## People And Environment:

*People and Environment* D.J. Walmsley,G.J. Lewis,2014-09-19 First published in 1994 This book comprises a second edition of Human Geography behavioural approaches first published in 1984 The first edition attempted to synthesize the massive volume of geographical literature to have appeared mainly since 1960 concerned with both how people come to know the environment in which they live and with the way in which such knowledge influences subsequent spatial behaviour As with the first edition the rationale for advantages of and shortcomings with behavioural approaches are explored at length in both substantive chapters and in a number of detailed examinations of particular aspects of life in advanced Western society

*Human Well-Being and the Natural Environment* Partha Dasgupta,2001-11-15 Dasgupta develops methods of valuation and evaluation with the aim of measuring and searching to improve the quality of our lives He focuses on the ways in which our quality of life is now known to be tied to the natural environment

People and Environment PROFESSOR OF ANATOMY AND STRUCTURAL BIOLOGY GARETH. JONES,Gareth Jones,2016-12-06 People and Physical Environment A Global Approach provides an introduction to the main areas of environmental concern for geographers environmental scientists and planners at the beginning of the twenty first century These include Pollution of the atmosphere and its impact on our climate The exploitation of the oceans Management and supply of fresh water Degradation of the land and Biodiversity and the need to maintain genetic diversity The book argues that our knowledge and understanding of the environment is now so great that we can predict with considerable accuracy where the skills of science and technology need to be focussed in order to prevent severe environmental damage from occurring Achieving successful management of the environment has become dependent upon active participation of a society prepared to pay for a high quality of life and the willingness of our elected politicians to legislate and enforce the very highest standards of environmental management This book will be essential reading for students of geography environmental studies science and land use planners and will also contribute valuable information for climatology biogeography hydrology land economy and forestry students

**The Human Impact on the Natural Environment** Andrew Goudie,2000 The book also discusses the development of ideas on global change

Handbook of Environmental Psychology and Quality of Life Research Ghazlane Fleury-Bahi, Enric Pol, Oscar Navarro, 2016-08-12

This Handbook presents a broad overview of the current research carried out in environmental psychology which puts into perspective quality of life and relationships with living spaces and shows how this original analytical framework can be used to understand different environmental and societal issues

Adopting an original approach this Handbook focuses on the links with other specialties in psychology especially social and health psychology together with other disciplines such as geography architecture sociology anthropology urbanism and engineering

Faced with the problems of society which involve the quality of life of individuals and communities it is fundamental to consider the relationships an individual has with his different living spaces

This issue of the links between quality of life and environment is becoming increasingly significant with at a local level problems resulting from different types of annoyances

such as pollution and noise while at a global level there is the central question of climate change with its harmful consequences for humans and the planet How can the impact on well being of environmental nuisances and threats for example natural risks pollution and noise be reduced How can the quality of life within daily living spaces home cities work environments be improved Why is it important to understand the psychological issues of our relationship with the global environment climatic warming ecological behaviours This Handbook is intended not only for students of various disciplines geography architecture psychology town planning etc but also for social decision makers and players who will find in it both theoretical and methodological perspectives so that psychological and environmental dimensions can be better taken into account in their working practices
