Monarchs Of The Sea The Great Ocean Liners:

Monarchs of the Sea Kurt Ulrich,1999-04-15 The mythology surrounding the Titanic overshadows the fact that the ship heralded a new age of transportation that forged the modern travel industry The decades that followed the saga of the Titanic are laden with the names of even greater liners the Ile du France the Normandie Queen Mary the Queen Elizabeth the S S United States and many others This stunning book presents their fascinating history in words and beautiful photos

The Titanic Eugene L. Rasor,2001-09-30 Promoted as virtually unsinkable the ultimate luxury liner the largest ship in the world the RMS Titanic sank on its maiden voyage in April 1912 taking some 1 500 people to their death Aboard the ship were the wealthy and famous as well as hundreds of immigrants seeking a new life in America The most dramatic marine disaster of modern times the Titanic tragedy captured the interest and imagination of the entire world The intensity of interest in the catastrophe has increased particularly after discovery of the wreck off the coast of Newfoundland in the mid 1980s The resulting literature is vast including both scholarly and popular sources Covering more than the published literature the book also surveys memorabilia artifacts cultural icons music film and exhibitions Divided into three sections the work opens with a historiographical survey of the literature then includes descriptive lists of more peripheral material and concludes with a bibliography of 674 entries All items covered in the historiographical survey are included in the

bibliography This useful guide will appeal to researchers both laymen and scholars interested in the Titanic **OFF SHORE** Birgit Braasch,Claudia Mueller,2020-01-01 The book highlights facets of people's experiences since the 19th century with Atlantic space and the design of their stay on board ships The contributions range from the perspective of pleasure seeking tourists who used ships as a temporary luxurious homes to the perspective of military personnel who perceived the Atlantic Passage as a transition between homeland security and potentially dangerous professional operations the risks of sea voyages even on technically sophisticated ocean liners whose interiors and services often include grand hotels in the metropolises of the late 19th and 20th century were discreetly ignored by the passengers The charm of the Atlantic and the ship unthinkable in earlier times should not be decimated in any way **Technological Transitions and System**

Innovations Frank W. Geels,2005-01-01 This important book addresses how long term and large scale shifts from one socio technical system to another come about using insights from evolutionary economics sociology of technology and innovation studies These major changes involve not just technological changes but also changes in markets regulation culture industrial networks and infrastructure The book develops a multi level perspective arguing that transitions take place through the alignment of multiple processes at three levels niche regime and landscape This perspective is illustrated by detailed historical case studies the transition from sailing ships to steamships the transition from horse and carriage to automobiles and the transition from propeller piston engine aircraft to turbojets This book will be of great interest to researchers in innovation studies evolutionary economics sociology of technology and environmental studies It will also be useful for policy
