Understanding Cultural Transmission in Anthropology Roy Ellen, Stephen J. Lycett, Sarah E. Johns, 2013-08-01 The concept of cultural transmission is central to much contemporary anthropological theory since successful human reproduction through social systems is essential for effective survival and for enhancing the adaptiveness of individual humans and local populations Yet what is understood by the phrase and how it might best be studied is highly contested This book brings together contributions that reflect the current diversity of approaches from the fields of biology primatology palaeoanthropology psychology social anthropology ethnobiology and archaeology to examine social and cultural transmission from a range of perspectives and at different scales of generalization The comprehensive introduction explores some of the problems and connections Overall the book provides a timely synthesis of current accounts of cultural transmission in relation to cognitive process practical action and local socio ecological context while linking these with explanations of longer term evolutionary trajectories

Peoples of the Flute Bob Patten, 2005 Innovative techniques are introduced to solve some of the oldest archaeological mysteries of the American continents Controlled experimentation supplemented with computer modeling provides a basis for interpreting the tools behavior strategy and intent guiding early technological decisions The evidence reveals a chain of responses to environmental changes that explain the emergence and abandonment of fluting technology

compare the present and past environments of the Upper Gunnison Basin to gain insight into the setting in which Folsom groups were operating and the resources that were available to them The Folsom archaeological record indicates far greater variability in adaptive behavior than previously recognized in traditional models The Mountaineer Site shows how accounting for reduced mobility more generalized subsistence patterns and variability in tool manufacture and use allows for a richer and more accurate understanding of Folsom lifeways It will be of great interest to graduate students and archaeologists focusing on Paleoindian archaeology hunter gatherer mobility lithic technological organization and prehistoric households as well as prehistorians anthropologists and social scientists Contributors Richard J Anderson Andrew R Boehm Christy E Briles Katherine A Cross Steven D Emslie Metin I Eren Richard Gunst Kalanka Jayalath Brooke M Morgan Cathy Whitlock
