**Without Sovereignty** Christopher Bickerton, Philip Cunliffe, Alexander Gourevitch, 2006-12-01 Written by leading scholars this volume challenges the recent trend in international relations scholarship the common antipathy to sovereignty The classical doctrine of sovereignty is widely seen as totalitarian producing external aggression and internal repression Political leaders and opinion makers throughout the world claim that the sovereign state is a barrier to efficient global governance and the protection of human rights Two central claims are advanced in this book First that the sovereign state is being undermined not by the pressures of globalization but by a diminished sense of political possibility Second it demonstrates that those who deny the relevance of sovereignty have failed to offer superior alternatives to the sovereign state Sovereignty remains the best institution to establish clear lines of political authority and accountability preserving the idea that people shape collectively their own destiny The authors claim that this positive idea of sovereignty as self determination remains integral to politics both at the domestic and international levels **Politics Without Sovereignty** will be of great interest to students and scholars of political science international relations security studies international law development and European studies **Violence and Power in the Thought of Hannah Arendt** Caroline Ashcroft, 2021-05-07 Hannah Arendt was one of the foremost political theorists of the twentieth century to wrestle with the role of violence in public life Yet remarkably despite the fact that it was perhaps the most pressing issue of her era this theme in her work has rarely been explored In **Violence and Power in the Thought of Hannah Arendt** Caroline Ashcroft deepens our understanding of Arendt's conception of the role of violence offering a critical reading of her work and using it as a provocation to think about how we might engage with contemporary ideas Arendt has generally been thought to exclude acts of violence from the political based on her supposed idealization of ancient democratic politics Ashcroft argues that Arendt has been widely misunderstood by both critics and advocates on this By examining Arendt's thought on violence in key examples of political practice such as modern Jewish politics the politics of Greece and Rome and the French and American revolutions Ashcroft reveals a more pragmatic notion of the place of violence in the political She argues that what Arendt opposes in political violence is the use of force to determine politics an idea central to modern sovereignty What Arendt criticizes is not violence as such but the misuse of violence and misunderstandings of politics which exclude participatory power altogether This work also engages with a wider set of concerns in political theory by obliging us to rethink the relations between violence and politics Arendt's work offers a way to bridge the gulf between sovereign or realist politics and nonhierarchical nonviolent participatory politics and thus

offers valuable resources for contemporary political theory

**Person-Centered Politics** Eamonn O'Higgins, 2024-04-09 What accounts for the widespread disillusionment with politics Person centered Politics suggests that politics today through its structures processes and institutions tends to presuppose and to impose a certain caricature of the human person that inhibits and frustrates a real sense of personal participation in an authentic common good of politics and society In 12 chapters that touch on fundamental themes of political philosophy Person centered Politics proposes the social and transcendent dimensions of personal existence and their application to the renewal of politics today The themes explore the commonly accepted assumptions of politics today and how a renewed understanding of the person can invigorate political discourse and action In Person centered Politics the author is in continuous dialogue with some of the major contemporary philosophers and thinkers such as Eric Voegelin David Walsh Robert Sokolowski Vaclav Havel Pierre Manent Peter Simpson and Joseph Ratzinger Benedict XVI Detailed footnotes in each chapter provide reference to further sources of enlightenment and research Person centered Politics proposes an outline for a renewed vision of politics that is centered on the truth of human existence and not a politics that distorts and suffocates the human spirit because in the words of E Voegelin the right order of the soul through philosophy furnishes the standard for the right order of society and not the other way round
