Neurology In Practice:

Neurology in Clinical Practice Walter George Bradley, 2004 New edition completely rewritten with new chapters on endovascular surgery and mitochondrial and ion channel disorders Bradley's Neurology in Clinical Practice Robert B. Daroff, Joseph Jankovic, John C. Mazziotta, Scott L. Pomeroy, 2016 **Neurology Oral Boards Review** Eroboghene E.

Ubogu, 2007-11-05 It was 6 AM and the New Orleans Hilton lobby was dotted with young neurologists in suits wandering aimlessly many mumbling to themselves all with the eyes of a rough night on call This was the morning of my Oral Board examination Despite three years as a neurology resident additional time as a fellow and the experience of having performed probably more than 1000 neurological examinations by this time I was deathly afraid of what this day would bring The exam organizers had met with us the day before and given the overwhelming message to RELAX Certainly this is sound advice prior to any examination but the requisite for passing is knowing the material This requires preparation as well as practice An excellent first step is to use Eroboghene Ubogu's *Neurology Oral Boards Review* in the months before you begin studying for the Boards in earnest A quick read will provide an internal assessment of your strengths and weaknesses which should guide the study plan The major neurology textbooks which anyone sitting for the Boards should already have in their possession should be studied Finding a senior faculty member to quiz you is very helpful There is no substitute for finding one of your former residency supervisors or a senior colleague in your group practice to perform a simulated Oral Board session

Teleneurology in Practice Jack W. Tsao, Bart M. Demaerschalk, 2015-06-09 This title will provide an up to date review of the emerging practice of neurology telemedicine Increasingly neurology like other disciplines of medicine is implementing the technological advances and discoveries of the science of healthcare delivery to improve not only access and efficiency but outcomes and cost as well For patients in remote and underserved areas having a neurological condition means lengthy and costly travel to obtain specialist evaluation Telemedicine has the ability to deliver such care to a patient's local community Neurology telemedicine for acute stroke has already demonstrated clinical efficacy and cost effectiveness by raising the numbers of thrombolysis eligible patients who can be treated in a timely fashion More than 85% of leading US neurology departments currently use or plan to implement telemedicine within the next year The US military has a limited number of neurologists a store and forward consultation system has enabled military neurologists to deliver far forward battlefield care for service members deployed overseas The chapters in this book will review the use of telemedicine for the evaluation and treatment of patients with many common neurological conditions and will provide a practical guide for neurologists seeking to incorporate telemedicine into their daily practices *Bradley and Daroff's Neurology in Clinical Practice* Robert B.
