The Intrinsic Value of Nature Leena Vilkkä,1997 What is intrinsic value What is the origin of value Are people always superior to nature This book is a philosophical analysis of the human relationship to the non human world It is a pioneering study of the philosophy of nature conservation in relation to the discussion of intrinsic value Vilkkä develops a naturalistic or naturocentric theory of value that is based on ethical extensionism and pluralism Vilkkä analyzes natural values and environmental attitudes zoocentrism biocentrism and ecocentrism This book forms a taxonomy for nature having intrinsic value The theory of intrinsic value is based on naturocentric and naturogenic values The book questions the thesis of weak anthropocentrism that denies the existence of naturogenic values In Vilkkä s theory animals and nature are the origin of value She defends the existence of zoogenic and biogenic values in the non human world and discusses the possibility of ecogenic value nature as a whole having value independent of human or animal minds Vilkkä analyzes the goodness and rights of nature the problem of priorities and ecological humanism A naturocentric recommendation is that the well being of animals and nature should have priority over human values at least in some real decision contexts Ecological humanism recommends an attitude of respect for people animals and nature The book includes an extensive glossary index and bibliography **The Art of Doing Good**

Joanna Handlin Smith,2009-03-11 An unprecedented passion for saving lives swept through late Ming society giving rise to charitable institutions that transcended family class and religious boundaries Analyzing lecture transcripts administrative guidelines didactic tales and diaries Joanna Handlin Smith abandons the facile explanation that charity was a response to poverty and social unrest and examines the social and economic changes that stimulated the fervor for doing good With an eye for telling details and a finesse in weaving the voices of her subjects into her narrative Smith brings to life the hard choices that five men faced when deciding whom to help how to organize charitable distributions and how to balance their communities needs against the interests of family and self She thus shifts attention from tired questions about whether the Chinese had a tradition of charity they did to analyzing the nature of charity itself Skillfully organized and engaging The Art of Doing Good moves from discussions about moral leadership and beliefs to scrutiny of the daily operation of soup kitchens and medical dispensaries and from examining local society to generalizing about the just use of resources and the role of social networks in charitable giving Smith s work will transform our thinking about the boundaries between social classes in late imperial China and about charity in general **Traits of Good Writing, Grade 1** Mary Rosenberg,2007-06-13 Help

Tan,2018-04-26 This book offers a novel examination of socio environmental change in a nomadic pastoralist area of the eastern Tibetan plateau Drawing on long term fieldwork that underscores an ethnography of local nomadic pastoralists international development organisations and Chinese government policies the book argues that careful analysis and comparison of the different epistemologies and norms about change are vital to any critical appraisal of developments often contested on the grasslands of Eastern Tibet Tibetan nomads have developed a way of life that is dependent in multiple ways on their animals and shaped by the phenomenological experience of mobility These pastoralists have adapted to many changes in their social political and environmental contexts over time From the earliest historically recorded systems of segmentary lineage to the incorporation

first into local fiefdoms and then into the Chinese state of both Nationalist and Communist governments Tibetan pastoralists have maintained their way of life complemented by interactions with the outside world Rapid changes brought about by an intensification of interactions with the outside world call into question the sustained viability of a nomadic way of life particularly as pastoralists themselves sell their herds and settle into towns This book probes how we can more clearly understand these changes by looking specifically at one particular area of high altitude grasslands in the Tibetan Plateau
