**From People's War to People's Rule** Timothy J. Lomperis, 2000-11-09 Timothy Lomperis persuasively argues the ironic point that the lessons of American involvement in Vietnam are not to be found in any analysis of the war by itself. Rather, he proposes a comparison of the Vietnam experience with seven other cases of Western intervention in communist insurgencies during the Cold War era: China, Indochina, Greece, the Philippines, Malaya, Cambodia, and Laos. Lomperis maintains that popular insurgencies are manifestations of crises in political legitimacy which occur as a result of the societal stresses caused by modernization. Therefore, he argues, any intervention in a people's war will succeed or fail depending on how it affects this crisis. The unifying theme in the cases Lomperis discusses is the power of land reform and electoral democracy to cement political legitimacy and therefore deflect revolutionary movements. Applying this theory to the ongoing Sendero Luminoso insurgency in Peru, Lomperis makes a qualified prediction of that conflict's outcome. He concludes that a global trend toward democratization has produced a new era of people's rule.

*The Human Journey* Kevin Reilly, 2012-11-10 *The Human Journey* offers a truly concise yet satisfyingly full history of the world from ancient times to the present. The book's scope, as the title implies, is the whole story of humanity in planetary context. Its themes include not only the great questions of the humanities—nature versus nurture, the history and meaning of human variation, the sources of wealth and causes of revolution—but also the major transformations in human history: agriculture, cities, iron writing, universal religions, global trade, industrialization, popular government, justice, and equality. In each conceptually rich chapter, leading historian Kevin Reilly concentrates on a single important period and theme, sustaining a focused narrative and analytical perspective. Chapter 2, for example, discusses the significance of bronze age urbanization and the advent of the Iron Age. Chapter 3 examines the meaning and significance of

the age of classical civilizations Chapter 4 explains the spread of universal religions and new technologies in the postclassical age of Eurasian integration But these examples also reveal a range of approaches to world history The first chapter is an example of current Big History the second of history as technological transformations the third of comparative history the fourth the history of connections that dominates and thus narrows so many texts Free of either a confined limiting focus or a mandatory laundry list of topics this book begins with our most important questions and searches all of our past for answers Well grounded in the latest scholarship this is not a fill in the blanks text but world history in a grand humanistic tradition
