People And Property:

The People's Property? Lynn Staeheli, Donald Mitchell, 2016-05-06 The People's Property is the first book length scholarly examination of how negotiations over the ownership control and peopling of public space are central to the development of publicity citizenship and democracy in urban areas The book asks the questions Why does it matter who owns public property Who controls it Who is in it Donald Mitchell and Lynn A Staeheli answer the questions by focusing on the interplay between property in its geographical sense as a parcel of owned space and people Property rights are often defined as the right to exclude It is important therefore to understand who what individual and corporate entities governed by what kinds of regulations and restrictions owns publicly accessible property It is likewise important to understand the changing bases for excluding some people and classes of people from otherwise publicly accessible property That is to say it is important to understand how modes of access and possibilities for association in publicly accessible space vary for different individuals and different classes of people if we are to understand the role public spaces play in shaping democratic possibilities In what ways are urban public spaces the people's property and in what ways are they not What does this mean for citizenship and the constitution of an inclusive democratic polity The book develops its argument through five case studies protest in Washington DC struggles over the Plaza of Santa Fe NM homelessness and property redevelopment in San Diego CA the enclosure of public space in a mall in Syracuse NY and community gardens in New York City Though empirically focused on the US the book is of broader interests as publics in all liberal democracies are under going rapid reconsideration and transformation
