Popular Defense Ecological Strug:

Nongovernmental Organizations in Environmental Struggles Raymond L. Bryant, 2008-10-01 Why are nongovernmental organizations NGOs so successful in today's world How do they empower themselves This insightful book provides important new perspectives on the strategic thinking of NGOs the way they identify themselves and how they behave Raymond L Bryant develops a novel theoretical perspective around the concept of moral capital and assesses that concept through in depth case studies of NGOs in the Philippines The book's focus is on perceptions of NGOs as moral and altruistic and how such perceptions can translate into social power Bryant examines the ambiguous qualities of NGO strategizing the ways in which the quest for moral capital is bedeviled by the need to compromise with political and economic elites and the possibilities for NGOs to achieve political goals as moral leaders Pure War Paul Virilio, Sylvère Lotringer, 1997 In this dazzling dialogue with Sylvère Lotringer Paul Virilio for the first time displayed the whole range of his reflections on the effect of speed on our civilization every one of which has been dramatically confirmed over the years since this book's publication El Mundo Actual Cegada Por la Luz: la Izquierda en la Trascion de Sudafrica Hein Marais, 2000

Environmental Transitions Petr Pavlínek, John Pickles, 2002-09-26 Environmental Transitions is a detailed and comprehensive account of the environmental changes in Central and Eastern Europe both under state socialism and during the period of transition to capitalism The change in politics in the late 1980s and early 1990s allowed an opportunity for a rapid environmental clean up in an area once considered one of the most environmentally devastated regions on earth The book illustrates how transformations after 1989 have brought major environmental improvements as well as new environmental problems It shows how environmental policy economic change and popular support for environmental movements have specific and changing geographies associated with them Environmental Transitions addresses a large number of topics including the historical geographical analysis of the environmental change health impacts of environmental degradation the role of environmental issues during the anti communist revolutions legislative reform and the effects of transition on environmental quality after 1989 Environmental Transitions contains detailed case studies from the region which illustrate the complexity of environmental issues and their intimate relationship with political and economic realities It gives theoretically informed ideas for understanding environmental change in the context of the political economy of state socialism and post communist transformations drawing on a wide body of literature from West Central and Eastern Europe

Defense Environmental Restoration Program to Clean Up Former Hazardous Waste Dump Sites United States. Congress. House. Committee on Armed Services. Environmental Restoration Panel, 1986 **Human Ecology as Human Behavior** John W. Bennett, 2017-07-05 Human interaction with the natural environment has a dual character By turning increasing quantities of natural substances into physical resources human beings might be said to have freed themselves from the constraints of low technology survival pressures However the process has generated a new dependence on nature in

the form of complex socionatural systems as Bennett calls them in which human society and behavior are so interlocked with the management of the environment that small changes in the systems can lead to disaster Bennett's essays cover a wide range from the philosophy of environmentalism to the ecology of economic development from the human impact on semi arid lands to the ecology of Japanese forest management This expanded paperback edition includes a new chapter on the role of anthropology in economic development Bennett's essays exhibit an underlying pessimism if human behavior toward the physical environment is the distinctive cause of environmental abuse then reform of current management practices offers only temporary relief that is conservationism like democracy must be continually reaffirmed Clearly presented and free of jargon *Human Ecology as Human Behavior* will be of interest to anthropologists economists and environmentalists Cold War Ecology Arvid Nelson, 2008-10-01 East Germany its economy and its society were in decline long before the country's political collapse in the late 1980s The clues were there in the natural landscape Arvid Nelson argues in this groundbreaking book but policy analysts were blind to them Had they noted the record of the leadership's values and goals manifest in the landscape they wouldn't have hailed East Germany as a Marxist Leninist success story Nelson sets East German history within the context of the landscape history of two centuries to underscore how forest and ecosystem change offered a reliable barometer to the health and stability of the political system that governed them *Cold War Ecology* records how East German leaders' indifference to human rights and their disregard for the landscape affected the rural economy forests and population This lesson from history suggests new ways of thinking about the health of ecosystems and landscapes Nelson shows and he proposes assessing the stability of modern political systems based on the environment's system qualities rather than on political leaders' goals and beliefs *The Ecology of War in China* Micah S. Muscolino, 2015 This book explores the interplay between war and the environment in Henan Province a hotly contested frontline territory that endured massive environmental destruction and human disruption during the conflict between China and Japan that raged during World War II In a desperate attempt to block Japan's military advance Chinese Nationalist armies under Chiang Kai shek broke the Yellow River's dikes in Henan in June 1938 resulting in devastating floods that persisted until after the war's end Greater catastrophe struck Henan in 1942-1943 when famine took some two million lives and displaced millions more Focusing on these war-induced disasters and their aftermath this book conceptualizes the ecology of war in terms of energy flows through and between militaries societies and environments Ultimately Micah Muscolino argues that efforts to procure and exploit nature's energy in various forms shaped the choices of generals the fates of communities and the trajectory of environmental change in North China **The Land That Could Be** William A. Shutkin, 2001-08-24 Environmentalist and lawyer William Shutkin describes a new kind of environmental and social activism spreading across the nation one that joins the pursuit of environmental quality with that of civic health and sustainable local economies In this book environmentalist and lawyer William Shutkin describes a new kind of environmental and social activism spreading across the nation one that joins the

pursuit of environmental quality with that of civic health and sustainable local economies In the face of challenges posed by often corrosive market forces and widespread social disaffection this civic environmentalism is creating nothing less than a new public discourse and dynamic social vision grounded in environmental action Shutkin points the way to vibrant sustainable communities through four inspiring examples of civic environmentalism in action the redevelopment of contaminated urban land for agriculture in inner city Boston mass transit based development and waterfront restoration in Oakland protection of open space and conservation based development in rural Colorado and smart growth and sustainability strategies in suburban New Jersey The book s underlying message is that the nation s environmental health is a critical factor in its success as a vital democracy Social health democratic community and environmentalism Shutkin shows are one From the author s preface This book asserts that environmentalism is as much about protecting ordinary places as it is about preserving wilderness areas as much about promoting civic engagement as it is about pursuing environmental litigation and as much about implementing sound economic development strategies as it is about negotiating global climate change treaties Ultimately I believe environmentalism is nothing less than about our conception of ourselves as a social and political community what the bald eagle our national symbol really means **Ecology** ,1986 Publishes essays and articles that report and interpret the results of original scientific research in basic and applied ecology
