played a key role in the country s rapid economic recovery after World War II and its broader economic success in the second half of the twentieth century Smith also addresses the distinctive characteristics of French economic and business development including the pivotal role of the French state the pervasive influence of French financiers and the significance of labor conflict This superb account is an invaluable contribution to business history and the history of modern France Workers' Participation in Post-liberation France Adam Steinhouse, 2001-01-01 Workers Participation in Post Liberation France is a vivid portrait of French labor s failure to achieve greater industrial democracy Drawing on original archival research Adam Steinhouse recasts the traditional view of this critical period of French history demonstrating the fundamental importance of the immediate post liberation period in determining the future course of industrial relations in France He brings to life the labor disputes of the 1940s charting the interplay between industry and politicians that dealt a crushing blow to organized labor s demands for political change Steinhouse captures the rise of state intervention in the economy and plots the growth of French employers organized intransigence in the face of workers collective action which culminated in a series of actions effectively marginalizing labor s voice in the economic boom of the early 1950s Steinhouse s impressive scholarship provides an excellent case study of the French state and its efforts to balance growing worker demands for representation with the imperatives of social peace and prosperity This book makes a significant contribution to modern French political history and the development of modern industrial relations The Genera of Fishes ...: From 1881 to 1920, thirty-nine years, with the accepted type of each David Starr Jordan, 1920 *Motor Age* , 1919 **The Fastest Show on Earth** Chicane, 2015-09-03 In the quest for ultimate speed Formula One combines human drama cutting edge technological innovation and high stakes finance in a thrilling global circus watched by half a billion avid fans The Fastest Show on Earth brings the FIA Formula One World Championship vividly to life for everyone from first time race goers to avid fans wanting to delve even further into the Fastest Show on Earth Experts from within the industry share their insights into the effect that recent revolutionary changes

prominent role played by the automobile workers unions brought about the greatest working class protest in postwar Latin American history the 1969 Cordobazo Following the Cordobazo the local labor movement was one characterized by intense militancy and determined opposition to both authoritarian military governments and the Peronist trade union bureaucracy These labor wars have been mythologized as a Latin American equivalent to the French student strikes of May June 1968 and the Italian hot summer of the same period Analyzing these events in the context of recent debates on Latin American working class politics Brennan demonstrates that the pronounced militancy and even political radicalism of the Cordoban working class were due not only to Argentina s changing political culture but also to the dynamic relationship between the factory and society during those years Brennan draws on corporate archives in Argentina France and Italy as well as previously unknown union archives Readers interested in Latin American studies labor history industrial relations political science industrial sociology and international business will all find value in this important analysis of labor politics
