People On The Move Environmental Migrant:

People on the Move in a Changing Climate Etienne Piguet, Frank Laczko, 2013-10-17 Policymakers around the world are increasingly concerned about the likely impact of climate change and environmental degradation on the movement of people. This book takes a hard look at the existing evidence available to policymakers in different regions of the world. How much do we really know about the impact of environmental change on migration? How will different regions of the world be affected in the future? Is there evidence to show that migration can help countries adapt to environmental change? What types of research have been conducted? How reliable is the evidence? These are some of the questions considered in this book, which presents for the first time a synthesis of relevant research findings for each major region of the world. Written by regional experts, the book provides a comprehensive overview of the key findings of existing studies on the linkages between environmental change and the movement of people. More and more reports on migration and the environment are being published, but the information is often scattered between countries and within regions, and it is not always clear how much of this information is based on solid research. This book brings this evidence together for the first time, highlighting innovative studies and research gaps. In doing this, the book seeks to help decision makers draw lessons from existing studies and to identify priorities for further research. *Climate Change, Disasters and People on the Move* Aylin Yildiz Noorda, 2022-11-07 The open access publication of this book has been published with the support of the Swiss National Science Foundation. Climate change is forcing us to consider the right of people to leave their disappearing homelands and the shape this right should take. *Climate Change Disasters and People on the Move* proposes international protection as a solution, with three pillars: granting protection against return to the country of origin, non-refoulement, preventing future displacement, and facilitating safe, orderly, and regular migration in the context of disasters and climate change. Dr Aylin Yildiz Noorda uses the theories of common concern of humankind and community interests to operationalise her proposal, providing a blueprint for future claims. **The Atlas of Environmental Migration** Dina Ionesco, Daria Mokhnacheva, François Gemenne, 2016-11-25 As climate change and extreme weather events increasingly threaten traditional landscapes and livelihoods of entire communities, the need to study its impact on human migration and population displacement has never been greater. The Atlas of Environmental Migration is the first illustrated publication mapping this complex phenomenon. It clarifies terminology and concepts, draws a typology of migration related to environment and climate change, describes the multiple factors at play, explains the challenges and highlights the opportunities related to this phenomenon. Through elaborate maps, diagrams, illustrations, case studies from all over the world, based on the most updated international research findings, the Atlas guides the reader from the roots of environmental migration through to governance. In addition to the primary audience of students and scholars of environment studies, climate change, geography, and migration, it will also be of interest to researchers and students in politics, economics, and international relations departments. **Humans on the Move** Grant Dawson, Rachel

Laut,2021-12-06 As global climate change continues to alter the environment humans are moving In this context human mobility can be an empowered adaptation strategy or an unwelcome necessity for survival with a high cost Existing legal frameworks provide only a patchwork of protection for some climate change mobility scenarios In Humans on the Move Grant Dawson and Rachel Laut investigate the development of an adaptive approach to climate change mobility and explore how transformational adaptation strategies can and must be integrated with a rights based approach **Routledge**

Handbook of Environmental Displacement and Migration Robert McLeman,François Gemenne,2018-03-09 The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to environmental migration and displacement and the field has now reached a point in terms of profile complexity and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted So far such a product does not exist The Routledge Handbook of Environmental Displacement and Migration provides a state of the science review of research on how environmental variability and change influence current and future global migration patterns and in some instances trigger large scale population displacements Drawing together contributions from leading researchers in the field this compendium will become a go to guide for established and newly interested scholars for government and policymaking entities and for students and their instructors It explains theoretical conceptual and empirical developments that have been made in recent years describes their origins and connections to broader topics including migration research development studies and international public policy and law and highlights emerging areas where new and or additional research and reflection are warranted The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics and to obtain a broad reliable survey of what is presently known about the subject The Global Business Environment Janet Morrison,2023-03-09 This text challenges students to think critically about global issues that affect the business environment and provides them with a wealth of pedagogical features that help cement learning Its coverage includes the economic political social legal cultural technological and financial environments The book is truly global in coverage with case studies and examples from all over the world including Afghanistan China Sweden and Thailand It also has a strong focus on ethics responsibilities and sustainability and what this means for business organizations Janet Morrison s writing style makes difficult concepts easy to understand and its clarity makes it suitable for students with English as a second language New to this edition The theme of uncertainty in global contexts examining how best to assess and confront the challenges of uncertainties and risks in the differing dimensions of the business environment A chapter on the worldwide pandemic and the global business environment Increased coverage of FDI industrial policy and global communication New coverage relating to race relations and decolonising the curriculum 10 new cases making a total of 52 cases with all other cases fully updated A brand new decision making feature linked to some of the cases studies Energy Access and Forced Migration Owen Grafham,2019-12-06 This edited collection brings

together a selection of expert authors and draws on a wide range of case studies geographies and perspectives to explore the links between forced migration and energy access This book addresses the paucity of academic study on how energy is delivered to the millions of people currently forcibly displaced The contributions throughout assess the current energy governance regimes models of delivery and innovative solutions that are dictating how energy is and can be provided to those who have been forced to move away from their homes By bringing together author teams of practitioners academics businesses and policy makers this collection encourages interdisciplinary dialogue about the best way of approaching energy provision for the forcibly displaced This book will be of great interest to students and scholars of energy access and policy environmental justice and equity and migration and refugee studies *The Oxford Handbook of Refugee and Forced Migration Studies* Elena Fiddian-Qasmiyeh, Gil Loescher, Katy Long, Nando Sigona, 2014-06-12 Refugee and Forced Migration Studies has grown from being a concern of a relatively small number of scholars and policy researchers in the 1980s to a global field of interest with thousands of students worldwide studying displacement either from traditional disciplinary perspectives or as a core component of newer programmes across the Humanities and Social and Political Sciences Today the field encompasses both rigorous academic research which may or may not ultimately inform policy and practice as well as action research focused on advocating in favour of refugees needs and rights This authoritative Handbook critically evaluates the birth and development of Refugee and Forced Migration Studies and analyses the key contemporary and future challenges faced by academics and practitioners working with and for forcibly displaced populations around the world The 52 state of the art chapters written by leading academics practitioners and policymakers working in universities research centres think tanks NGOs and international organizations provide a comprehensive and cutting edge overview of the key intellectual political social and institutional challenges arising from mass displacement in the world today The chapters vividly illustrate the vibrant and engaging debates that characterize this rapidly expanding field of research and practice

Migration and Environmental Change in the West African Sahel Victoria van der Land, 2017-10-12 The West African Sahel is predicted to be heavily affected by climate change in the future Slow onset environmental changes such as increasing rainfall variability and rising temperature are presumed to worsen the livelihood conditions and to increase the out migration from the affected regions Based on qualitative and quantitative data from study areas in Mali and Senegal this book examines the relationship between population dynamics livelihoods and environment in the Sahel region focussing specifically on motives for migration Critiquing the assumption that environmental stress is the dominating migration driver the author demonstrates the important role of individual aspirations and social processes such as educational opportunities and the pull of urban lifestyles In doing so the book provides a more nuanced picture of the environment migration nexus arguing that slow onset environmental changes may actually be less important as drivers of migration in the Sahel than they are often depicted in the media and climate change literature This is a valuable resource for academics and students of environmental

sociology migration and development studies **Environment, Climate Change and Migration in South Asia** Amit Ranjan,Rajesh Kharat,Pallavi Deka,2023-03-31 Climate change has been fueling migration and according to some policy reports there could more than one billion climate migrants refugees across the world by 2050 In South Asia disasters environmental degradation and climate change are increasing the number of migrants every year In South Asia like other parts of the world migrants and displaced people mainly move within their respective countries but some cross the porous border At most places the migrants and displaced people face hostile situation as they are not welcome by their local host population The chapters in the book highlight the challenges and inadequacies of governments and communities in protecting the environment as well as the disproportionate effect that climate change has on the poor and marginalized groups The book also discusses the gendered experiences of climate related migrations and policy measures which need to be implemented to counter forced displacements and environment degradation along with the legal and institutional resources which could help mitigate climate change and protect climate refugees This book will be of interest to students and researchers of development studies ecology and environment migration sociology law and governance human ecology climate change and economics **Climate change, migration and rural adaptation in the Near East and North Africa region** Szaboova, L.,2023-04-18 While there are instances where individuals or households are forcibly displaced or leave because they feel a decent life is no longer possible migration is more than just a response to an unfolding crisis Under certain conditions migration can be a proactive livelihood diversification strategy that contributes to rural households capacity to adapt to changing conditions **Identifying Emerging Issues in Disaster Risk Reduction, Migration, Climate Change and Sustainable Development** Karen Sudmeier-Rieux,Manuela Fernández,Ivanna M. Penna,Michel Jaboyedoff,J.C. Gaillard,2016-08-29 The goal of this book is to explore disaster risk reduction DRR migration climate change adaptation CCA and sustainable development linkages from a number of different geographical social and natural science angles Well known scientists and practitioners present different perspectives regarding these inter linkages from around the world with theoretical discussions as well as field observations This publication contributes in particular to the discussion on the Sendai Framework for Disaster Risk Reduction SFDRR 2015 2030 and the debate about how to improve DRR including CCA policies and practices taking into account migration processes from a large perspective where both natural and social factors are crucial and mutually alloyed Some authors see the SFDRR as a positive step forward in terms of embracing a multitude of issues others doubting that the agreement will lead to much concrete action toward real action on the ground This book is a timely contribution for researchers students and policy makers in the fields of environment human geography migration disaster and climate change studies who seek a more comprehensive grasp of contemporary development issues

Climate Migration and Security Ingrid Boas, 2015-05-01 Climate migration as an image of people moving due to sea level rise and increased drought has been presented as one of the main security risks of global warming The rationale is that climate change will cause mass movements of climate refugees causing tensions and even violent conflict Through the lens of climate change politics and securitisation theory Ingrid Boas examines how and why climate migration has been presented in terms of security and reviews the political consequences of such framing exercises This study is done through a macro micro analysis and concentrates on the period of the early 2000s until the end of September 2014 The macro level analysis provides an overview of the coalitions of states that favour or oppose security framings on climate migration It shows how European states and the Small Island States have been key actors to present climate migration as a matter of security while the emerging developing countries have actively opposed such a framing The book argues that much of the division between these states alliances can be traced back to climate change politics As a next step the book delves into UK India interactions to provide an in depth analysis of these security framings and their connection with climate change politics This micro level analysis demonstrates how the UK has strategically used security framings on climate migration to persuade India to commit to binding targets to reduce their greenhouse gas emissions The book examines how and why such a strategy has emerged and most importantly to what extent it has been successful Climate Migration and Security is the first book of its kind to examine the strategic usage of security arguments on climate migration as a political tool in climate change politics Original theoretical empirical and policy related insights will provide students scholars and policy makers with the necessary tools to review the effectiveness of these framing strategies for the purpose of climate change diplomacy and delve into the wider implications of these framing strategies for the governance of climate change

On the Move Andrew Dan Selee, Valerie Lacarte, Diego Chaves-Gonzalez, Ariel G. Ruiz Soto, 2025-08-26 The Americas is a region on the move and is both the source and recipient of some of the largest migrations in the world today While much scholarship and public commentary focus on the considerable movement of people northward toward the United States most of the millions of migrants from the Americas are in fact the authors reveal staying within other countries in Latin America and the Caribbean Through a combination of engaging narratives and evidence based analysis *On the Move* tells a story of both triumph and tragedy The authors explore the complex composition of migration flows and the varied and uneven ways in which host countries in the region have responded This book takes readers beyond the typical debates on US immigration policy and represents the first comprehensive look at how countries in Latin America and the Caribbean are reacting to an unprecedented wave of people around the world who choose or are forced to move across borders

Climate, Environmental Hazards and Migration in Bangladesh Max Martin, 2017-07-20 The apocalyptic visions of climate change that are projected in the media often involve extreme weather events disasters and mass migration of poor people This book takes a critical look at this notion drawing on research in Bangladesh a country located at the heart of debates on climate change and migration This book argues that rather than leading to dramatic events climatic and environmental impacts often cause incremental changes in people's habitats and livelihoods making them migrate in search of better places and income With or without climate change climatic and environmental factors can impoverish people and drive displacement and migration especially in the global South These influences including disasters need not necessarily make people move but instead sometimes trap the poorest and the most vulnerable people in their places exposed to hazards or make them migrate to even riskier places such as crowded and flood prone urban slums This book argues that restrictions placed on people's mobility options could increase their vulnerability and favours proactive migration policies This timely contribution explains the climate hazard migration nexus in an accessible engaging language for students of geography development studies politics and environmental studies as well as humanitarian and development practitioners and policymakers
