Hackett, 2016-12-26 This book deals with philosophical aspects regarding the perception of spatial relationships in two and three dimensional art It provides a

structural understanding of how art is perceived within the space created by the artwork and employs a mapping sentence and partial order mereology to model perceptual structure It reviews the writing of philosophers such as Paul Crowther and art theorists such as Krauss to establish the need for this research The ontological model established Paul Crowther is used to guide an interactive account of his ontology in the interpretations of the perceptual process of three dimensional abstract art to allow the formulation of a more comprehensive philosophical account The book uniquely combines structuralist and post structuralist approaches to artistic perception and understanding with a conceptual structure from facet theory which is clarified with the help of a mapping sentence and partial order mereology      **Art and Visual Perception** Rudolf

indeterminacy of meaning and a similar challenge to representation but also a shared focus on the habits and modulations of sensory perception and a similar interrogation of the boundary between art and that which surrounds it The author applies the categories discussed to art practice in particular to the theatre of Peter Handke Samuel Beckett and Heiner Müller
