*Arctic Alpine Ecosystems and People in a Changing Environment* Jon Børre Ørbaek, Roland Kallenborn, Ingunn Tombre, Else N. Hegseth, Stig Falk-Petersen, Alf H. Hoel, 2007-01-10 This book addresses the significant environmental changes experienced by high latitude and high altitude ecosystems at the beginning of the 21st century. Increased temperatures and precipitation reduction in sea ice and glacier ice, the increased levels of UV radiation and the long range transported contaminants in arctic and alpine regions are stress factors that challenge terrestrial and aquatic ecosystems. The large natural variation in the physical parameters of these extreme environments is a key factor in structuring the biodiversity and biotic productivity and the effect of the new stress factors can be critical for the population structures and the interaction between species. These changes may also have socio economic effects if the changes affect the bio production which form the basis for the marine and terrestrial food chains. The book is uniquely multidisciplinary and provides examples of various aspects of contemporary environmental change in arctic and alpine regions. The 21 chapters of the book are organised under the fields of Climate change and ecosystem response, Long range transport of pollutants and ecological impacts and UV radiation and biological effects, each also including aspects of the Socio economic effects of environmental change. The introductory chapter presents and explains the internal connection and integration of all chapters. The added value of these reviews and review like manuscripts from different disciplines hopefully yields new information about the integrated aspects of environmental change.

*Environmental History and Ecology of Moreton Bay* Daryl McPhee, 2017-08 The south east Queensland region is currently experiencing the most rapid urbanisation in Australia. This growth in human population, industry and infrastructure puts pressure on the unique and diverse natural environment of Moreton Bay. Much loved by locals and holiday goers, Moreton Bay is also an important biogeographic region because its coral reefs, seagrass beds, mangroves and saltmarshes provide a supportive environment for both tropical and temperate species. The bay supports a large number of species of global conservation significance including marine turtles, dugongs, dolphins, whales and migratory shorebirds which use the area for feeding or breeding. *Environmental History and Ecology of Moreton Bay* provides an interdisciplinary examination of Moreton Bay, increasing understanding of existing and emerging pressures on the region and how these may be mitigated and managed. With chapters on the bay's human uses by Aboriginal peoples and later settlers, its geology, water quality, marine habitats and animal communities and commercial and recreational fisheries, this book will be of value to students in the marine sciences.

*American Medicine*, 1918      **Wonder Foods** Lisa Haushofer, 2022-12-27 Between 1850 and 1950 experts and

entrepreneurs in Britain and the United States forged new connections between the nutrition sciences and the commercial realm through their enthusiasm for new edible consumables. The resulting food products promised wondrous solutions for what seemed to be both individual and social ills. By examining creations such as Gail Borden's meat biscuit, Benger's Food, Kellogg's health foods, and Fleischmann's yeast, Wonder Foods shows how new products dazzled with visions of modernity, efficiency, and scientific progress, even as they perpetuated exclusionary views about who deserved to eat, thrive, and live. Drawing on extensive archival research, historian Lisa Haushofer reveals that the story of modern food and nutrition was not about innocuous technological advances or superior scientific insights but rather about the powerful logic of exploitation and economization that undergirded colonial and industrial food projects. In the process, these wonder foods shaped both modern food regimes and how we think about food.

Revisiting National Security Prabhakaran Paleri, 2022-05-10. This book examines the evolving concept of national security and how human systems could be governed in an ever-turbulent and dynamic world. It takes a revised look at the concept of national security previously researched and identified by the author, based on the present context but with a futuristic appreciation of governance, primarily national but extended to global perspectives in the modern and dynamically shifting world. The book emphasises the need for governments to maximise national security for the well-being of their people. The concept of national security is taken as the key subject of national governance, which is extendable to global governance, wherein national security is not only the physical or military security alone but also the overall well-being of the people of a nation. This book explores how national security can be achieved by balancing its various elements in different terrains where the game of governance is played, in national as well as global perspective. It also presents additional findings and observations to show that the approach is transformative, redefining the key knowledge paradigms. This book is relevant for policy makers, students, researchers, and academics who wish to explore and rethink their approach towards governing the human systems whose well-being is the responsibility of governments.

**Economic, Social and Cultural Rights: A Guide for Minorities and Indigenous Peoples** Margot E.

Salomon, 2005-03-07. In recent years, increased attention has been given to economic, social, and cultural (ESC) rights internationally and to a certain degree domestically. However, not enough has been done to consider fully and systematically the economic, social, and cultural rights of minorities and indigenous peoples. This guide aims to bridge this gap. It provides an overview of ESC rights and how these can be applied to minorities and indigenous peoples. Aimed at minority and indigenous activists and those working with them, each chapter has been written by an expert on a particular right who provides practical information and advice about the best ways to advocate for securing ESC rights. The chapters cover the rights to food and water, housing, health, education, labour, and culture, and describe the legal standards, enforcement mechanisms, and guidelines for successful civil society advocacy.
