The Routledge Research Companion to Popular Music Education

Gareth Smith, Zack Moir, Matt Brennan, Shara Rambarran, Phil Kirkman, 2017-01-20 Popular music is a growing presence in education, formal and otherwise, from primary school to postgraduate study. Programmes, courses and modules in popular music studies, popular music performance, songwriting and areas of music technology are becoming commonplace across higher education. Additionally, specialist pop, rock, jazz graded exam syllabi such as RockSchool and Trinity Rock and Pop have emerged in recent years, meaning that it is now possible for school leavers in some countries to meet university entry requirements having studied only popular music. In the context of teacher education, classroom teachers and music specialists alike are becoming increasingly empowered to introduce popular music into their classrooms. At present, research in Popular Music Education lies at the fringes of the fields of music education, ethnomusicology, community music, cultural studies and popular music studies. The Routledge Research Companion to Popular Music Education is the first book-length publication that brings together a diverse range of scholarship in this emerging field. Perspectives include the historical, sociological, pedagogical, musicological, axiological, reflexive, critical, philosophical and ideological.

Popular Music, Cultural Politics and Music Education in China

Wai-Chung Ho, 2016-12-08

While attention has been paid to various aspects of music education in China to date, no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China. Before the implementation of the new curriculum reforms in China at the beginning of the twenty-first century, there was neither Chinese nor Western popular music in textbook materials. Popular culture had long been prohibited in school music education by China's strong revolutionary orientation, which feared spiritual pollution by Western cultures. However, since the early twenty-first century, education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum. In relation to this topic, this book analyses how social transformation and cultural politics have affected

community relations and the transmission of popular music through school music education Ho presents music and music education as sociopolitical constructions of nationalism and globalization Moreover how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education as well as the reformation of music education in mainland China is discussed Based on the perspectives of school music teachers and students the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland **The**
