People and Technology in the Workplace National Research Council, National Academy of Engineering, Commission on Behavioral and Social Sciences and Education, 1991-02-01 Quick introduction of new technology is essential to America's competitiveness. But the success of new systems depends on their acceptance by the people who will use them. The volume identifies factors that are critical to successful technology introduction and examines why America lags behind many other countries in this effort. Case studies document successful transitions to new systems and procedures in manufacturing, medical technology, and office automation, ranging from the Boeing Company's program to involve employees in decision making and process design to the introduction of alternative work schedules for Mayo Clinic nurses. This volume will be a practical resource for managers, researchers, faculty, and students in the fields of industry, engineering, design, human resources, labor relations, sociology, and organizational behavior. *Valuing People and Technology in the Workplace: A Competitive Advantage Framework* Hughes, Claretha, 2012-03-31 *Valuing People and Technology in the Workplace: A Competitive Advantage Framework* introduces a more proactive strategic approach to bring employees into and develop them within an organization.
