## **Penny Capitalists A Study Of 19th Cent:**

**The Penny Capitalists** John Benson, 1983 This work examines the virtually ignored subject of working class entrepreneurial activity during the 19th and early 20th centuries By using a wide variety of oral and other evidence the author shows that far from being destroyed by urban industrial development penny capitalism remained a widespread and vital part of working day life He shows that the survival of penny capitalism has major implications for the understanding of some of the most important issues under discussion in labour and social history *Behind the Counter* Pamela Horn, 2015-01-15 The story of the shopworkers who emerged during the Victorian and Edwardian era to cater for all clientele from behind the counters of the increasing number of shops and lavish department stores *Darts in England, 1900-39* Patrick Chaplin, 2018-09-30 Drawing on an eclectic range of primary and secondary sources Chaplin examines the development of darts in the context of English society in the early twentieth century He reveals how darts was transformed during the interwar years to become one of the most popular recreations in England not just amongst working class men and to a lesser extent working class women but even to some extent among the middle and upper classes This book assesses the social economic and cultural forces behind this transformation This work also considers the growth of the darts manufacturing industry and assesses the overall effect the growing popularity of darts had on interwar society and popular culture with particular reference to the changing culture and form of the English public house This original study will be of interest to sports historians social historians business historians sociologists and sports scientists *Against Socialist Illusion - A Radical Argument* David Selbourne, 1984-11-01 **From Physick to Pharmacology** Louise Hill Curth, 2017-05-15 *From Physick to Pharmacology* addresses the important albeit neglected history of the distribution and sale of medicinal drugs in England from the sixteenth to the twenty first century The social history of early medicine and the evolution of British retailing are two areas that have attracted considerable attention from academics in recent years That said little work has been done either by medical or business historians on the actual retailing of drugs This book merges the two themes by examining the growth in the retailing of medicinal drugs since late medieval times The six academics contributing essays include both medical and business historians who provide an informed and stimulating perspective on the subject After an introduction setting out the context of drug retailing and surveying the current literature the volume is arranged in a broadly chronological order beginning with Patrick Wallis s study of apothecaries and other medical retailers in early modern London The next chapter by Louise Hill Curth looks at the way the distribution network expanded to encompass a range of other retail outlets to sell new branded pre packaged proprietary drugs Steven King then examines various other ways in which medicines were sold in the eighteenth century with a focus on itinerant traders This is followed by pieces from Hilary Marland on the rise of chemists and druggists in the nineteenth century and Stuart Anderson on twentieth century community pharmacists The final essay by Judy Slinn examines the marketing and consumption of

prescription drugs from the middle of that century until the present day Taken together these essays provide a fascinating insight into the changes and continuities of five centuries of drug retailing in England

**Cultures of Selling** Laura Ugolini, 2018-12-07 The study of consumption and its relationship to cultural and social values has become a vibrant and important field in recent years Hitherto however relatively few detailed and full length works on this topic have been published In what will become a seminal volume this book examines retail selling in various historical contexts and locations as both an activity at once mundane and almost universal The book introduces the reader to the existing literature relevant to the subject and explores the widespread perceptions of moral ambiguity surrounding the practice of selling consumer goods ranging from concerns about the adulteration of goods to fears about sharp practice on the part of retailers and places such concerns in the context of wider societal values and ideas The ambivalence towards retail selling and sellers is also a central focus of the collection focussing on the attempts by retailers to develop selling techniques and successful practices of salesmanship and at the same time establish widely shared understandings of good retailing The book also delves into the more dubious practices of retail selling including practices on the margin of legality the issue of credit and changing attitudes towards debt Uniquely the book examines how sales techniques relate to the wider context of a whole shopping experience or shopping environment Taken as a whole this volume will provide a first port of call for students researchers and others interested in exploring consumer cultures and the cultural norms and practices involved in the sale of consumer goods in various historical periods and geographical contexts

**Men and Menswear** Laura Ugolini, 2017-03-02 Despite increasing academic interest in both the study of masculinity and the history of consumption there are still few published studies that bring together both concerns By investigating the changing nature of the retailing of menswear this book illuminates wider aspects of masculine identity as well as patterns of male consumption between the years 1880 and 1939 While previous historical studies of masculinity have focused overwhelmingly on the moral spiritual and physical characteristics associated with notions of manliness this book considers the relationship between men and activities which were widely considered to be at least potentially unmanly selling as well as buying clothes thus shedding new light on men s lives and identities in this period

**Cheap Street** Victoria Kelley, 2019-08-06 From around 1850 London s street markets grew in number and scale giving working class Londoners a site for shopping entertainment and sociability Cheap Street is the first major study of this subject analysing the street markets as a component of London s lively informal economy and providing new insights into urban and consumer geographies

**Using Computers in History** M.J. Lewis, Roger Lloyd-Jones, 2005-11-23 Using Computers in History is designed to introduce students to historical computing through practical workshop exercises With topics such as the pattern of nineteenth century emigration from the UK the performance of the American and German economies in the 1930s and the Lancashire cotton industry Lloyd Jones and Lewis explain and illustrate the possible uses of the computer for the historian Using Computers in History raises awareness of the use of

computers as an important tool for the historian provides a practical introduction to basic computer terminology includes high quality diagrams of the screen displays which should appear at each stage examines the use of spreadsheets and how to design and work with them discusses the different software packages available concentrating on Microsoft Excel 4 includes spreadsheet exercises based around a range of historical data sets explores the use of databases shows how to construct them gives guidelines for further study prompts students to apply the skills they have learnt to a number of examples

**They Worked All Their Lives** Carl Chinn,1988      **The Social Cost of Cheap Food** Sébastien Rioux,2019-09-26 The distribution of food played a considerable yet largely unrecognized role in the economic history of Victorian and Edwardian Britain In the midst of rapid urbanization and industrialization retail competition intensified and the channels by which food made it to the market became vital to the country s economic success Illustrating the pivotal importance of food distribution in Britain between 1830 and 1914 The Social Cost of Cheap Food argues that labour exploitation in the distribution system was the key to cheap food Through an analysis of labour dynamics and institutional changes in the distributive sector S bastien Rioux demonstrates that economic development and the rising living standards of the working class were premised upon the growing insecurity and chronic poverty of street sellers shop assistants and small shopkeepers Rioux reveals that food distribution far from being a passive sphere of economic activity provided a dynamic space for the reduction of food prices Positing food distribution as a core element of social and economic development under capitalism The Social Cost of Cheap Food reflects on the transformation of the labour market and its intricate connection to the history of food and society

**The Working Class in England 1875-1914** John Benson,2016-07-01 First published in 1985 Too often aspects of working class life have been treated as distinct and separate The contributors to this volume are aware of the dangers of such atomisation and have attempted to bring together a collection of studies which add to our knowledge of life in that time The examinations of family health work leisure and criminal trends form the basis of this work and suggest that the everyday lives and values of the working class were even more varied creative and complex than is generally believed This title will be of interest to students of history      **Love and Toil** Ellen Ross,1993 The feisty warm hearted mum has long figured as a symbol of the working class in Britain yet working class history has emphasized male organizations such as clubs unions or political parties Investigating a different dimension of social history Love and Toil focuses on motherhood among the London poor in the late Victorian and Edwardian years and on the cultures communities and ties with husbands and children that women created Mothers skills in managing the family budget earning income and caring for their children were critical in protecting households from the worst hardships of industrial capitalism yet poverty or the threat of it molded intimate relationships and left its imprint on personalities This book is also a case study demonstrating the larger argument that the concept of motherhood is more socially and historically constructed than biologically determined Shaky household economics pressure toward respectability the close proximity of neighbors the precariousness of infant and child life and little chance of

better lives for their children shaped the work and emotions of motherhood much more than did the biological experiences of pregnancy birth and lactation This beautifully written book embellished with Cockney slang and music hall songs addresses fascinating questions in the fields of women s studies labor history social policy and family history pub description      **Love and Toil : Motherhood in Outcast London, 1870-1918** Ellen Ross Professor of Women's Studies Ramapo College,1993-10-19 The history of the British working class has until recently been written with a focus on the workplace or on such male organizations as clubs unions or national political parties This study of mothers in London before World War I stresses the distinctiveness of their experiences from those of other classes and of the post World War I period and demonstrates the ways in which mothers and their domestic choices were essential to the survival and cultural perpetuation of the working classes      The Petite Bourgeoisie in Europe 1780-1914 Geoffrey Crossick,Heinz-Gerhard Haupt,2021-02-25 First published in 1995 Geoffrey Crossick and Heinz Gerhard Haupt provide a major overview of the social economic cultural and political development of the petite bourgeoisie in eighteenth nineteenth and early twentieth century Europe Through comparative analysis the authors examine issues such as the centrality of small enterprise to industrial change the importance of family and locality to the petit bourgeois world the search for stability and status and the associated political move to the right This title will be of interest to students of history      **Bread and Work** Matt Perry,2000-01-20 Between the world wars unemployment spread throughout the industrialised world like a disease In Bread and Work Matt Perry places this global unemployment crisis in its proper international context Focusing on Britain Europe and the United States he compares and contrasts popular attitudes and the government response toward unemployment Looking beyond statistics and economic cycles Perry investigates the human impact of unemployment He uncovers the experience of being jobless from the perspective of those who lived through it their employers and their communities He uses oral history memoirs literary accounts and newspaper articles to reveal the reality of unemployment Perry argues that the scale of the crisis has been minimised by historians who have tended to emphasise that prolonged unemployment was the problem of the distressed fringe Finally Perry argues that the lessons of the 1930s have direct relevance today since the structural problems of industrial capitalism remain inherent      **More Than Mere Amusement** Catriona M. Parratt,2001 This groundbreaking study surveys how working class women restricted by gender time and financial means as well as cultural and social tensions managed to find spheres of leisure and recreation      Islamic and European Expansion Michael Adas,1993-07-20 This volume of essays makes available the essential background information and methods for effective teaching and writing on cross cultural history The contributors some of the most distinguished writers of global and comparative history chart the advances in understanding in their fields of concentration revealing both specific findings and broad patterns that have emerged The cover image The Arrival of the Dutch at Patane from Theodore de Bry India Orientals Part VIII Frankfurt W Richteri 1607 depicts the two key phases of global history that are covered by the essays Muslim inhabitants of the town of Patane on the

Malayan peninsula warily confront a Dutch landing party whose bearing suggests that it is engaged in yet another episode in the saga of European overseas exploration and discovery The presence of the Muslims in Malaya reflects an earlier process of expansion that saw Islamic civilization spread from Spain and Morocco in the west to the Philippines in the east in the millennium between the 7th and 17th centuries The Dutch came by sea to an area on the coastal and island fringes of Asia the one zone where their warships gave them a decisive edge in this era The citizens of Patane had good reason to distrust the European intruders since the Portuguese who had preceded the Dutch had used force whenever possible to control the formerly peaceful trade in the region and often to persecute Muslim Peoples Author note Michael Adas is Abraham Voorhees Professor of History at Rutgers University New Brunswick He is currently editor of the American Historical Association's series on Global and Comparative History and co editor of the Cambridge University Press series on Studies in Comparative World History He has published numerous articles and books including most recently with Peter Stearns and Stuart Schwartz World Civilization The Global Experience 1992 and Turbulent Passage A Global History of the Twentieth Century 1993

*Artisan Entrepreneurs in Cairo and Early-Modern Capitalism (1600-1800)* Nelly Hanna, 2011-06-16 Little has been written about the economic history of Egypt prior to its incorporation into the European capitalist economy While historians have mined archives and court documents to create a picture of the commercial activities networks and infrastructure of merchants during this time few have documented a similar picture of the artisans and craftspeople Artisans outnumbered merchants and their economic weight was considerable yet details about their lives the way they carried out their work and their role or position in the economy are largely unknown Hanna seeks to redress this gap with *Artisan Entrepreneurs in Cairo and Early Modern Capitalism 1600-1800* by locating and exploring the role of artisans in the historical process Offering richly detailed portraits as well as an overview of the Ottoman Empire's economic landscape Hanna incorporates artisans into the historical development of the period portraying them in the context of their work their families and their social relations These artisans developed a variety of capitalist practices both as individuals and collectively in their guilds Responding to the demands of expanding commercial environments in Egypt and Europe artisans found ways to adapt both production techniques and the organization of production Hanna details the ways in which artisans defied the constraints of the guilds and actively engaged in the markets of Europe demonstrating how Egyptian artisan production was able to compete and survive in a landscape of growing European trade Deftly synthesizing a wide range of economic and historical theory Hanna reinvigorates the current scholarship on early Ottoman history and provides a persuasive challenge to the largely shallow perception of artisans' role in Egypt's economy

*Credit and Community* Sean O'Connell, 2009-01-22 *Credit and Community* examines the history of consumer credit and debt in working class communities Concentrating on forms of credit that were traditionally very dependent on personal relationships and social networks such as mail order catalogues and co-operatives it demonstrates how community based arrangements declined as more impersonal forms of borrowing

emerged during the twentieth century Tallymen and check traders moved into doorstep moneylending during the 1960s but in subsequent decades the loss of their best working class customers owing to increased spending power and the emergence of a broader range of credit alternatives forced them to focus on the financially excluded This sub prime market was open for exploitation by unlicensed lenders and Sean O Connell offers the first detailed historical investigation of illegal moneylending in the UK encompassing the she usurers of Edwardian Liverpool and the violent loan sharks of Blair s Britain O Connell contrasts such commercial forms of credit with formal and informal co operative alternatives such as diddlum clubs partners and mutuality clubs He provides the first history of the UK credit unions revealing the importance of Irish and Caribbean immigrant volunteers and explains the relative failure of the movement compared with Ireland Drawing on a wide range of neglected sources including the archives of consumer credit companies the records of the co operative and credit union movements and government papers Credit and Community makes a strong contribution to historical understandings of credit and debt Oral history testimony from both sides of the credit divide is used to telling effect offering key insights into the complex nature of the relationship between borrowers and lenders
