Pensions Labor And Individual Choice:

Pensions, Labor, and Individual Choice David A. Wise, 2008-04-15 In recent years a decline in the labor force participation of older workers has combined with rapid current and projected increases in the number of older Americans producing major policy debates over looming crises in social security and to a lesser extent in the private pension system That private system is playing an increasing role in the support of retired workers and promises to be the subject of increasing scrutiny by economists and policymakers alike Previous books on private pensions have largely neglected behavioral implications of the features of pension plans The papers in this volume developed from material presented at a recent National Bureau of Economic Research conference address two aspects of the relation between varieties of labor coverage and participation in the labor force First age at retirement may be correlated with kind of pension coverage The papers in fact provide strong evidence that individual decisions about when to retire are directly influenced by pension options Second pension plans usually impose a high cost on workers who change jobs which suggests that pension coverage reduces instances of job change **Pensions Labor and Individual Choice** quantifies these correlations and proposes a conceptual framework within which to view them

Wise, 2008-04-15 Pensions in the U S Economy is the fourth in a series on pensions from the National Bureau of Economic Research For both economists and policymakers this volume makes a valuable contribution to current research on pensions and the economics of the elderly The contributors report on retirement saving of individuals and the saving that results from corporate funding of pension plans and they examine particular aspects of the plans themselves from the employee s point of view Steven F Venti and David A Wise offer a careful analysis of who contributes to IRAs and why Benjamin M Friedman and Mark Warshawsky look at the reasons more retirement saving is not used to purchase annuities Personal saving through pension contribution is discussed by B Douglas Bernheim and John B Shoven in the context of recent government and corporate pension funding changes Michael J Boskin and John B Shoven analyze indicators of the economic well being of the elderly addressing the

problem of why a large fraction of the elderly remain poor despite a general improvement in the economic status of the group as a whole The relative merits of defined contribution versus defined benefit plans with emphasis on the risk aspects of the two types of plans for the individual are examined by Zvi Bodie Alan J Marcus and Robert C Merton In the final paper pension plans and worker turnover are the focus of the discussion by Edward P Lazear and Robert L Moore who propose pension option value rather than the commonly used accrued pension wealth as a measure of pension value *Economic Retirement Studies* Michael Victor Leonesio,1990 The Demand for Older Workers John W.
