Pope Urban II The Collectio Britannica And The Council Of Melfi 1089:

Collectio Britannica Robert Somerville, Stephan Kuttner, 1996 The reign of Pope Urban II 1088 1099 is often seen as a turning point in the period of medieval history known as the Gregorian Reform This volume presents for the first time modern editions of and commentary on the decrees of Urban's first papal council at Melfi in 1089 and the excerpts of his acts found in the enigmatic canon law book labeled the Collectio Britannica Both editions are accompanied by English translations of the Latin texts These two sets of texts make up a substantial proportion of the known documents produced by Pope Urban's chancery in the first year and a half of his pontificate a time of particular tension in the medieval Church This volume thus provides a hitherto unavailable critical basis for evaluating the early period of his reign as well as a new assessment of the preservation and diffusion of his acts and of the Britannica

Pope Urban II Robert Somerville, 1996 **Pope Urban II's Council of Piacenza** Robert Somerville, 2011-10-27 The Council of Piacenza is among the most important moments of the Reform that was sweeping through the Western Church at the end of the eleventh century It is often regarded as a launching pad for the First Crusade though the matter is obscure and serves only to hide the assembly's true significance as a turning point in the papal schism between Popes Gregory VII Urban II and the so-called anti-pope Clement III The canons promulgated at Piacenza became landmarks not only for the eleventh and twelfth century Reform but more broadly for the Church of the High Middle Ages and even beyond Robert Somerville situates Piacenza in historical context discusses the sources the attendance and the need for a new edition of the legislation The official canons are lost but several dozen twelfth century manuscripts were consulted for a new edition of these provisions The account finishes with a commentary on Piacenza's legislation and a discussion of the subsequent legislation of Urban II's synods Somerville completes the picture of what can be known about the papal synods of one of the most influential Roman pontiffs of the Middle Ages

Bishops, Texts and the Use of Canon Law around 1100 Bruce C. Brasington, 2017-05-15 The essays in this volume in honour of Martin Brett address issues relating to the compilation and transmission of canon law collections the role of bishops in their dissemination as well as the interpretation and use of law in the eleventh and twelfth centuries The studies are grouped thematically under the headings Bishops and Their Texts and Texts and the Use of Canon Law These reflect important areas of contention in the historiographical literature and hence will further the debates regarding not simply the compilation and dissemination of canonical collections in the earlier middle ages but also the development of the practical application of canon law within Europe especially after c 1080 Individually the contributors offer new viewpoints on key issues and questions relating to the creation of canonical texts their transmission and use on both sides of the English Channel in the decades either side of the year 1100 Collectively the essays explore the methods and motives of compilers assess the use of law find readers both in the compilation of texts and within their margins and perhaps most importantly speculate where possible about the living communities in which these texts were compiled copied and used

Reform and Renewal in the

Middle Ages and the Renaissance, 2022-04-19 Reform is one of the most significant themes spiritual and intellectual of the Middle Ages and it has both institutional and individual dimensions The Reformation crisis led to further variations on this crucial theme This volume examines the theme of Reform from a variety of viewpoints while covering more than four centuries Some contributions look at Apocalyptic dimensions in writings on reform Another focuses on the influence of Gerhart Ladner on the study of reforming themes and reform movements These articles will be useful for the study of intellectual history ecclesiastical history the history of spirituality and the study of Apocalypticism Contributors include Gregory S Beirich Christopher M Bellitto Gerald Christianson Thomas C Giangreco William V Hudon Lawrence F Hundersmarck Thomas M Izbicki Daniel Marcel La Corte Thomas E Morrissey Francis Oakley Joseph F O Callaghan Gilbert Ouy Robert Somerville Phillip H Stump and Morimichi Watanabe Publications by Louis B Pascoe S J Jean Gerson Principles of Church Reform ISBN 978 90 04 03645 1 Out of print Church and Reform Bishops Theologians and Canon Lawyers in the Thought of Pierre d Ailly 1351 1420 ISBN 978 90 04 14062 2 **Papal Letters in the Early Middle Ages** Detlev Jasper, Horst Fuhrmann, 2001 An examination of the transmission and spread of papal documents in the Latin West between the 4th and 9th centuries These documents which were collected from the 5th century onwards became the basis of canon law The second part of the volume discusses the prevalence of forged decrees which were attributed to the earliest popes

A Companion to the Eucharist in the Middle Ages Ian Levy, Gary Macy, Kristen Van Ausdall, 2011-10-28 This volume presents the medieval Eucharist in all its glory combining introductory essays on the liturgy art theology architecture devotion and theology from the early high and late medieval periods Clerical Continence in Twelfth-Century England and Byzantium Maroula Perisanidi, 2018-07-06 Why did the medieval West condemn clerical marriage as an abomination while the Byzantine Church affirmed its sanctifying nature This book brings together ecclesiastical legal social and cultural history in order to examine how Byzantine and Western medieval ecclesiastics made sense of their different rules of clerical continence Western ecclesiastics condemned clerical marriage for three key reasons married clerics could alienate ecclesiastical property for the sake of their families they could secure careers in the Church for their sons restricting ecclesiastical positions and lands to specific families and they could pollute the sacred by officiating after having had sex with their wives A comparative study shows that these offending risk factors were absent in twelfth century Byzantium clerics below the episcopate did not have enough access to ecclesiastical resources to put the Church at financial risk clerical dynasties were understood within a wider frame of valued friendship networks and sex within clerical marriage was never called impure in canon law as there was little drive to use pollution discourses to separate clergy and laity These facts are symptomatic of a much wider difference between West and East impinging on ideas about social order moral authority and reform **Shaping Church Law Around the Year 1000** Greta Austin, 2017-05-15 This study of Burchard's Decretum a popular book of Catholic canon law compiled just after the year 1000 sheds new light on the development of law and theology

long before the Gregorian Reform normally considered as a watershed in the history of the Latin Church Practical episcopal concerns and an appreciation of new scholarly methods led Burchard to be dissatisfied with the quality of contemporary jurisprudence and particularly with the teaching texts available to local bishops Drawing upon new manuscript discoveries the author shows how Burchard tried to create a new text that would address these problems He carefully selected and compiled canons from earlier collections and then went on to tamper systematically with the texts he had chosen By doing so he created a book of church law that appeared to be based on indisputable authority that was internally consistent and that was easy to apply through logical extrapolation to new cases The present study thus provides a window into the development of legal and theological reasoning in the medieval West and suggests that thanks to the work of ambitious bishops the flowering of law and theology began far earlier and for different reasons than scholars have heretofore supposed Bishops, Authority and Community in Northwestern Europe, c.1050-1150 John S. Ott, 2015-12 This important study of episcopal office and clerical identity in a socially and culturally dynamic region of medieval Europe examines the construction and representation of episcopal power and authority in the archdiocese of Reims during the sometimes turbulent century between 1050 and 1150 Drawing on a wide range of diplomatic hagiographical epistolary and other narrative sources John S Ott considers how bishops conceived of and projected their authority collectively and individually In examining episcopal professional identities and notions of office he explores how prelates used textual production and their physical landscapes to craft historical narratives and consolidate local and regional memories around ideals that established themselves as not only religious authorities but also cultural arbiters This study reveals that far from being reactive and hostile to cultural and religious change bishops regularly grappled with and sought to affect positively and to their advantage new and emerging cultural and religious norms
