[Historical Dictionary of French Literature](#) John Flower, 2013-01-17 Almost all of us know French literature even if we don t know French because it is probably the second largest and certainly the most translated into English And even if we don t read we would have seen film

and television versions think Count of Monte Cristo and even a musical rendition Les Mis So this is a particularly interesting volume in the literature series since it covers French literature from the earliest times to the present It is also a particularly rich literature espousing every genre from poetry to novel to biography to drama and adopting every style including realism and surrealism and expressing the views of all classes and political stands with recently strong feminist and gay strains Obviously the core dictionary section includes among its panoply of often substantial and detailed entries hundreds of authors dozens of significant works the various styles mentioned above and many others events that have impacted literature such as the Dreyfus Affair and the Algerian War and literary prizes The chronology manages to cover about 1 200 years of literary output And the introduction sets it all out neatly from one historical and literary period to the next The bibliography broken down by period and author directs us to further reading in both French and English

The French Generation of 1820 Alan Barrie Spitzer, 2014-07-14 Alan Spitzer approaches the history of the French Restoration by examining the experience of a particular age group born between 1792 and 1803 the generation of 1820 A predominantly male middle class educated minority of this group was perceived as representing all that was most promising and specifically youthful in the period Their response to the pressures of transition was expressed in the fractious behavior of the youth of the schools and in voluntary associations masonic lodges conspiratorial cells and influential journals which depended on a dense network of personal relationships Professor Spitzer portrays these connections in a set of sociograms using new techniques for the visual representation of social networks Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Bourgeois Epoch Richard F. Hamilton, 2017-10-06 Richard Hamilton provides an in depth critique of the writings of Karl Marx and Friedrich Engels on Britain France and Germany Hamilton contends that the validity of their principal historical claims has been assumed more often than investigated and he reviews the logic of their historical arguments citing relevant sources that challenge many of the assertions they used to build their theory of inexorable historical change Although Marx emphasized the need for systematic empirical research into historical events he and Engels in fact relied on impressionistic evidence to support their claims of how fault lines were forming in capitalist society Marxist theory Hamilton concludes is poorly supported in the historical analysis supplied by its original formulators In showing that the historical record points to alternative readings of the course of social economic and

political development in Western society Hamilton argues that class boundaries tend to be fluid and that major change is more often than not the product of evolutionary rather than revolutionary forces Originally published in 1991 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

Loss in French Romantic Art, Literature, and Politics Jonathan P. Ribner, 2021-09-30 An interdisciplinary examination of nineteenth century French art pertaining to religion exile and the nation's demise as a world power this study concerns the consequences for visual culture of a series of national crises from the assault on Catholicism and the flight of migrants during the Revolution of 1789 to the collapse of the Empire and the dashing of hope raised by the Revolution of 1830 The central claim is that imaginative response to these politically charged experiences of loss constitutes a major shaping force in French Romantic art and that pursuit of this theme in light of parallel developments in literature and political debate reveals a pattern of disenchantment transmuted into cultural capital Focusing on imagery that spoke to loss through visual and verbal idioms particular to France in the aftermath of the Revolution and Empire the book illuminates canonical works by major figures such as Eugène Delacroix Théodore Chassériau and Camille Corot as well as long forgotten images freighted with significance for nineteenth century viewers A study in national bereavement an urgent theme in the present moment the book provides a new lens through which to view the coincidence of imagination and strife at the heart of French Romanticism The book will be of interest to scholars working in art history French literature French history French politics and religious studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
