Peptide Antigens:

Peptide Antigens G. Brian Wisdom, 1994 Peptide antigens and their antibodies have been widely exploited for the measurement location and purification of oligopeptides such as peptide hormones Recently the use of peptides to mimic substructures of proteins has led to major expansion in the application of anti peptide antibodies These have been especially important in identifying the characterizing proteins which are only known by their primary structure derived from a DNA sequence Another area of recent expansion is the use of defined peptided antigens to identify and map antibodies and T cell receptors This book provides information and detailed protocols for the main techniques for exploitation of peptide antigens and anti peptide antibodies and will interest research workers in many fields

Immunological Recognition of Peptides in Medicine and Biology N. D. Zegers, W.J.A. Boersma, Eric Claassen, 1995-07-19 Immunological Recognition of Peptides in Medicine and Biology gives a state of the art overview on the use of peptides and peptide ligand interactions and the critical role they play in recognition patterns for the regulation of various biological functions A wide range of applications are discussed including some experimental preclinical ones such as epitope mapping peptide libraries and production of amino acid specific antibodies and their therapeutic use in oncology and infectious disease vaccines Each chapter also includes step by step protocols to aid in actual experiments Several alternative techniques and strategies are discussed by different authors offering the reader an opportunity to select the most favorable application for a specific biological problem

Peptides James P. Tam, Pravin T.P. Kaumaya, 2006-04-11 The Fifteen American Peptide Symposium 15APS was held in Nashville Tennessee on June 14 19 1997 This biennial meeting was jointly sponsored by the American Peptide Society and Vanderbilt University The attendance of 1

081 participants from 37 countries was lower than the two previously held Symposia However the number of participating countries was the largest Thus it was gratifying to see that this meeting retained both its international flavor and participant loyalty at a time when there are many more symposia held each year on similar subjects The scientific program thanks to the insights and efforts of the Program Committee as well as Dr Peter Schiller the President of the American Peptide Society was extraordinarily rich diverse and exciting It was comprised of 124 oral and 550 poster presentations Three prominent format changes were installed First the Symposium started on Saturday instead of Sunday Second the program opened on Saturday afternoon with a Mini symposium by the Young Investigators to give them an early start and attention Finally 40 short and definitive reports were given in two parallel sessions The expanded format permitted an unprecedented number of lectures and enabled wider participation by the attending delegates
