Landscape and Culture – Cross-linguistic Perspectives Helen Bromhead, 2018-09-07 The relationship between landscape and culture seen through language is an exciting and increasingly explored area This ground breaking book contributes to the linguistic examination of both cross cultural variation and unifying elements in geographical categorization The study focuses on the contrastive lexical semantics of certain landscape words in a number of languages The aim is to show how geographical vocabulary sheds light on the culturally and historically shaped ways people see and think about the land around them Notably the study presents landscape concepts as anchored in a human centred perspective based on our cognition vision and experience in places The Natural Semantic Metalanguage NSM approach allows an analysis of meaning which is both fine grained and transparent The book is aimed first of all at scholars and students of linguistics Yet it will also be of interest to researchers in geography environmental studies anthropology cultural studies Australian Studies and Australian Aboriginal Studies because of the book s cultural take

Memory, Place and Aboriginal-Settler History Skye Krichauff, 2017-09-27 Taking the absence of Aboriginal people in South Australian settler descendants historical consciousness as a starting point Memory Place and Aboriginal Settler History combines the methodologies and theories of historical enquiry anthropology and memory studies to investigate the multitudinous and intertwined ways the colonial past is known represented and made sense of by current generations Informed by interviews and fieldwork conducted with settler and Aboriginal descendants oral histories site visits and personal experience Skye Krichauff closely examines the diverse but interconnected processes through which the past is understood and narrated Memory Place and Aboriginal Settler History demonstrates how it is possible to unsettle settler descendants consciousness of the colonial past in ways that enable a tentative connection with Aboriginal people and their experiences

Creating Sacred Places in First Century Corinth Alisha N. Paddock, 2025-06-29 This book applies spatial theories from human and cultural geography to the archaeological remains of Ancient Corinth in order to consider how sacred places could have been created in the first century Building on Philip Sheldrake s theory among others the book defines sacred place as a space with significance Significance is found in the group s spiritual history their identity and the proper behaviours required to keep the group remaining a group The book further argues that if any of these elements of place are not recognized nor upheld the group risks becoming placeless

Heartland George Main,2005 How do we imagine and engage with the agricultural heartlands of Australia In the city and the bush how do we see ourselves in relation to the farmland that nourishes us all Heartland explores the cultural and historical foundations of ecological change and disorder across the southwest slopes of New South Wales a rich and productive agricultural region Rural places are today calling everyone George Main suggests into relationships of mutual care BOOK JACKET **Archaeological Perspectives on Warfare on the Great Plains** Andrew Clark,Douglas Bamforth,2018-05-15 The Great Plains has been central to academic and popular visions of Native American warfare largely because the region's well documented violence was so central to the expansion of Euroamerican settlement However social violence has deep roots on the Plains beyond this post Contact perception and these roots have not been systematically examined through archaeology before War was part and perhaps an important part of the process of ethnogenesis that helped to define tribal societies in the region and it affected many other aspects of human lives there In Archaeological Perspectives on Warfare on the Great Plains anthropologists who study sites across the Plains critically examine regional themes of warfare from pre Contact and post Contact periods and assess how war shaped human societies of the region Contributors to this volume offer a bird's eye view of warfare on the Great Plains consider artistic evidence of the role of war in the lives of indigenous hunter gatherers on the Plains prior to and during the period of Euroamerican expansion provide archaeological discussions of fortification design and its implications and offer archaeological and other information on the larger implications of war in human history Bringing together research from across the region this volume provides unprecedented evidence of the effects of war on tribal societies Archaeological Perspectives on Warfare on the Great Plains is a valuable primer for regional warfare studies and the archaeology of the Great Plains as a whole Contributors Peter Bleed Richard R Drass David H Dye John Greer Mavis Greer Eric Hollinger Ashley Kendell James D Keyser Albert M LeBeau III Mark D Mitchell Stephen M Perkins Bryon Schroeder Douglas Scott Linea Sundstrom Susan C Vehik **Journal of the Legislative Council** New South Wales. Parliament. Legislative Council,1887 **Complexity Theory for Social Work Practice** Fiona McDermott,Kerry Brydon,Alex Haynes,Felicity Moon,2023-11-14 This textbook provides a grounding in complexity theory demonstrating how it can influence and shape social work interventions in policy management and practice as well as forming an epistemological and methodological basis for research It provides a contemporary theoretical basis for social work practice equipping social workers to work in a 21st Century world The authors argue that the history of social work demonstrates the profession's engagement with the social and structural problems of each era since its emergence 150 years ago However in the 21st Century such things as globalisation the COVID 19 pandemic and climate

change have highlighted that existing theories and practice models are insufficient to the task of working with the complicatedness of contemporary life in a fast changing world Distilling the central tenets of Complexity Theory and the notion of complex adaptive systems in partnership with pragmatism the book provides practice perspectives and guidelines which build on social work's enduring commitment to understanding the person in context The recognition that social workers require conceptual and theoretical agility to work across micro meso and macro levels remains central but the argument is made that their focus and practice must primarily be at the meso level The authorship of combined academic and practice expertise enables such perspectives to be brought to life through the theoretical and practical analysis of conceptual and real world challenges The book consists of 13 chapters organized in three sections Part I Complex Practice in a Complex World Part II Thinking Complexity in Practice Part III Thinking Complexity in Public Policy Research and Education Complexity Theory for Social Work Practice encourages social workers to think complexity and act pragmatically It is intended for final year social work students academics and researchers working in a range of disciplines primarily in the social work field but also in the areas of sociology psychology and anthropology and practitioners in policy research management and practice settings
