Earth and Us Mostafa Kamal Tolba, Asit K. Biswas, 1991 *Economic Development and the Environment* Raymond Frech Mikesell, 1995 Explores the relationship between sustainable development and development economics The central theme is the way in which the environment and sustainability can be integrated into development strategies The book argues the case for government interventio *The Dynamics of Socio-Economic Development* Adam Szirmai, 2005-01-20 Why are poor countries poor and rich countries rich How are wealth and poverty related to changes in nutrition health life expectancy education population growth and politics This modern non technical 2005 introduction to development studies explores the dynamics of socio economic development and stagnation in developing countries Taking a quantitative and comparative approach to contemporary debates within their broader context Szirmai examines historical institutional demographic sociological political and cultural factors Key chapters focus on economic growth technological change industrialisation agricultural development and consider social dimensions such as population growth health and education Each chapter contains comparative statistics on trends from a sample of twenty nine developing countries This rich statistical database allows students to strengthen their understanding of comparative development experiences Assuming no prior knowledge of economics the book is suited for use in inter disciplinary development studies programmes as well as economics courses and will also interest practitioners pursuing careers in developing countries *The Environment and Economic Development in South Asia* Mohammad Alauddin, Clement Tisdell, 1998-05-15 The major challenges facing South Asia to achieve sustainable development are investigated using case studies and applying new points of view in economic thought about the connection between development and the environment After reviewing economic perspectives on development and the environment and South Asia s situation particular issues such as depletion of natural resources and land degradation the environmental

impacts and consequences of extending markets of technological change and property rights are examined Environmental change and employment income distribution and poverty population growth and urbanisation are considered **Global Environmental Economics** Mohammed H. I. Dore, Timothy D. Mount, 1998-12-29 The work also illustrates that new developments in social choice theory offer a better foundation than traditional welfare economics Population Growth and Economic Development National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, Working Group on Population Growth and Economic Development, 1986-02-01 This book addresses nine relevant questions Will population growth reduce the growth rate of per capita income because it reduces the per capita availability of exhaustible resources How about for renewable resources Will population growth aggravate degradation of the natural environment Does more rapid growth reduce worker output and consumption Do rapid growth and greater density lead to productivity gains through scale economies and thereby raise per capita income Will rapid population growth reduce per capita levels of education and health Will it increase inequality of income distribution Is it an important source of labor problems and city population absorption And finally do the economic effects of population growth justify government programs to reduce fertility that go beyond the provision of family planning services **Population — Development — Environment** J. Baguant, Wolfgang Lutz, C. Prinz, F.L. Toth, A.B. Wils, 2013-06-29 Because the number of options is often limited small island states tend to find it uncommonly difficult to strike a balance between population environment and development Relatively high population density and small land areas without much in the way of natural resources do not provide the best of circumstances for improving the living conditions of the population especially a fast growing one The result is often stunted economic development and environmental stress both on land and offshore The developments in the island state of Mauritius over the past 30 years however can serve as an inspiration and illustration of how extremely adverse conditions can be overcome In the early 1960s Mauritius was trying to cope with rapid population growth extreme poverty and grim economic prospects Population density was 324 inhabitants per km total fertility was 5.7 and GNP per capita was less than 200 In 1990 the situation in Mauritius was radically different Although population density had increased to 527 inhabitants per km total fertility had dropped to 2.0 and GNP per capita had increased to 2,310 Economic stagnation had been replaced by steady growth and full employment and environmental problems were being addressed as issues of high priority
