Perceiving Environmental Quality Research And Applications:

Perceiving Environmental Quality Kenneth Craik, 2013-03-09 The purpose of this publication is to report on a series of research workshops which examined the place of environmental perception in a comprehensive system of indices for assessing and monitoring trends in environmental quality The specific objectives of the workshops were to 1 define the state of the art in research on perception of environmental quality and identify salient conceptual and methodological issues 2 delineate potential uses of perceived environmental quality indices PEQIs and related issues regarding ways in which PEQIs might enhance implementation revision or refinement of policy orientations 3 identify the types of research which would assess adequately the efficacy of the development and the application of PEQIs and 4 out line a realistic pragmatic research strategy that relates to potential uses and identified policy issues The workshops were supported by a grant from the National Science Foundation No GSOC75 0782 and were held during the spring and summer of 1975 in Amherst

Massachusetts and New York City Contributed chapters for this volume were commissioned with funds from the Institute for Man and Environment University of Massachusetts Scientific contributors to the understanding of environmental perception have increased substantially over the last decade along with recognition that this realm of knowledge is crucial for an informed perspective on the impact of man on the environment At the same time there exists general consensus that the field remains diffuse and uncoordinated Lowenthal 1972b

Profile and Measurement of Social Well-being Indicators for Use in the Evaluation of Water and Related Land Management Planning Patricia K. Guseman, Kathryn T. Dietrich, 1978 As a part of the continuing development of the Water Resources Assessment Methodology WRAM this report focuses on the Social Well Being SWB account as defined by the Water Resource Council's Principles and Standards An outline of SWB categories subcategories and variables as interpreted from Principles and Standards is included In addition for selected variables definitions information about measurement and suggestions for prediction are provided It is noted that although the set of variables discussed in this report assists in defining SWB the list is tentative not exhaustive and is intended for use within the framework of WRAM The particulars of each planning study and the judgment of professionals and publics will dictate omission of some variables and inclusion of others Author

Environmental Permits Donna Rona, 2012-12-06

Environmental permits enable regulatory agencies to control the disturbance and degradation of the environment caused by

man's activities Created by governments through legislation the permit processes are administered by elected officials Environmental legislation is relatively new as an independent field of the law the laws themselves are primarily a conglomeration of older legal doctrines from other fields of law modified and adapted for particular situations Landau and Rheingold 1971 Like other laws environmental laws are meant to serve and protect the rights and well being of the public However like other laws they have created confusion a proliferation of costly paperwork and some inequities Numerous statutes dealing with most aspects of pollution exist at every level of government so many in fact that they frequently conflict and overlap These statutes establish a public policy toward polluters They also empower the regulatory bodies that issue permits It would be impossible to compile a list of requirements for each type of permit Therefore this book will acquaint the reader with the common aspects of environmental permits their terminology components and application processes This book covers the permit process from initial agencies applicant contacts through application parts and procedures to application approval Special emphasis has been placed on bringing together copies of laws and lists of agencies as appendices The appendices give the reader easy access to materials that will help clarify the permit process

Environmental Design Evaluation Arnold Friedmann, Craig Zimring, Ervin Zube, 2013-12-14 As the nature of the field of environment behavior relations is interdisciplinary the collaboration of three persons of diverse professional backgrounds in writing this book is therefore not surprising This collaboration started in 1972 with the offering of a graduate seminar Environment Behavior and Design Evaluation at the University of Massachusetts Several research projects dealing with design evaluation which have been conducted at the University are also included as case studies in this book Chapter III the ELEMN study and the Visitor Center study Two of the authors have worked as part of the instructional team in the seminar and all of the authors have participated in varying degrees in the ELEMN Project The authors backgrounds in design psychology and landscape architecture suggest by example that professionals with diverse backgrounds but a common interest in environment behavior problems can indeed learn to communicate and to collaborate Since design evaluation is a new field and very little specific literature on the subject exists to date we hope this book fills a current need

Directions in Person-Environment Research and Practice (Routledge Revivals) Jack Nasar, Wolfgang F. E. Preiser, 2016-06-10 First published in 1999 this book presents a fresh and diverse set of perspectives representing key directions of research and practice in the field of environmental design research Leading researchers in various areas of person environment research such as privacy children's environment post occupancy evaluation environmental cognition environmental aesthetics crime prevention housing and environmental protection and environmental design present what they consider their best work The book argues for the value of a multi disciplinary and interdisciplinary approach to problem solving and outlines many important directions for methods research and practice

Managing Air Quality And Scenic Resources At National Parks And Wilderness Areas Robert D. Rowe, 2019-03-04 This book is an outcome of the Visual Values Workshop in 1982 It presents the ongoing research on state of

the art techniques and applications to address the human perception of changes in visual aesthetic resources and to assign psychological social and economic measures of value to visitors **Environmental Evaluation** Ervin H. Zube,1984-07-27

This book describes ways of evaluating environments based on users perceptions and experiences Toward the Integration of Theory, Methods, Research, and Utilization Gary T. Moore,Robert W. Marans,2013-03-09 This fourth volume in the Advances in Environment Behavior and Design series continues the intent of earlier volumes by exploring new directions in the multidisciplinary environment behavior EB or EBS field The series is organized around a framework of theory methods research and utilization that some say has defined the field for the past 15 years This fourth volume is devoted to chapters that explore the integration of theory quantitative and qualitative research and utilization in policy planning and architecture The authors selected for this volume exemplify the multidisciplinary character of the field they have been selected from architecture environmental psychology environmental studies housing research landscape architecture social anthropology social ecology urban design and urban planning from academe and practice and from Australia Europe and North America

HISTORY OF THE ADVANCES SERIES The idea for the series emerged in 1983 at meetings of the Board of Directors of the Environmental Design Research Association EDRA Several publishers were contacted about the possibility of an EDRA Annual Review Eliot Werner at Plenum Press expressed great interest but suggested that an Advances series would be more appropriate since publication could be tied to a less specific timetable EDRA Plenum and the editors signed a contract in June 1984 for three volumes with an open door for oral agreements between Plenum and the editors after that time Four volumes have been published Volume 1 1987 Volume 2 1989 Volume 3 1991 and the current Volume 4 each containing 10 to 12 chapters Federally Coordinated Program of Research and Development in Highway Transportation ,1980 **Design by Competition** Jack L. Nasar,1999-02-28 What meanings do buildings and places convey to the people who use and visit them Too often design competitions and signature architecture result in costly eyesores that do not work How can sponsors and clients get more meaningful results In answer to these questions Dr Nasar supported by riveting studies of competitions and Peter Eisenman s competition winning design for the Wexner Center at the Ohio State University suggests the use of pre jury evaluation PJE He shows the potential value of this approach as well as visual quality programming for many kinds of environmental design for which the client wants to convey certain desirable meanings The studies from those specific to the Wexner Center to those covering the scope of history point to an alternative method for shaping the visual form of buildings places and cities **Proceedings of the Workshop in Visibility Values, Fort Collins, Colorado, January 28-February 1, 1979** ,1979 *Environmental Psychology* Mirilia Bonnes,Gianfranco Secchiaroli,1995-06-22 This textbook provides a clear and comprehensive introduction to the rapidly expanding field of environmental psychology The authors start with a review of the history of environmental psychology highlighting its interdisciplinary nature They trace its roots in architecture ecology and geography and examine the continuing relationship of these subjects to the psychological tradition The book

then moves through key contemporary lines of research in the field contrasting models from perception and cognition such as those of Gibson and Brunswick with major social psychological approaches as represented by Lewin Barker and others. The book concludes with an analysis of the most promising areas of research and practice.

Public Places and Spaces Irwin Altman, Erwin H. Zube, 2012-12-06 This tenth volume in the series addresses an important topic of research, design and policy in the environment and behavior field. Public places and spaces include a sweeping array of settings including urban streets, plazas and squares, malls, parks and other locales and natural settings such as aquatic environments, national parks and forests and wilderness areas. The importance of public settings is highlighted by difficult questions of access control and management, unique needs and problems of different users including women, the handicapped and various ethnic groups and the dramatic re-shaping of our public environments that has occurred and will continue to occur in the foreseeable future. The wide-ranging scope of the topic of public places and spaces demands the attention of many disciplines and researchers, designers, managers and policymakers. As in previous volumes in the series, the authors in the present volume come from a variety of disciplinary backgrounds, research and design orientations and affiliations. They have backgrounds in or are affiliated with such fields as architecture, geography, landscape architecture, natural resources, psychology, sociology and urban design. Many more disciplines obviously contribute to our understanding and design of public places and spaces so that the contributors to this volume reflect only a sample of the possibilities and present state of knowledge about public settings.

Visual Research Methods in Design (Routledge Revivals) Henry Sanoff, 2016-05-20 First published in 1991, this book is about applications and issues relating to the visual environment. The content pertains to the understanding of human behaviour in the environment by recording behaviour and actions or by direct interaction with people. The author examines research and planning methods that primarily stress the visual features of the physical environment. Traditionally, environmental research has relied on verbal descriptions and perceptions of the physical environment, virtually ignoring the visual component and the potential application of the social sciences for gathering this data. Various strategies that can expand the visual information base have been explored here: diagramming, photo interviewing, photo sorting, mapping, notation, simulation, videotaping and CADD.

Becoming an Environmental Psychologist Lindsay J. McCunn, 2025-04-08 This book explores the interdisciplinary pathways that leading environmental psychologists have taken to become educators, researchers, consultants and professionals in this highly applied and growing field. Environmental psychology examines the transactions between people and the built and natural settings in which they inhabit. Despite this broad scope, few direct avenues to careers in environmental psychology exist and students must forge varied and individualized routes to becoming scholars and practitioners in this important area of study. The aim of the book is to serve as an inspiring supplemental resource for students who wish to know more about how leading thinkers established themselves as environmental psychologists. In each chapter, the author describes their inspirations, decisions about undergraduate and graduate courses

particular schools and professional connections that have made a difference to their careers in environmental psychology. Many undergraduate students are disappointed with the lack of a clear path to becoming an environmental psychologist. A strong need exists for a resource like this book for students and for others who may be looking to add to their careers to understand how to gain experience and credentials in the field in different ways. Readers may also be bolstered in their attitude about choosing a niche field like environmental psychology and decide to stick with it if they read the success stories published in this book by leading thinkers who have taken varied and atypical approaches to becoming a professional environmental psychologist. The book's chapters are organized in a manner that shows readers how one may come from many different backgrounds and integrate environmental psychology into their education or professional realm. Part I contains chapters in which authors write about how they approached environmental psychology from architecture, urban planning, and geography, while Part II includes chapters from authors who found environmental psychology via cognitive psychology, clinical practice, and neuroscience. Part III has chapters from authors writing from the health sciences and social ecology, while Part IV contains chapters by authors inspired to become environmental psychologists through a general appreciation of nature and eco-conscious living in a variety of settings. Those who find a way to make environmental psychology part of their career are often very passionate individuals who are keen to describe their pathway to doing what they love with the hope that others will follow. This book is likely to advance that outcome. Landscape Meanings and Values Edmund C.

Penning-Roswell, David Lowenthal, 2022-03-14. First published in 1986. Landscape Meanings and Values presents a major contribution to the debate concerning the relationship between theory and practice in landscape analysis and planning. It brings together a number of the most eminent researchers, commentators, and practitioners from both the United States of America and Britain to pursue the fundamental meanings and values in landscape. The insights into the theory behind landscape management will force a fundamental rethink of the role of landscape architect and land management. Academic researchers will find the feedback from eminent practitioners a stimulation for more practical research. The collection of ideas in the last chapter provides a unique synthesis of the need for an expansion of study into the fundamental significance of landscape today. This book will be of value to students of geography, environmental studies, landscape architecture, and land management.

Perceiving Environmental Quality Research And Applications: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
