Vengeance in a Small Town George R. Nielsen,2011-02-08 One hundred years ago in 1911 two young men lost their lives one from a stab wound and the other by mob action In an attempt to explain how such violence could take place in a prosperous and forward looking community the author first examines the growth of Thorndale as a small agricultural town on the railroad and then connects Thorndales geographical setting in central Texas with its tradition of violence This particular lynching was unusual in that it took place at night thereby complicating apprehension of the members of the mob However as a result of intervention by the governor four men were arrested for the crime and three were tried The lynching was also unusual because the victim was of Mexican heritage thereby inciting the Mexican community to voice its outrage and demand justice The nature of its reaction testifies to the political awareness of the Mexican minority and also provides an insight into its perception of Anglo society

Culture and Retardation L.L. Langness,Harold G. Levine,2012-12-06 Mental retardation in the United States is currently defined as significantly subaverage general intellectual functioning existing concurrently with deficits in adaptive behavior and manifested during the development period Grossman 1977 Of the estimated six million plus mentally retarded individuals in this country fully 75 to 85% are considered to be functionally retarded Edgerton 1984 That is they are mildly retarded persons with no evident organic etiology or demonstrable brain pathology Despite the relatively recent addition of adaptive behavior as a factor in the definition of retardation 10 still remains as the essential diagnostic criterion Edgerton 1984 26 An

1 0 below 70 indicates subaverage functioning However even such an objective measure as 1 0 is problematic since a variety of data indicate quite clearly that cultural and social factors are at play in decisions about who is to be considered retarded Edgerton 1968 Kamin 1974 Langness 1982 Thus it has been known for quite some time that there is a close relationship between socio economic status and the prevalence of mild mental retardation higher socio economic groups have fewer mildly retarded persons than lower groups Hurley 1969 Similarly it is clear that ethnic minorities in the United States Blacks Mexican Americans American Indians Puerto Ricans Hawaiians and others are disproportionately represented in the retarded population Mercer 1968 Ramey et al 1978
