Perceiving, Behaving, Becoming H. Jerome Freiberg, 1999 In 1962 ASCD's *Perceiving Behaving Becoming A New Focus for Education* provided bold insights on the psychological foundation of education Some of the most compelling questions in education today were first asked in this groundbreaking work which included chapters by preeminent scholars Arthur Combs Earl Kelley Abraham Maslow and Carl Rogers Although we cannot predict what current information future generations will need to know the book's Introduction states creating schools that encourage the development of persons with adequate fully functioning personalities is the best way to contribute some degree of stability to an uncertain future Decades later in preparing *Perceiving Behaving Becoming Lessons Learned* editor H Jerome Freiberg invited distinguished scholars in the field of affective humanistic education and psychology to review these four chapters from the 1962 book to provide a context for lessons learned for future generations of educators Each author in *Lessons Learned* works with teachers administrators and schools and offers a distinct perspective on the human side of teaching and learning Their analyses raise significant issues such as whether an emphasis on academic standards ignores the education of the whole student and what schools that are committed to an environment of trust and respect look like *Lessons Learned* promises to further the cause of education that focuses on the person By understanding the evolution of our educational past says Freiberg perhaps we can shape a future that will better meet the needs of generations that come after us

Personality as an Affect-processing System Jack Block, 2002-02-01 At least since Hippocrates human beings have
been trying to describe and analyze the behavioral and cognitive consistencies now referred to as personality And in recent
decades no less than in the preceding centuries they have generated a bewildering variety of construals and constructs In
this landmark book Jack Block who has spent more than 50 years studying the many facets of personality takes a long look at
current debates and finds common ground on which to construct an integrative model Perceiving more congruence among
disparate formulations than has hitherto been appreciated he elaborates his vision of personality as an adaptive system that
enables the individual to maintain equilibrium in an environment that is both threatening and engaging Taking in and
organizing information and maintaining nondisruptive levels of anxiety while responding to outer and inner demands are the
tasks of this system which consists of a perceptual apparatus and a control apparatus operating in delicate balance After
presenting his model of personality Block discusses its intellectual history and its connections to major current alternatives
He lays out some implications for practitioners confronted by dysfunction Finally he traces the developmental origins of
personality Provocative innovative and analytical **Personality as an Affect Processing System Toward an Integrative Theory**
