

Themes of Social Studies 3: People, Places, and Environments

When you hear the word **geography**, I bet your first thought is maps. But, geography is much more than maps. A simple definition of geography is the study of places and locations. Geographers study the relationships between people and their environments. They are interested in the physical properties of the Earth's surface and how humans choose to live in specific environments. Geographers are interested in the migration of people over time. While maps are part of the study of geography, geographers do much more than study places on maps.

Geographers work on communication and transportation systems. Their work is invaluable in linking cities together in networks. When you place a call on your cell phone, you can bet a geographer had something to do with the placement of the tower to connect your call with the person on the other cell phone.

Geographers use sophisticated technology and tools like Geographic Information Systems (GIS) to analyze **spatial** data or to create images. As the word sounds, spatial literally means space! Geographers assign numerical addresses called coordinates using GIS to label spaces. You may already be familiar with latitude and longitude. They are an example of how geographers use GIS. A Google Map is another example.

GIS uses satellite data and computers to produce multiple images of an area. For example, a city planner might ask the question of where is the next best place to plan to build a new park. A geographer can help him answer this question by using satellite imagery of the city and overlaying a map of the population in an area. From this information, the city planner can see the available places for a park and how many people live within walking distance to the new park site.

A geographer studies nature, land, and the Earth. Geographers study cultural or political structures. They also research the people and features of an area. As you can see, geography is much more than maps!

[Basic Written Chinese](#) Cornelius C. Kubler, 2012-03-09. This is a beginning-level course in written Chinese that employs a revolutionary new method designed to have you quickly reading and writing simple connected Chinese sentences. Along with its sister book *Basic Spoken Chinese* and their accompanying workbooks, *Basic Written Chinese* offers a complete introductory course to the written Chinese language. As a native English speaker working hard to learn Chinese characters is not enough, you have to work smart in order to learn this very different language efficiently. No matter why you've chosen to learn Chinese for business, travel, cultural studies or another goal, the Basic Chinese approach of two separate but integrated tracks in spoken and written Chinese will help you learn this language most efficiently and successfully. *Basic Written Chinese* is designed so it can be used in a class with an instructor or by independent learners working on their own. *Basic Written Chinese* systematically introduces 288 of the highest frequency characters in both their simplified and traditional forms and over 700 common words written with them in context in sentences and a variety of reading passages to help you master basic Chinese reading and writing. This method will greatly improve your abilities to read Chinese and write Chinese. The structure of each

new character is explained in detail to make the learning of characters easier and look alike characters are compared and contrasted Many lessons include character differentiation drills and some lessons include realia such as name cards street signs or email messages Each lesson introduces 6 new characters and a number of words that are written using them By dividing the learning into small tasks you maintain a sense of accomplishment rather than getting bogged down You ll experience both printed and handwritten forms of characters as well as several different printed fonts The downloadable audio features Over 6 hours of audio by several native Mandarin speakers Recordings of all reading selections Recordings of all new characters and new vocabulary Available separately Basic Written Chinese Practice Essentials is the companion workbook for Basic Written Chinese This practical guide includes a broad range of drills and exercises designed to dramatically enhance your proficiency in reading and writing Chinese While designed for use with the companion textbook it can be used together with any Chinese textbook or teaching program to hone your Chinese reading and writing language skills

Film audiences Bridgette Wessels, Peter Merrington, Matthew Hanchard, David Forrest, 2022-12-20 Reception studies have made film audiences increasingly visible while surveys track trends and policymakers gather information about audience preferences and demographics But little attention has been paid to the specific contextual relationships and interactions between films and individuals that generate and sustain audiences This monograph develops the idea of audiences as interactive and relational introducing three innovative concepts personal film journeys five types of audience formations and five geographies of film provision A major challenge of audience research is how to capture the richness of people s social and cultural engagement with film To achieve this the book uses an innovative mixed methods research and computational ontology It develops ground breaking theory and concepts and an innovative methodology based on an extensive data set derived from the under researched area of British regional film audiences
